**Frederic Church** Jennifer Raab,2015-10-29 Frederic Church 1826-1900 the most celebrated painter in the United States

during the mid 19th century created monumental landscapes of North and South America the Arctic and the Middle East These paintings were unsurpassed in their attention to detail yet the significance of this pictorial approach has remained largely unexplored In this important reconsideration of Church s works Jennifer Raab offers the first sustained examination of the aesthetics of detail that fundamentally shaped 19th century American landscape painting Moving between historical context and close readings of famous canvases including Niagara The Heart of the Andes and The Icebergs Raab argues that Church s art challenged an earlier model of painting based on symbolic unity revealing a representation of nature with surprising connections to scientific discourses of the time The book traces Church s movement away from working in oil on canvas to shaping the physical landscape of Olana his self designed estate on the Hudson River a move that allowed the artist to rethink scale and process while also engaging with pressing ecological questions Beautifully illustrated with dramatic spreads and striking details of Church s works *Frederic Church The Art and Science of Detail* offers a profoundly new understanding of this canonical artist Frederic Edwin Church and the National Landscape Franklin Kelly,1988

**Frederic Church** Jennifer Raab,2015-01-01 A reconsideration of Church s works offering a sustained examination of the aesthetics of detail that fundamentally shaped 19th century American landscape painting **The Landscapes of Frederic Edwin Church** David C. Huntington,1966 The Civil War and American Art Eleanor Jones Harvey,Smithsonian American Art Museum,2012-12-03 Collects the best artwork created before during and following the Civil War in the years between 1859 and 1876 along with extensive quotations from men and women alive during the war years and text by literary figures including Emily Dickinson Mark Twain and Walt Whitman 15 000 first printing **Chasing Icebergs** Matthew H. Birkhold,2023-02-07 A deeply intelligent and engrossing narrative that will transform our relationship with water and how we view climate change The global water crisis is upon us 1 in 3 people do not have access to safe drinking water nearly 1 million people die each year as a result Even in places with adequate freshwater pollution and poor infrastructure have left residents without basic water security Luckily there is a solution to this crisis where we least expect it Icebergs frozen mountains of freshwater are more than a symbol of climate change In his spellbinding *Chasing Icebergs* Matthew Birkhold argues the glistening leviathans of the ocean may very well hold the key to saving the planet Harvesting icebergs for drinking water is not a new idea But for the first time in human history doing so on a massive global scale is both increasingly feasible and necessary for our survival *Chasing Icebergs* delivers a kaleidoscopic history of humans relationship with icebergs and offers an urgent assessment of the technological cultural and legal obstacles we must overcome to harness this freshwater resource Birkhold takes readers around the globe introducing them to a colorful cast of characters with wildly different ideas about how and if humans should use icebergs Sturdy bureaucrats committed to avoiding another Titanic square off against iceberg cowboys who wrangle the frozen beasts for profit Entrepreneurs selling luxury iceberg water for an eye popping price clash with fearless humanitarians trying to tow icebergs across the globe to eradicate water shortages Along the way

we meet some of the world's most renowned scientists to determine how industrial scale iceberg harvesting could affect the oceans and the poles And we see firsthand the looming conflict between Indigenous peoples like the Greenlandic Inuit with claims to icebergs and the private corporations that stand to reap massive profits As Birkhold shepherds readers from Connecticut to South Africa from Newfoundland to Norway to Greenland and beyond he unfurls a visionary argument for cooperation over conflict It's not too late for icebergs to save humanity But we must act fast to form a coalition of scientists visionaries engineers lawyers and diplomats to ensure that the Cold Rush doesn't become a free for all After Icebergs with a Painter Louis Legrand Noble, 2022 Fashioning the Canadian Landscape John Irvine Little, 2018-04-13

