**Between Ruin and Restoration** Daniel E. Orenstein, Alon Tal, Char Miller, 2012-12-30 The environmental history of Israel is as intriguing and complex as the nation itself Situated on a mere 8 630 square miles bordered by the Mediterranean Sea and Persian Gulf varying from desert to forest Israel's natural environment presents innumerable challenges to its growing population The country's conflicted past and present diverse religions and multitude of cultural influences powerfully affect the way Israelis imagine question and shape their environment Zionism from the late nineteenth onward

has tempered nearly every aspect of human existence Scarcities of usable land and water coupled with border conflicts and regional hostilities have steeled Israeli s survival instincts As this volume demonstrates these powerful dialectics continue to undergird environmental policy and practice in Israel today Between Ruin and Restoration assembles leading experts in policy history and activism to address Israel s continuing environmental transformation from the biblical era to the present and beyond with a particular focus on the past one hundred and fifty years The chapters also reflect passionate public debates over meeting the needs of Israel s population and preserving its natural resources The chapters detail the occupations of the Ottoman Empire and British colonialists in eighteenth and nineteenth century Palestine as well as Fellaheen and pastoralist Bedouin tribes and how they shaped much of the terrain that greeted early Zionist settlers Following the rise of the Zionist movement the rapid influx of immigrants and ensuing population growth put new demands on water supplies pollution controls sanitation animal populations rangelands and biodiversity forestry marine policy and desertification Additional chapters view environmental politics nationally and internationally the environmental impact of Israel s military and considerations for present and future sustainability *Armor* ,1999

**Occasion-Sensitivity** Charles Travis,2008-02-28 Charles Travis presents a series of essays in which he has developed his distinctive view of the relation of thought to language The key idea is occasion sensitivity what it is for words to express a given concept is for them to be apt for contributing to any of many different conditions of correctness notably truth conditions Since words mean what they do by expressing a given concept it follows that meaning does not determine truth conditions This view ties thoughts less tightly to the linguistic forms which express them than traditional views of the matter and in two directions a given linguistic form meaning fixed may express an indefinite variety of thoughts one thought can be expressed in an indefinite number of syntactically and semantically distinct ways Travis highlights the importance of this view for linguistic theory and shows how it gives new form to a variety of traditional philosophical problems

*Non-Western Social Movements and Participatory Democracy* Ekim Arbatli, Dina Rosenberg, 2017-03-02 This book analyzes social movements across a range of countries in the non-Western world: Bosnia, Brazil, Egypt, India, Iran,

Palestine Russia Syria Turkey and Ukraine in the period 2008 to 2016 The individual case studies investigate how political and social goals are framed nationally and globally and the types of mobilization strategies used to pursue them The studies also assess how in the age of transnationalism the idea of participatory democracy produces new collective action frames and mass mobilization strategies The book challenges the view that most social movements unequivocally seek to achieve higher levels of democratization Instead the authors argue that protesters across different movements advocate more involved forms of citizen participation since passive representation through liberal democratic institutions fails to address mass grievances and demands for accountability in many countries
