During even the short time that has elapsed since the first edition of this book was published many events have happened which show that Protection is gaining increased support not only on the Continent but in many of our own Colonies In Germany there appears to be every probability that protective duties much more onerous than those now in operation will be imposed and the people of Canada have declared by an overwhelming majority in favour of a protectionist policy A tariff most reactionary in its character has just been submitted to the Canadian Legislature Extremely high protective duties are to be imposed on almost every manufactured article The protectionists of the United States will in all probability demand as a set off to these higher duties the imposition of increased duties on produce imported from Canada and thus a disastrous war of tariffs will be commenced between the two countries About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at [www.forgottenbooks.com](http://www.forgottenbooks.com) This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works      Protection Versus Free Trade Henry Martyn Hoyt,1885      Free Trade and Protection Archibald Alison,1844      **The Limits Of Protectionism** Michael Lusztig,2010-06-15 Conventional wisdom holds that free trade is economically beneficial to nations But this does not prevent industries and interest groups from lobbying their governments for protection which creates a fear of electoral backlash among politicians hoping to promote free trade The Limits of Protectionism demonstrates how governments can attain those economic benefits while avoiding the political costs Michael Lusztig s theoretical model focuses on a process by which protectionists can be pushed to restructure and compete in a global economy In this process a small cutback in domestic protection leads to lost market shares at home producers must then turn to overseas exports and as the size of foreign profits

grow former protectionists become active advocates for more and greater free trade opportunities In a wide ranging array of case studies from nineteenth century Britain to Depression era United States to contemporary New Zealand Australia Brazil Canada Chile and Mexico Lusztig reveals that if skillfully handled governments can eliminate the obstacles to free trade and enjoy continued economic growth without fear of protectionist groups seeking revenge at the ballot box     *Supplementary Catalogue of the Public Library of New South Wales, Sydney for the Years 1888-[1910]* ...
