Effective Databases for Text & Document Management Shirley A. Becker, 2003-01-01 Focused on the latest research on text and document management this guide addresses the information management needs of organizations by providing the most recent findings How the need for effective databases to house information is impacting organizations worldwide and how some organizations that possess a vast amount of data are not able to use the data in an economic and efficient manner is demonstrated A taxonomy for object oriented databases metrics for controlling database complexity and a guide to accommodating hierarchies in relational databases are provided Also covered is how to apply Java triggers for X Link management and how to build signatures

Distributed Computing - IWDC 2005 Ajit Pal, 2005-12-13 This book constitutes the refereed proceedings of the 7th International Workshop on Distributed Computing IWDC 2004 held in Kharagpur India in December 2005 The 28 revised full papers and 33 revised short papers presented together with 5 invited keynote talks were

carefully reviewed and selected from 253 submissions The papers are organized in topical sections on theory of distributed computing sensor networks fault tolerance optical networks peer to peer networks wireless networks network security grid and networks middleware and data management mobility management and distributed artificial intelligence **Identifying Product and Process State Drivers in Manufacturing Systems Using Supervised Machine Learning** Thorsten Wuest,2015-04-20 The book reports on a novel approach for holistically identifying the relevant state drivers of complex multi stage manufacturing systems This approach is able to utilize complex diverse and high dimensional data sets which often occur in manufacturing applications and to integrate the important process intra and interrelations The approach has been evaluated using three scenarios from different manufacturing domains aviation chemical and semiconductor The results which are reported in detail in this book confirmed that it is possible to incorporate implicit process intra and interrelations on both a process and programme level by applying SVM based feature ranking In practice this method can be used to identify the most important process parameters and state characteristics the so called state drivers of a manufacturing system Given the increasing availability of data and information this selection support can be directly utilized in e g quality monitoring and advanced process control Importantly the method is neither limited to specific products manufacturing processes or systems nor by specific quality concepts *Conceptual Modeling - ER 2000* Alberto H.F. Laender,Stephen W. Liddle,Veda Storey,2003-07-31 This book constitutes the refereed proceedings of the 19th International Conference on Conceptual Modeling ER 2000 held in Salt Lake City Utah USA in October 2000 The 37 revised full papers presented together with three invited papers and eight industrial abstracts were carefully reviewed and selected from a total of 140 submitted papers The book offers topical sections on database integration temporal and active database modeling database and data warehouse design techniques analysis patterns and ontologies Web based information systems business process modeling conceptual modeling and XML engineering and multimedia application modeling object oriented modeling applying object oriented technology quality in conceptual modeling and application design using UML **Readings in Object-Oriented Database Systems** Stanley B. Zdonik,David Maier,1990 This comprehensive collection is a survey of research in object oriented databases offering a substantive overview of the field section introductions and over 40 research papers presented in their original scope and detail The balanced selection of articles presents a confluence of ideas from both the language and database research communities that have contributed to the object oriented paradigm The editors develop a general definition and model for object oriented databases and relate significant research efforts to this framework Further the collection explores the fundamental notions behind object oriented databases semantic data models implementation of object oriented systems transaction processing interfaces and related approaches Research and theory are balanced by applications to CAD systems programming environments and office information systems *Business Information Technology Management* R. Hackney,D. Dunn,2000-05-25 Organisations are information intensive systems

operating in dynamic and competitive markets structured around complex physical and political infrastructures This book characterises the critical nature of these environments through strategies for business information technology management BITM , Database: Enterprise, Skills and Innovation Mike Jackson, David Nelson, Sue Stirk, 2005-06-16 The British National Conference on Databases BNCOD was established in 1980 as a forum for research into the theory and practice of databases The original conference in the series took place at the University of Aberdeen To be precise this conference was in fact entitled ICOD which stood for International Conference on Databases It was the intention when the series began that an ICOD would take place every two years whilst a BNCOD would run in the years in between As the record shows ICOD was only held in 1980 and 1983 The more junior conference has managed to acquire a lifetime much longer than that of its senior relative If truth were known however BNCOD has over the years grown into ICOD and although the conference is still titled British National it is in fact an international conference that takes place on a yearly basis Proof of this can be obtained simply by looking at the table of contents of these proceedings which clearly show that the majority of papers presented at this year's conference came from contributors whose affiliations are outside the UK Despite the range of papers on offer BNCOD still retains its uniquely British flavor The Programme Committee is drawn from UK academics and the conference is always held at a British university or in earlier years a polytechnic

Handbook of Research on Innovations in Database Technologies and Applications: Current and Future Trends Ferragline, Viviana E., Doorn, Jorge Horacio, Rivero, Laura C., 2009-02-28 This book provides a wide compendium of references to topics in the field of the databases systems and applications Provided by publisher Information Modelling and Knowledge Bases XIX H. Jaakkola, Y. Kiyoki, T.
