## **Free Trade In The Bermuda Triangle:**

**Free Trade in the Bermuda Triangle-- and Other Tales of Counterglobalization** Brett Neilson, 2004 An alternative approach to mapping the world offers a new way to contest capitalism and globalization Shangri La the Bermuda Triangle Transylvania the Golden Triangle far flung in popular conception these anomalous places nonetheless occupy the same mysterious zone a mythography of unruly cartographic practices And because this mythography becomes associated with a particular area of the earth's surface it may well suggest an alternative means of mapping the world dissociated from the dominant geographical paradigms of nation state economic region and the global local marketing nexus Large scale nonnational geographical spaces that find their genesis in popular feeling mystery and belief these four sites provide Brett Neilson with the basis not only for rethinking the current global reorganization of space and time but also for questioning the dominant narrative by which globalization marks the victory of capitalism Free Trade in the Bermuda Triangle moves between analysis of popular fantasies and engagement with on the ground realities weaving together topics as diverse as airplane disasters off the U S Atlantic coast the global drug trade vampire culture in postsocialist Europe and the search for utopia in Chinese occupied Tibet The study of globalization is largely a solemn affair occupied with increasing economic polarities environmental degradation and global insecurity Free Trade in the Bermuda Triangle maintains a critical focus on these sobering issues but at the same time asks how popular pleasure and enjoyment can create viable alternatives to the current global order Neilson takes seriously the proposition that capitalism must be contested at its own level of generality finding provisional grounds for resistance in nonlocal transnational spaces that embody quotidian hopes desires and anxieties By studying the real and imagined dimensions of these popular geographies his book seeks resources for social betterment in the fallen mythologies of the contemporary postutopian world

**Think to New Worlds** Joshua Blu Buhs, 2024 This book is about Charles Fort his followers and the surprising influence they have had on science fiction the avant garde UFOlogy and more broadly on the role of spirituality and conspiracy in the modern world Fort was an author and maverick philosopher who wrote four non fiction books about anomalies rains of frogs mysterious disappearances unexplained lights in the sky for which he offered hypotheses that even he did not always accept as true His books developed into a monistic philosophy that denounced science as a machine for generating truth In his view science was a small part of a larger system in which truth and falsity were constantly transforming one into the other This was not a rejection of the modern world but instead its fulfillment Fort prophesied the next stage in intellectual evolution after the scientific era He inspired four overlapping groups members of the Fortean Society science fiction fans and writers avant garde artists and flying saucer enthusiasts First We Must Think to New Worlds takes up each of these groups in turn to ask How can the human imagination be expanded What is the fundamental structure of the universe And how does power move As they developed their responses Fort's followers mixed Forteanism with Fundamentalism New Agery and conspiracy as well as a host of other forms of modern enchantments

such as the ironic imagination scientific wonder and Theosophical syncretism Each chapter is interrupted by and concludes with shorter sections that focus on particular Fortean or Fortean events as a way to deepen themes Genre,2004 *The Routledge Research Companion to Border Studies* Doris Wastl-Walter,2016-04-01 Throughout history the functions and roles of borders have been continuously changing They can only be understood in their context shaped as they are by history politics and power as well as cultural and social issues Borders are therefore complex spatial and social phenomena which are not static or invariable but which are instead highly dynamic This comprehensive volume brings together a multidisciplinary team of leading scholars to provide an authoritative state of the art review of all aspects of borders and border research It is truly global in scope and besides embracing the more traditional strands of the field including geopolitics migration and territorial identities it also takes in recently emerging topics such as the role of borders in a seemingly borderless world creating neighbourhoods and border enforcement in the post 9 11 era The Politics of Culture , EU, Europe Unfinished Zlatan Krajina,Nebojša Blanuša,2016-09-23 What is the meaning of the Balkans in the early 21st century Former Yugoslav countries seek a self flattering alliance with the West via EU membership while the Union s citizens increasingly declare to be Eurosceptic At the same time economic turmoil in countries like Greece confronts massive incoming waves of refugees for whom Europe s south eastern borders are the nearest shelter In this time of crisis the Balkans return on the agenda as a parable of Europe s haunting questions about its future EU Europe Unfinished brings together established and emerging media and cultural scholars to explore colliding visions of space and identity within a declining continent Whereas Europe imagines the Balkans to be the source of its nearest trouble the region envisions Europe as a refuge from ongoing post socialist transition The book adopts a variety of critical perspectives from media and policy analysis to anthropology art history and autobiography to investigate where Europe is headed with the Balkans in its skein 25 years after the fall of the Iron Curtain *Producing and Contesting Urban Marginality* Julie Cupples,Tom Slater,2019-10-25 In Mexico City as in many other large cities worldwide contemporary modes of urban governance have overwhelmingly benefited affluent populations and widened social inequalities Disinvestment from social housing and rent seeking developments by real estate companies and land speculators have resulted in the displacement of low income populations to the urban periphery Public social spaces have been eliminated to make way for luxury apartments and business interests Low income neighbourhoods are often stigmatized by dominant social forces to justify their demolition The urban poor have however negotiated and resisted these developments in a range of ways This text explores these urban dynamics in Mexico City and beyond looking at the material and symbolic mechanisms through which urban marginality is produced and contested It seeks to understand how things might be otherwise how the city might be geared towards more inclusive forms of belonging and citizenship *The Routledge Handbook of Latin American Development* Julie Cupples,Marcela Palomino-Schalscha,Manuel Prieto,2018-12-07 The Routledge Handbook of Latin American Development seeks to engage

