Grid Computing - GRID 2000 Rajkumar

Buyya, Marc Baker, 2003-07-31. Welcome to GRID 2000, the first annual IEEE ACM international workshop on grid computing sponsored by the IEEE Computer Society's Task Force on Cluster Computing TFCC and the Association for Computing Machinery ACM. The workshop has received generous sponsorship from the European Grid Forum, eGrid, the EuroTools SIG, on Metacomputing, Microsoft Research USA, Sun Microsystems USA, and the Centre for Development of Advanced Computing India. It is a sign of the current high levels of interest and activity in Grid computing that we have had contributions to the workshop from researchers and developers in Australia, Austria, Canada, France, Germany, Greece, India, Italy, Japan, Korea, The Netherlands, Spain, Switzerland, UK, and USA. It is our pleasure and honor to present the first annual international Grid computing meeting program and the proceedings. *The Grid: A New Network Computing Infrastructure*. The growing popularity of the Internet along with the availability of powerful computers and high-speed networks as low-cost commodity components are helping to change the way we do computing. These new technologies are enabling the coupling of a wide variety of geographically distributed resources such as parallel supercomputers, storage systems, data sources, and special devices that can then be used as a unified resource and thus form what is popularly known as the Grids. Advances in Grid and

Pervasive Computing Nabil Abdennadher, Dana Petcu, 2009-04-29. Grid and Pervasive Computing GPC is an annual

international conference devoted to the promotion and advancement of all aspects of grid and pervasive computing The objective of this conference is to provide a forum for researchers and engineers to present their latest research in the elds of grid and pervasive computing Previous editions of the Grid and Pervasive Computing conference were held in Kunming China May 25 28 2008 Paris France May 2 4 2007 and Taichung Taiwan May 3 5 2006 The fourth edition took place in Geneva Switzerland during May 4 8 2009 It was organized by members of the University of Applied Sciences Western Switzerland Haute Ecole de Paysage d Ing enierie et d Architecture hepia in collaboration with colleagues from various places around the world The conference spanned a full week including a three day technical program where the papers contained in these proceedings were presented The conf ence was followed by two tutorial days where attendants had the opportunity to discuss a variety of topics related to the elds covered at the conference at both introductory and advanced levels The technical program also included an industrial session with contributions illustrating challenges faced and so tions devised by industry Furthermore the conference o ered an opportunity for vendors and researchers to present their products and projects at an ex bition Grid Village where solutions supporting the development of grid and pervasive computing were displayed

**Grid Computing - Grid 2001** Craig A. Lee,2014-09-11 *Grid Computing* Fran Berman,Geoffrey Fox,Anthony J. G. Hey,2003-04-18 Grid computing is applying the resources of many computers in a network to a single problem at the same time Grid computing appears to be a promising trend for three reasons 1 Its ability to make more cost effective use of a given amount of computer resources 2 As a way to solve problems that can t be approached without an enormous amount of computing power 3 Because it suggests that the resources of many computers can be cooperatively and perhaps

synergistically harnessed and managed as a collaboration toward a common objective A number of corporations professional groups university consortiums and other groups have developed or are developing frameworks and software for managing grid computing projects The European Community EU is sponsoring a project for a grid for high energy physics earth observation and biology applications In the United States the National Technology Grid is prototyping a computational grid for infrastructure and an access grid for people Sun Microsystems offers Grid Engine software Described as a distributed resource management tool Grid Engine allows engineers at companies like Sony and Synopsys to pool the computer cycles on up to 80 workstations at a time the Grid is a very hot topic generating broad interest from research and industry e g IBM Platform Avaki Entropia Sun HP Grid architecture enables very popular e Science projects like the Genome project which demand global interaction and networking In recent surveys over 50% of Chief Information Officers are expected to use Grid technology this year Grid Computing Features contributions from the major players in the field Covers all aspects of grid technology from motivation to applications Provides an extensive state of the art guide in grid computing This is essential reading for researchers in Computing and Engineering physicists statisticians engineers and mathematicians and IT policy makers
