## **Learning How To Fall:**

*Dying to Learn* Michael A. Hunzeker, 2021-07-15 In *Dying to Learn* Michael Hunzeker develops a novel theory to explain how wartime militaries learn. He focuses on the Western Front which witnessed three great power armies struggle to cope with deadlock throughout the First World War as the British, French, and German armies all pursued the same solutions: assault tactics, combined arms, and elastic defense in depth. By the end of the war, only the German army managed to develop and implement a set of revolutionary offensive, defensive, and combined arms doctrines that in hindsight represented the best way to fight. Hunzeker identifies three organizational variables that determine how fighting militaries generate new ideas, distinguish good ones from bad ones, and implement the best of them across the entire organization. These factors are the degree to which leadership delegates authority on the battlefield, how effectively the organization retains control over soldier and officer training, and whether or not the military possesses an independent doctrinal assessment mechanism. Through careful study of the British, French, and German experiences in the First World War, *Dying to Learn* provides a model that shows how a resolute focus on analysis, command, and training can help prepare modern militaries for adapting amidst high intensity warfare in an age of revolutionary technological change.

*Fall Prevention and Protection* Hongwei Hsiao, PhD, 2016-11-03 This book covers a wealth of knowledge from experts and informed stakeholders on the best ways to understand, prevent, and control fall-related risk exposures. Featured are subjects on: 1) a public health view of fall problems and strategic goals; 2) the sciences behind human falls and injury risk; 3) research on slips, trips, and falls; 4) practical applications of prevention and protection tools and methods in industrial sectors and home communities; 5) fall incident investigation and reconstruction; and 6) knowledge gaps, emerging issues, and recommendations for fall protection research and fall mitigation.

**In Order to Learn** Frank E. Ritter, 2007-07-30 *In Order to Learn* shows how order effects are crucial in human learning, instructional design, machine learning, and both symbolic and connectionist cognitive models. Each chapter explains a different aspect of how the order in which material is presented can strongly influence what is learned by humans and theoretical models of learning in a variety of domains. In addition to data models, order effects are provided that predict and describe order effects and analyze how and when they will occur.

Service Learning Andrew Furco, Shelley H. Billig, 2002-03-01 The *Advances in Service Learning Research* book series was established to initiate the publication of a set of comprehensive research volumes that would present and discuss a wide range of issues in this broad field called service learning. Service learning is a multifaceted pedagogy that crosses all levels of schooling, has potential relevance to all academic and professional disciplines, is connected to a range of dynamic social issues, and operates within a broad range of community contexts. In terms of research, there is much terrain to cover before a full understanding of service learning can be achieved. This volume, the first in the annual book series, explores various themes, issues, and answers that bring us one step closer to understanding the essence of service learning. The chapters of this volume focus on a broad range of topics that address a

variety of research issues on service learning in K 12 education teacher education and higher education Through a wide scoped research lens the volume explores definitional foundations of service learning theoretical issues regarding service learning the impacts of service learning and methodological approaches to studying service learning Collectively the chapters of the book provide varying and at times opposing perspectives on some of the critical issues regarding service learning research and practice
