Frankish Church:

The Reform of the Frankish Church Martin A. Claussen, 2004 Chrodegang of Metz c 712-766 was a leading figure of the late Merovingian and early Carolingian Church. Born to one of the principal aristocratic families in Austrasia, he served as referendary of Charles Martel and was appointed bishop of Metz in the 740s. As bishop, Chrodegang became one of the foremost churchmen in Francia, chairing councils, founding monasteries, and beginning a reform of the lives of the canons of the Metz cathedral. This book is a major study in the English language on Chrodegang, examining his preoccupation with the creation of communities of faith and concord modelled on the early Church. It explores his attempts to unite the Frankish episcopacy, his rule for the cathedral clergy in Metz, the *Regula canonicorum*, and his introduction of new liturgical practices that sought to transform his see into a hagiopolis, a holy city which provided a model for later Carolingian reform. *The Formation of Christendom* Judith Herrin, 2021-10-19 A groundbreaking history of how the Christian West emerged from the ancient Mediterranean world. In this acclaimed history of Early Christendom, Judith Herrin shows how, from the sack of Rome in 410 to the coronation of Charlemagne in 800, the Christian West grew out of an ancient Mediterranean world divided between the Roman west, the Byzantine east, and the Muslim south. Demonstrating that religion was the period's defining force, she reveals how the clash over graven images, banned by Islam, both provoked iconoclasm in Constantinople and generated a distinct western commitment to Christian pictorial narrative. In a new preface, Herrin discusses the book's origins, reception, and influence. The Archaeology of Frankish Church Councils, AD 511-768 Gregory Halfond, 2009-11-17 Despite growing scepticism concerning the evidentiary value of normative legal sources, scholars continue to mine the legislative acts of ecclesiastical councils for insight into political, religious, and quotidian life in Frankish Gaul. Between the reigns of Clovis and Charlemagne (AD 511-768), at least eighty councils assembled, often on royal command, to discuss issues of concern to the episcopal and clerical attendees. Their published canons were intended to communicate ecclesiastical policy in the Frankish regnum. However, scholars have paid comparatively slight attention to the institution responsible for this body of legislation. This book remedies this lacuna by delineating the functions and *modus operandi* of the Frankish church council as an administrative body. The Carolingians in Central Europe, Their History, Arts, and Architecture Herbert Schutz, 2004 This book is an attempt to focus where pertinent on the Carolingian cultural inventory produced and assembled in the libraries, museums, and architectural sites of Central Europe. This inventory allows conclusions which demonstrate the originality of the literary, artistic, and architectural efforts. The Church in Anglo-Saxon Society John Blair, 2005-01-20 From the impact of the first monasteries in the seventh century to the emergence of the local parochial system five hundred years later, the Church was a force for change in Anglo-Saxon society. It shaped culture and ideas, social and economic behaviour, and the organization of landscape and settlement. This book traces how the widespread foundation of monastic sites, minsters, during c. 670-730 gave the recently pagan English new ways of living, of exploiting their resources, and of absorbing European

culture as well as opening new spiritual and intellectual horizons Through the era of Viking wars and the tenth century reconstruction of political and economic life the minsters gradually lost their wealth their independence and their role as sites of high culture but grew in stature as foci of local society and eventually towns After 950 with the increasing prominence of manors manor houses and village communities a new and much larger category of small churches were founded endowed and rebuilt the parish churches of the emergent eleventh and twelfth century local parochial system In this innovative study John Blair brings together written topographical and archaeological evidence to build a multi dimensional picture of what local churches and local communities meant to each other in early England

Christendom Peter Heather, 2025-04-22 A colossal book written by a colossus in the field The New York Review of Books A major reinterpretation of the religious superstate that came to define both Europe and Christianity itself by one of our foremost medieval historians In the fourth century AD a new faith grew out of Palestine overwhelming the paganism of Rome and resoundingly defeating a host of other rival belief systems Almost a thousand years later all of Europe was controlled by Christian rulers and the religion ingrained within culture and society exercised a monolithic hold over its population But how did a small sect of isolated and intensely committed congregations become a mass movement centrally directed from Rome As Peter Heather shows in this illuminating new history there was nothing inevitable about Christendom's rise and eventual dominance From Constantine the Great's pivotal conversion to Christianity to the crisis that followed the collapse of the Roman empire which left the religion teetering on the edge of extinction to the astonishing revolution of the eleventh century and beyond out of which the Papacy emerged as the head of a vast international corporation Heather traces Christendom's chameleonlike capacity for self reinvention as it not only defined a fledgling religion but transformed it into an institution that wielded effective authority across virtually all of the disparate peoples of medieval Europe Authoritative vivid and filled with new insights this is an unparalleled history of early Christianity
