Green Iguana Manual:

The Green Iguana Manual Philippe de Vosjoli, Susan Donoghue, Roger Klingenberg, David Blair, 2003-01-01 It's hard to resist a friendly dinosaur and the green iguana's enormous popularity rests on that amusing truism. This large lizard presents few difficulties and for keepers and can live for a couple of decades. One of the authors' purposes of *The Green Iguana Manual* is to promote responsible ownership for this noble lizard that can grow to be the size of a medium size dog with an unusually long leathery tail. *The Green Iguana Manual* takes a close look at the characteristics of this species that have made these attractive lizards so amazingly popular in the pet world as well as their lifelong requirements. Author and herp expert Philippe de Vosjoli is joined by iguana specialists Dr. Roger Klingenberg, Dr. Susan Donoghue and David Blair who each contribute special chapters to this up to date and authoritative guide. This colorfully illustrated guide provides excellent general guidelines for keepers who wish to add a green iguana to their vivarium and maintain their prehistoric pet in excellent health and condition. The authors provide an introduction to basic iguana characteristics including distribution, size, longevity and varieties and morphs to help beginners better understand the anatomy and behavior of these fascinating lizards. This *Advanced Vivarium Systems* title includes information about selecting a healthy green iguana, handling, housing, needs, breeding and life stages. Dr. Donoghue provides the chapter *Diet and Feeding Management* which discusses food sources, supplementation and feeding guidelines for green iguanas of all ages. Dr. Klingenberg provides the chapter on diseases and disorders which covers nutritional and metabolic disorders, infectious diseases, reproductive disorders, parasites and environmental issues. The chapter concludes with a very useful five page troubleshooting chart for common disorders. The book also discusses the iguanas of the West Indies chapter by Blair as well as seven other iguanid lizards such as the spiny tailed iguana, Fiji Island iguana and chuckwalla.
