*Free Gold* Arnold David Hoffman, 1982      *Free Gold* Arnold Hoffman, 1947      More Than Free Gold Michael Barnes, 2008      *Free Gold. The Story of Canadian Mining. With Illustrations by Irwin D. Hoffman* Arnold David Hoffman, 1947      Free Gold. The Story of Canadian Mining, Etc. [With a Portrait.]. Arnold Hoffmann, 1947      *J.P. Bickell* Jason Wilson, Kevin Shea, Graham MacLachlan, 2017-09-09 He stayed out of the spotlight but Leafs fans know J P Bickell cast a long shadow A self made mining magnate and the man who kept the Maple Leafs in Toronto and financed Maple Leaf Gardens J P Bickell lived an extraordinary and purposeful life As one of the most important industrialists in Canadian history Bickell left his mark on communities across the nation He was a cornerstone of the Toronto Maple Leafs which awards the J P Bickell Memorial Award to recognize outstanding service to the organization Bickell s story is also tied up with some of the most famous Canadians of his day including Mitchell Hepburn Roy Thomson and Conn Smythe Through his charitable foundation he has been a key benefactor of the Hospital for Sick Children and his legacy continues to transform Toronto Yet though Bickell was so important both to Toronto and the Maple Leafs the story of his incredible life is today largely obscure This book sets the record straight presenting the definitive story of his rise to prominence and his lasting legacy on the ice and off      *Windfall* Tim Falconer, 2025-02-18 The fascinating scandalous and true story of Viola MacMillan and the Windfall mining scandal Viola MacMillan had it all success money and respect Influence even But in 1964 after three decades in the mining industry one of the most fascinating women in Canadian business history was the central character in one of the country s most famous stock scandals MacMillan who started out as a prospector in the 30s had developed lucrative mines and put together big deals But she still wanted a major discovery Early in July 1964 shares in Windfall Oil and Mines a company she and her husband controlled traded for around 56 cents Then one day the stock took off In the absence of any information from the company about what it had found near Timmins on its claims rumors and greed pushed the share price to a high of 5 70 MacMillan stayed quiet Finally after three weeks Windfall admitted it had nothing So many small investors lost money when the stock crashed that the Ontario government appointed a royal commission to examine what had happened which led to changes at the Ontario Securities Commission and the Toronto Stock Exchange Although MacMillan spent a few weeks in prison she later received a pardon and the Order of Canada      **Free Gold, the Story of Canadian Mining, by Arnold Hoffman, with Illustrations by Irwin D. Hoffman** Arnold David Hoffman,      Gold metallogeny and exploration R. P. Foster, 2012-12-06 Within the last decade the high and continuing demand for gold has prompted a global gold rush on a scale never before seen not even in the heady days of Ballarat California and the Yukon Gold is being sought on every continent and with very few exceptions in every country around the world Such interest and fierce competition has demanded considerable innovation and improvement in exploration techniques paralleled by a rapid expansion of the geological database and consequent genetic modelling for the many different types of gold deposits now recognized This

proliferation of data has swamped the literature and left explorationist and academic alike unable to sift more than a small proportion of the accumulating information This new book represents an attempt to address this major problem by providing succinct syntheses of all major aspects of gold metallogeny and exploration ranging from the chemical distribution of gold in the Earth's crust and the hydrothermal chemistry of gold to Archaean and Phanerozoic lode deposits epithermal environments chemical sediments and placer deposits and culminates in chapters devoted to geochemical and geophysical exploration and the economics of gold deposits Each chapter is written by geoscientists who are acknowledged internationally in their respective fields thus guaranteeing a broad yet up to date coverage In addition each chapter is accompanied by reference lists which provide readers with access to the most pertinent and useful publications

**Industry in the Wilderness** Frank Rasky, 1983-01-01 Filled with photographs both historic and contemporary this engaging book looks at the industrial pioneers of northwestern Ontario and the activities which brought them to the wilderness surveying railroading lumber gold bush piloting transportation and hydro power Rasky lets the pioneers tell their own story through their own reminiscences and by the monuments they have left behind Published with the assistance of the Ontario Ministry of Citizenship and Culture and the Ontario Ministry of Northern Affairs

**A Dutch Heritage** Frank Rasky, Joan Magee, 1983-01-01 *Industry in the Wilderness* by Frank Rasky is an account of the overcoming of natural elements in order to harvest the resource wealth of northwestern Ontario It is part of the Dundurn Local History series It is an oral history of lumberjacks gold seekers bush pilots and early hydro men Herein lies the major problem with the book Rasky attempts to cover four important aspects of northwestern Ontario in only 128 pages This impossible task is even further complicated by the fact that more than half of the book is devoted to pictures and diagrams The pictures and diagrams dominate the book to such an extent that one could ignore the text and still find a wealth of information about the topic The diagrams of a paper mill a gold mine and a hydro electric power plant could be a valuable teaching aid to students interested in those areas The pictures are exceptionally good [Umanitoba.ca/cmarchive/vol12no5/industryinthewilderness.html](#)

