France Romane:

L'art Monumental de la France Romane Eliane Vergnolle, 2000 The most important of Eliane Vergnolle's publications focus on the study of Romanesque art in France. In particular, she has concentrated on the period during which this type of art was born and has investigated the processes which from the beginning of the 11th century onwards led to the renewal of monumental sculpture in several regions. Having investigated previous methods of analysis, she has proposed a new way of looking at the chronological order of the first steps in this period, notably from the example of the exceptional workshop which created the abbey of Saint Benoît-sur-Loire. Her study of the Corinthian capital and its multiple transformations came about from a greater understanding of the notion of the Renaissance of Antiquity which recurs throughout the period. Other studies concentrate on the role of sculptural decoration in the buildings as well as the genesis of certain forms of architectural structure. Much of this research has appeared in the form of monographic studies of important individual monuments. These nineteen studies are principally concerned with the Loire valley, the Berry, the Bourbonnais and Burgundy, and they delineate the artistic landscape of those regions which were among the most precocious and the most inventive in the Capetian kingdom. Routledge Revivals: Medieval France (1995) William W. Kibler, Grover A. Zinn, 2017-07-05 First published in 1995, *Medieval France: An Encyclopedia* is the first single volume reference work on the history and culture of medieval France. It covers the political, intellectual, literary, and musical history of the country from the early fifth to the late fifteenth century. The shorter entries offer succinct summaries of the lives of individuals, events, works, cities, monuments, and other important subjects, followed by essential bibliographies. Longer essay-length articles provide interpretive comments about significant institutions and important periods or events. The encyclopedia is thoroughly cross-referenced and includes a generous selection of illustrations, maps, charts, and genealogies. It is especially strong in its coverage of economic issues, women, music, religion, and literature. This comprehensive work of over 2,400 entries will be of key interest to students and scholars as well as general readers. **Early Gothic Column-Figure Sculpture in France** Janet E. Snyder, 2017-07-05 Richly illustrated, *Early Gothic Column-Figure Sculpture in France* is a comprehensive investigation of church portal sculpture installed between the 1130s and the 1170s. At more than twenty great churches, beginning at the Royal Abbey of Saint Denis and extending around Paris from Provins in the east south to Bourges and Dijon and west to Chartres and Angers, larger-than-life-size statues of human figures were arranged along portal jambs, many carved as if wearing the dress of the highest ranks of French society. This study takes a close look at twelfth-century human figure sculpture, describing represented clothing, defining the language of textiles and dress that would have been legible in the twelfth century, and investigating rationale and significance. The concepts conveyed through these extraordinary visual documents and the possible motivations of the patrons of portal programs with column figures are examined through contemporaneous historical, textual, and visual evidence in various media. Appendices include analysis of sculpture production and the transportation and

fabrication in limestone from Paris Janet Snyder's new study considers how patrons used sculpture to express and shape perceived reality employing images of textiles and clothing that had political economic and social significances Routledge Revivals: Medieval France (1995) William W. From the age of thirty four until her death Marie ruled almost continuously initially for her husband Henry the Liberal during his journey to Jerusalem then for her underage son Henry II and after his majority during his absence on the Third Crusade and extended residence in the Levant Presiding at the High Court of Champagne and attending to the many practical duties of governance Marie acted with the advice of her court officers but without limitation by either the king or a regency council If Henry the Liberal created the county of Champagne as a dynamic and prosperous state it was Marie who expertly preserved and sustained it Evergates mines Marie s letters patent and the literary and religious texts associated with her to glean a fuller picture of her life and work He situates Marie within the regional institutions and external events that influenced her life as well as within her extended families of royal half siblings including King Philip II of France and her Plantagenet brothers and her many in laws including the queen mother Adele and Archbishop William of Reims Those who knew Marie best describe her as determined gracious and pious as well as an effective ruler in the face of several external threats

Carolingian and Romanesque Architecture, 800 to 1200 Kenneth John Conant,1993-01-01 Professor Conant s detailed studies of Santiago de Compostela and of the abbey church at Cluny fit him for this account of building in the period of the round arch which preceeded Gothic In this volume he shows how at the instigation of the monasteries during the little renaissance of Charlemagne Roman methods of construction were revived and fused with local traditions to produce a distinctive Carolingian manner and how such monuments as the Palatine Chapel at Aachen already contained hints of the nobler and more mature Romanesque style which was to become international professor Conant extends his survey to cover the regions of medieval France Spain Portugal the Holy Land Italy Germany Northern Europe and Britain Catalogue Baltimore Peabody inst, libr,1883 Images of Lust James Jerman,Anthony Weir,2013-04-15 Sexually explicit sculptures may be found on a number of medieval churches in France and Spain This fascinating study examines the origins and purposes of these sculptures viewing them not as magical fertility symbols nor even as idols of ancient pre Christian religions but as serious works that dealt with the sexual customs and salvation of medieval folk and thus gave support to the Church s moral teachings *How France Built Her Cathedrals* Elizabeth Boyle O'Reilly,1921 **Provençal Literature & Language Including the Local History of Southern France** New York Public Library,1925 **Romanesque Sculpture** Millard Fillmore Hearn,1985 The Chronology of the Cathedral Churches of France Barr Ferree,1894 **High Romanesque Sculpture in the Duchy of Aquitaine, C. 1090-1140** Anat Tcherikover,1997 This study traces a regional school of Romanesque sculpture that formed against the background of the powerful feudal principality of Aquitaine The school s combination of political prominence economic prosperity and keen response to ecclesiastical reform made it one of the most innovative of its time **The Regional and Transregional in Romanesque Europe** John McNeill,Richard Plant,2021-11-29 The Regional and Transregional in Romanesque Europe considers the historiography and usefulness of regional categories and in so doing explores the strength durability mutability and geographical scope of regional and

transregional phenomena in the Romanesque period This book addresses the complex question of the significance of regions in the creation of Romanesque particularly in relation to transregional and pan European artistic styles and approaches The categorization of Romanesque by region was a cornerstone of 19th and 20th century scholarship albeit one vulnerable to the application of anachronistic concepts of regional identity Individual chapters explore the generation and reception of forms the conditions that give rise to the development of transregional styles and the agencies that cut across territorial boundaries There are studies of regional styles in Aquitaine Castile Sicily Hungary and Scandinavia workshops in Worms and the Welsh Marches the transregional nature of liturgical furnishings the cultural geography of the new monastic orders metalworking in Hildesheim and the valley of the Meuse and the links which connect Piemonte with Conques The Regional and Transregional in Romanesque Europe offers a new vision of regions in the creation of Romanesque relevant to archaeologists art historians and historians alike
