Free Transport:

Free Public Transit Prince Jason Prince, 2019-10-15 Just like we don't pay to use elevators this book argues that we shouldn't pay to ride public transit In an age of increasing inequalities and ecological crisis movements advocating free public transit push us to rethink the status quo and consider urban transit as a fundamental human right Editors Jason Prince and Judith Dellheim have collected a panorama of case studies from around the world the United States Canada Estonia Greece France Italy Sweden Poland China Australia Brazil Mexico and more These movements are spread across the world and they aim to achieve two main outcomes ecological good and fair wealth distribution Free public transit coupled with increased capacity and improving service of public transit might well be the only viable strategy to eliminating car usage and achieving greenhouse gas targets in industrialized cities within a reasonable timeframe Movements for free mass transit also aim to see public transit treated as a public good like water and garbage service that should be paid for out of general tax revenues or a fairer regional tax strategy This book covers the rapidly changing transport options in cities today including bike and car share options Uber and Lyft and the imminent arrival of driverless vehicles The first English language book ever written on the subject Free Public Transit is a ground breaking book for those concerned about the future of our cities and an essential resource for those who make or try to change urban planning and transport policies **Public Transport**

Deregulation Policy J. Berechman,2013-10-22 Drawing on transit experience from various countries and markets this book examines the economic environment of transit operations the cost and production properties of transit service supply and the policies and prospects of transit regulatory reform The principal objectives of the book are first to conduct theoretical and empirical analyses of the major factors which jointly determine the economic structure and conditions of the transit sector

and second to explore and suggest policies which could resolve the sector's present crisis and make it economically viable. The first objective is explored in Part One where major structural demand factors and regulatory and subsidy conditions are identified and examined. Analytical and empirical measurement of technical production characteristics of transit services supply is carried out in Part Two. Part Three focuses on transit regulatory reform policy issues. The book is aimed primarily at an audience of transportation professionals including economists and planners as well as public policy analysts. It requires in general a sound background in economics mainly microeconomics. Thus graduate students in economics, geography, urban planning and public policy and advanced undergraduates with good training in economics can best benefit from this book.

Inclusive Transport Hans Jeekel, 2018-10-29. *Inclusive Transport: Fighting Involuntary Transport Disadvantages* offers readers profound and multifaceted insights into transportation and social equity, guiding transportation and urban studies researchers, planners and policy makers in evaluating potential solutions to this complex issue. It considers discrimination and its societal consequences, providing a needed perspective on who is left out of transportation planning and why. The book is systematically divided into 2 parts. Part A is problem oriented and explores the main problems to the transportation disadvantaged: accessibility and affordability. It looks at the consequences of non accessibility, the problems non car owners face and the interplay between housing and transportation. Part B is policy oriented and analyses how current policies tend to forget transport disadvantages. It looks at pragmatic solutions for transport disadvantaged and ends with a design for inclusive transport being a more radical approach combining sustainability, challenges people's behaviours and emotions, creating more just and equitable mobility. Synthesizes academic research and narratives on transport disadvantage and the transport disadvantaged, linking the research with current mobility policies and practices. Connects the fight on transport disadvantages with sustainable and smart mobility strategies and looks into car sharing, ride sharing and individualising public transport while de-individualizing car use. Has an extensive usage of data figures and examples from around the world and inspiring mobility plans and policies.

Making Public Transport Work P.M. Bunting, 2004-03-04. People have always traveled but over the last century there has been an unprecedented increase in mobility. Hundreds of millions commute daily between home and work relying more and more on cars and less on urban and intercity public transport. Faced with environmental concerns and the negative cultural and social

effects of urban sprawl governments and other agencies have attempted to reverse the decline in public transport use In Making Public Transportation Work P M Bunting examines why problems have arisen and how they might be corrected Bunting shows that transportation providers have failed to identify target customers and have not organized these services efficiently He demonstrates that public transport providers must address organizational issues and define customer needs and preferences arguing that customer needs can best be served by private rather than public carriers offering door to door rather than station to station transportation In contrast public agencies can best support public transportation by addressing not direct delivery of services but such matters as equitable safety and environmental regulation and effective fair management of roads

starting off and priority seating on buses enough reserved parking spots for people with disabilities housing integrated in the community that accommodates changing needs and abilities as people grow older friendly personalized service and information instead of automated answering services easy to read written information in plain language public and commercial services and stores in neighbourhoods close to where people live rather than concentrated outside the city and a civic culture that respects and includes older persons *International Encyclopedia of Transportation* ,2021-05-13 In an increasingly globalised world despite reductions in costs and time transportation has become even more important as a facilitator of economic and human interaction this is reflected in technical advances in transportation systems increasing interest in how transportation interacts with society and the need to provide novel approaches to understanding its impacts This has become particularly acute with the impact that Covid 19 has had on transportation across the world at local national and international levels Encyclopedia of Transportation Seven Volume Set containing almost 600 articles brings a cross cutting and integrated approach to all aspects of transportation from a variety of interdisciplinary fields including engineering operations research economics geography and sociology in order to understand the changes taking place Emphasising the interaction between these different aspects of research it offers new solutions to modern day problems related to transportation Each of its nine sections is based around familiar themes but brings together the views of experts from different disciplinary perspectives Each section is edited by a subject expert who has commissioned articles from a range of authors representing different disciplines different parts of the world and different social perspectives The nine sections are structured around the following themes Transport Modes Freight Transport and Logistics Transport Safety and Security Transport Economics Traffic Management Transport Modelling and Data Management Transport Policy and Planning Transport Psychology Sustainability and Health Issues in Transportation Some articles provide a technical introduction to a topic whilst others provide a bridge between topics or a more future oriented view of new research areas or challenges The end result is a reference work that offers researchers and practitioners new approaches new ways of thinking and novel solutions to problems All encompassing and expertly authored this outstanding reference work will be essential reading for all students and researchers interested in transportation and its global impact in what is a very uncertain world Provides a forward looking and integrated approach to transportation Updated with future technological impacts such as self driving vehicles cyber physical systems and big data analytics Includes comprehensive coverage Presents a worldwide approach including sets of comparative studies and applications *Transportation* ,1978-05-31 **Very Public Solution** Paul Mees,2015-09-08 Why is public transport so poor in Australian cities Why can't it be more like the fast convenient systems in Europe Unlike Europeans most urban Australians live on far flung suburban blocks rather than in high density apartments Most urban travel is to widespread suburban locations rather than to the city centre It is often argued that fast efficient public transport is impossible in our dispersed cities In A Very Public Solution Paul Mees compares Melbourne's

public transport system with the highly successful system in Toronto a dispersed city very like Melbourne with its suburban sprawl and sheds new light on a century old debate This debate is particularly important now as economic rationalists move to privatise public transport in Australian cities We can have European style public transport Mees argues if our different forms of public transport stop competing with each other and start competing with the car A Very Public Solution is the first serious work on public transport planning ever published in Australia It is essential reading for everyone concerned with urban sustainability and our growing traffic problems [OECD Economic Surveys: Luxembourg 2022](#) OECD,2022-11-17 Luxembourg recovered quickly from the COVID 19 pandemic thanks to extensive policy support However the impact of the war in Ukraine is exacerbating inflationary pressures alongside labour market shortages
