**Frankenstein** Mary Shelley, 1984-05-01 Nominated as one of America's best loved novels by PBS's The Great American Read I saw the pale student of unhallowed arts kneeling beside the thing he had put together I saw the hideous phantasm of a man stretched out and then on the working of some powerful engine show signs of life and stir with an uneasy half vital motion A summer evening's ghost stories lonely insomnia in a moonlit Alpine room and a runaway imagination fired by philosophical discussions with Lord Byron and Percy Bysshe Shelley about science galvanism and the origins of life conspired to produce for Mary Shelley this haunting night specter By morning it had become the germ of her Romantic masterpiece Frankenstein Written in 1816 when she was only nineteen Mary Shelley's novel of The Modern Prometheus chillingly dramatized the dangerous potential of life begotten upon a laboratory table A frightening creation myth for our own time Frankenstein remains one of the greatest horror stories ever written and is an undisputed classic of its kind

**Technophobia!** Daniel Dinello, 2013-08-26 Techno heaven or techno hell If you believe many scientists working in the emerging fields of twenty first century technology the future is blissfully bright Initially human bodies will be perfected through genetic manipulation and the fusion of human and machine later human beings will completely shed the shackles of pain disease and even death as human minds are downloaded into death free robots whereby they can live forever in a heavenly posthuman existence In this techno utopian future humanity will be saved by the godlike power of technology If you believe the authors of science fiction however posthuman evolution marks the beginning of the end of human freedom values and identity Our dark future will be dominated by mad scientists rampaging robots killer clones and uncontrollable viruses In this timely new book Daniel Dinello examines the dramatic conflict between the techno utopia promised by real world scientists and the techno dystopia predicted by science fiction Organized into chapters devoted to robotics bionics artificial intelligence virtual reality biotechnology nanotechnology and other significant scientific advancements this book summarizes the current state of each technology while presenting corresponding reactions in science fiction Dinello draws on a rich

range of material including films television books and computer games and argues that science fiction functions as a valuable corrective to technological domination countering techno hype and reflecting the weaponized religiously rationalized profit fueled motives of such science By imaging a disastrous future of posthuman techno totalitarianism science fiction encourages us to construct ways to contain new technology and asks its audience perhaps the most important question of the twenty first century is technology out of control

**Fiction 2000** George Edgar Slusser, T. A. Shippey, 1992 Will novels and stories be relevant in the next millennium when the boundaries between illusion and reality and observer and observed may dissipate in a whirl of images signals and data This essay collection divines the prospects of fiction in the information age by examining cyberpunk literature A movement less than a decade old cyberpunk is driven by deep concerns about society ethics and new technology and has been defined as the literature of the first generation of science fiction writers actually to live in a science fiction world These essays were first presented at the 1989 annual J Lloyd Eaton Conference on Science Fiction and Fantasy Literature the field s most prestigious international gathering They address concerns common not only to cyberpunk and traditional science fiction scholars critics and writers but to their counterparts outside the genre as well Interdisciplinary in perspective the essays consider the origins of cyberpunk the appropriation of its conventions by the mass media the literature s paradoxical retrogressive iconoclastic nature cyberpunk s affinities to and deviations from both traditional science fiction and postmodernist literature the parameters and components of the cyberpunk canon and the movement s future course Some essays are theoretical but all are grounded in works familiar to serious science fiction readers Neuromancer Frontera Deserted Cities of the Heart Islands in the Net Great Sky River the Mirrorshades anthology and others cyberpunk TV and cinema like the Max Headroom programs Blade Runner and Tron and precursory literature including Frankenstein Le Roman de l avenir Ralph 124C 41 and A Clockwork Orange Useful for its views on a volatile science fiction subgenre Fiction 2000 is also valuable for what it tells us about the fate of mainstream literature