Interpretations of Canada's emerging identity have been largely based on a relatively small corpus of literary writing and landscape paintings overlooking the influence of the British and American travel writers who published hundreds of books and articles that did much to fix the image of Canada in the popular imagination In *Fashioning the Canadian Landscape* J I Little examines how Canada much like the United States came to be identified with its natural landscape Little argues that in contrast to the American identification with the wilderness sublime however Canada's image was strongly influenced by the picturesque convention favoured by British travel writers This amply illustrated volume includes chapters ranging from Labrador to British Columbia some of which focus on such notable British authors as Rupert Brooke and Rudyard Kipling and others on talented American writers such as Charles Dudley Warner Based not only on the views of the landscape but on the racist descriptions of the Indigenous peoples and the romanticization of the Canadian folk Little argues that the national image that emerged was colonialist as well as colonial in nature **Close Encounters of Empire** Gilbert Michael

Joseph, Catherine LeGrand, Ricardo Donato Salvatore, 1998 Essays that suggest new ways of understanding the role that US actors and agencies have played in Latin America publisher *Thinking Like an Iceberg* Olivier Remaud, 2022-06-08 When we imagine the polar regions we see a largely lifeless world covered in snow and ice where icebergs drift listlessly through frozen waters like solitary wanderers of the oceans floating aimlessly in total silence But nothing could be further from the truth This book takes us into the fascinating world of icebergs and glaciers to discover what they are really like Through a series of historical vignettes recalling some of the most tragic and most exhilarating encounters between human beings and these gigantic pieces of matter and through vivid descriptions of their cycles of birth and death Olivier Remaud shows that these entities are teeming with many forms of life and that there is a deep continuity between iceberg life and human life a complex web of reciprocal interconnections that can lead from the deadliest to the most vital And precisely because there is this continuity icebergs and glaciers tell us something important about life itself namely that it thrives in the most unexpected of places even where there seems to be no life at all At a time when we are increasingly aware that the melting of ice sheets glaciers and sea ice is one of the many disastrous consequences of global warming this beautiful meditation is a poignant reminder of the interconnectedness of all life and the fragility of the Earth's ecosystems Ice Karal Ann

Marling,2008 From frozen wastelands to visionary explorers from frosty desserts to shimmering castles cultural historian Karal Ann Marling weaves together fantastic and fascinating topics related to hard cold water *Liquid Crystals* Esther Leslie,2016-11-15 While it is responsible for today s abundance of flat screens on televisions computers and mobile devices most of us have only heard of it in the ubiquitous acronym LCD with little thought as to exactly what it is liquid crystal In this book Esther Leslie enlightens us offering an accessible and fascinating look at not a substance not a technology but a wholly different phase of matter As she explains liquid crystal is a curious material phase that organizes a substance s molecules in a crystalline form yet allows them to move fluidly like water Observed since the nineteenth century this phase has been a deep curiosity to science and in more recent times the key to a new era of media technology In between that time as Leslie shows it has figured in cultural forms from Romantic landscape painting to snow globes from mountaineering to eco disasters and from touchscreen devices to DNA Expertly written but accessible *Liquid Crystals* recounts the unheralded but hugely significant emergence of this unique form of matter **After Icebergs with a Painter** Louis Noble,2018-04-02 *After Icebergs with a Painter* is one of the fine works of Louis Legrand Noble It is the record Of a voyage during the summer of 1859 in company with a distinguished landscape painter along the north eastern coast of British **Church's Great Picture, the Heart of the Andes** Kevin J. Avery,1993 *Indecent Exposures* Sarah Gordon,2015-10-27 Photographer Eadweard Muybridge 1830 1904 often termed the father of the motion picture presented his iconic *Animal Locomotion* series in 1887 Produced under the auspices of the University of Pennsylvania and encompassing thousands of photographs of humans and animals in motion the series included more than 300 plates of nude men and women engaged in activities such as swinging a baseball bat playing leapfrog and performing housework an astonishing fact given the period s standards of propriety In the first sustained examination of these nudes and the remarkable success of their production wide circulation and reception *Indecent Exposures* positions this revolutionary enterprise as central to crucial advancements of the modern era Muybridge s nudes ushered in new attitudes toward science and progress including Darwinian ideas about human evolution and hierarchy quickened debates over the role of photography and scientific investigation in art and offered innovative perspectives on the human body This fascinating story is copiously illustrated and includes many lesser known photographs published here for the first time
