Learning Wireless Java

Until now, Java developers have been limited to programming on the desktop. However, with the advent of the Java 2 Platform, Micro Edition (J2ME) from Sun Microsystems, programmers can now develop Java applications for resource-constrained devices— that is, devices with small memory footprints and limited CPU power. This technology has the potential to bring exciting new Java applications into the wireless programming arena.

Learning Wireless Java gets you up to speed with the new J2ME, including its configurations and profiles, as quickly as possible. This book introduces the Connected Limited Device Configuration (CLDC) and the Mobile Information Device Profile (MIDP) for developing wireless applications, as well as tips and tricks for using Sun Microsystems' lightweight K Virtual Machine (KVM). In addition, *Learning Wireless Java* teaches you the basics of MIDlet programming. It explains how to use the Generic Connection Framework for networking support, the high-level and low-level graphical APIs, and the J2ME record management system for persistent storage.
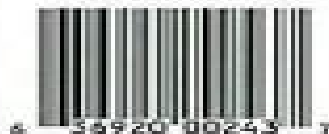

Specifically, this book:

- Introduces the J2ME architecture and the Java Wireless Toolkit
- Provides detailed coverage of how the CLDC, the MIDP, and the KVM differ from the Java 2 Standard Edition
- Offers an in-depth look at using the MIDP GUI APIs
- Explains how to use the Generic Connection Framework and HTTP to exchange data with servers across the Internet
- Discusses how to persist data with the MIDP record management system
- Contains detailed instructions on deploying your J2ME applications to the Motorola i85s/i50x and Palm-connected devices
- Includes a detailed quick reference for each of the CLDC and the MIDP packages and classes

Qusay H. Mahmoud is an independent contractor for Sun Microsystems. He has written several articles for the Java Developer Connection that cover J2ME, including the MIDP and the CLDC APIs. He has also presented tutorials on developing wireless applications at a number of international conferences. He is the author of *Distributed Programming with Java* (Manning Publications).