**Western Mining** Otis E. Young, Jr., Otis Young, Robert Lenon, 1977-06-01 Here for the first time is a clear account in words and pictures of the methods by which gold and silver were extracted and processed in the Old West The author describes the early days of Spanish and Indian mining and the wild era inaugurated by the American prospector who rushed west to get rich quick ending with the year 1893 when repeal of the Sherman Silver Purchase Act virtually closed the mining frontier The account gives in laymen's language the techniques employed in prospecting placer mining and milling particularly those employed by the Spaniards Indians and Cornishmen and shows how the ever practical Americans adapted and improved them Special attention is given to the methods employed in the California and Montana gold fields Colorado and the Comstock Lode the Black Hills and Tombstone Arizona In these pages the reader also meets some of the unforgettable personalities whose lives enriched and sometimes impoverished the mining camps

**The Gold Crusades** Douglas

Fetherling,1997-12-15 Among the hordes of starry eyed argonauts who flocked to the California gold rush of 1849 was an Australian named Edward Hargraves He left America empty handed only to find gold in his own backyard The result was the great Australian rush of the 1850s which also attracted participants from around the world A South African named P J Marais was one of them Marais too returned home in defeat only to set in motion the diamond and gold rushes that transformed southern Africa And so it went Most previous historians of the gold rushes have tended to view them as acts of spontaneous nationalism Each country likes to see its own gold rush as the one that either shaped those that followed or epitomized all the rest In *The Gold Crusades A Social History of Gold Rushes 1849 1929* Douglas Fetherling takes a different approach Fetherling argues that the gold rushes in the United States Canada Australia New Zealand and South Africa shared the same causes and results the same characters and characteristics He posits that they were in fact a single discontinuous event an expression of the British imperial experience and nineteenth century liberalism He does so with dash and style and with a sharp eye for the telling anecdote the out of the way document and the bold connection between seemingly unrelated disciplines Originally published by Macmillan of Canada 1988

**Opportunism and Goodwill** Stefano Tijerina,2021-03-01 Canada's social economic political and environmental impacts on the Western Hemisphere have been largely overlooked by historians and other social scientists Most narratives of the relationships between North America and the emerging markets of the south disproportionately focus on the United States By downplaying Canada's role these narratives have fallen short in reconstructing the history of the region *Opportunism and Goodwill* fills in these historical gaps looking at the dynamics of the relationship between Canada and Colombia as they were spearheaded by Canada's private sector Stefano Tijerina argues that since the first era of globalization during the second half of the nineteenth century Canada's private sector has carved out niche markets across Latin America sometimes working independently and in other instances working on behalf of foreign interests In his historical analysis of these temporal and spatial dimensions Tijerina shows that the long term economic development of Canada and Colombia was intertwined and interdependent ultimately stressing the importance of transnational approaches to the study of history Contributing to questions about Canada's goodwill and other benevolent constructs *Opportunism and Goodwill* sets the historical foundation for current debates about Canadian industries across the world

*Approaches to Canadian Economic History* Easterbrook,Watkins,1967-01-15 Focusing mainly on the staple theory this collection of essays clearly shows the impact the great staple trades from cod and fur to newsprint and oil had upon Canadian history Other significant frames of reference the role of government the development of commercial agriculture the climate of enterprise and capital formation are also represented

*Canadian Mining Taxation* Queen's University (Kingston, Ont.). Centre for Resource Studies,1985 Papers from industry governments labour universities and other agencies on the subject of mining taxation in Canada

*A Dictionary of Mining, Mineral, and Related Terms* United States. Bureau of Mines,1968 Includes about 55 000 individual mining and mineral industry term entries with about 150 000 definitions under

these terms      **The Canadian Mining Journal** Benjamin Taylor A. Bell, Charles A. Bramble, J. C. Murray, 1918

*Formidable Heritage* Jim Mochoruk, 2004-06-03 Canadians have an ambivalent feeling towards the North. Although climate and geography make our northern condition apparent, Canadians often forget about the north and its problems. Nevertheless, for the generation of historians that included Lower Creighton and Morton, the northern rivers, lakes, forests, and plains were often seen as primary characters in the drama of nation building. W. L. Morton even went so far as to write that the main task of Canadian life has been to make something of that formidable heritage of the northern Canadian shield. For many politicians and developers, to make something of the North came to mean thinking of the North as an empty hinterland waiting to be exploited, and today hydroelectric projects, mining, milling, pulp and paper, and other industries have changed much of the North beyond recognition. One of the first parts of the North to be aggressively industrialized was northern Manitoba. When all of Manitoba was given in 1670 to a group of entrepreneurs, a precedent was set that was replicated throughout the province's history. After the province entered confederation in 1870, provincial politicians and business leaders began to look to the northern resources as a new key to the province's economic development. Particularly after 1912, they saw resource development in the North as a strategy to expand the provincial economy from its agricultural base. In *Formidable Heritage*, Jim Mochoruk shows how government and business worked together to transform what had been the exclusive fur trading preserve of the Hudson's Bay Company into an industrial hinterland. He follows the many twisting paths established by developers and politicians as they chased their goal of economic growth and recounts the ultimate costs of development in economic, ecological, and political terms      **Quarterly Bulletin of the Canadian Mining Institute**, 1928