with comprehensive contemporary and critical theoretical debates on Latin American development The volume draws on contributions from across the humanities and social sciences and unlike earlier volumes of this kind explicitly highlights the disruptions to the field being brought by a range of anti capitalist decolonial feminist and ontological intellectual contributions The chapters consider in depth the harms and suffering caused by various oppressive forces as well as the creative and often revolutionary ways in which ordinary Latin Americans resist fight back and work to construct development defined broadly as the struggle for a better and more dignified life The book covers many key themes including development policy and practice neoliberalism and its aftermath the role played by social movements in cities and rural areas the politics of water oil and other environmental resources indigenous and Afro descendant rights and the struggles for gender equality With contributions from authors working in Latin America the US and Canada Europe and New Zealand at a range of universities and other organizations the handbook is an invaluable resource for students and teachers in development studies Latin American studies cultural studies human geography anthropology sociology political science and economics as well as for activists and development practitioners

**Stillness in a Mobile World** David Bissell, Gillian Fuller, 2013-01-11

This edited collection of essays on the conceptual political and philosophical importance of stillness is positioned within a world that has increasingly come to be understood through the theoretical and conceptual lens of movement. With contributions from leading scholars in the field, the diversity of this collection illuminates the multiplicity of ontological and epistemological registers through which stillness moves from human geography to media studies, cultural theory to fine arts. With the help of luminaries such as Deleuze, Bergson, Barthes, and Beckett, this book interweaves cutting-edge theoretical insight with empirical illustrations which examine and traverse a multitude of practices, spaces, and events. In an era where stasis, slowness, and passivity are often held to be detrimental, this collection puts forward a new set of political and ethical concerns which help us to come to terms with, understand, and account for mobile life. *Stillness in a Mobile World* is an essential source of reference for both undergraduate and postgraduate students working within disciplines such as cultural studies, sociology, mobility studies, and human geography.

*Provincializing the Bible* Norman Jones, 2018-01-29 Why in our supposedly secular age does the Bible feature prominently in so many influential and innovative works of contemporary U.S. literature? More pointedly, why would a book indelibly allied with a long history of institutionalized oppressions play a supporting role and not simply as an object of critique in a wide variety of landmark literary representations of marginalized subjectivities? The answers to these questions go beyond mere playful re-appropriations or subversive resignifications of biblical themes, figures, and forms. This book shows how certain contemporary authors invoke the Bible in ways that undermine clear distinctions between subversive and traditional, indeed that undermine clear distinctions between secular and sacred. By tracing a key source of such complex literary invocations of the Bible back to William Faulkner's major novels, *Provincializing the Bible* argues that these literary works which might be termed postsecular ironically provincialize the Bible as a means of reevaluating and revalorizing its significance in contemporary American culture.

*Living in a Bubble*, 2007-08 In this issue, the cultural, political, and social costs of an era of debt-backed boom are explored by authors who link the global glut of financial liquidity with the capitalist self-cannibalization that sustains it.

*New Cultural Studies* Clare Birchall, Gary Hall, 2006-01-01 *New Cultural Studies* is both an introductory reference work and an original study which explores new directions and territories for cultural studies. A new generation has begun to emerge from the shadow of the Birmingham School. It is a generation whose whole education has been shaped by theory and who frequently turn to it as a means to think through some of the issues and current problems in contemporary culture and cultural studies. In a period when departments which were once hotbeds of high theory are returning to more sociological and social science-oriented modes of research, and 9/11 and the war in Iraq especially have helped create a sense of post-theoretical political urgency which leaves little time for the elitist Eurocentric textual concerns of Theory, theoretical approaches to the study of culture have for many of this generation never seemed so important or so vital. *New Cultural Studies* explores theory's past, present, and most especially future role in cultural studies. It does so by providing an authoritative and accessible guide for students.

and teachers alike to the most innovative members of this new generation the thinkers and theories currently influencing new work in cultural studies Agamben Badiou Deleuze Derrida Hardt and Negri Kittler Laclau Levinas and iek the new territories currently being mapped out across the intersections of cultural studies and cultural theory anti capitalism ethics the posthumanities post Marxism and the transnational [Empires of Sustainability](#) Joseph Murphy, 2024-06-07 Focussing on the greening of imperialisms and empires Empires of Sustainability analyses the shift around the world from denial of the environmental crisis to action to prevent catastrophe and the resulting implications Evidence of this shift is clear in widespread and purposeful social change which is gathering momentum The book explains how globalisation accelerated us towards the crisis and today even as its own legitimacy is being questioned is evolving through solutions and responses to it Looking ahead and as the environmental crisis worsens two possible futures are discerned and explored One is that through universal actions to save the planet shaped by interweaving political and economic forces the hegemony of globalisation is restored albeit in a green form The other is that the world reorganises into competing spheres of influence with politics economics and the environment interwoven differently in each case In these ways we face the prospect of one or more Empires of Sustainability emerging over the decades ahead unless we build a better alternative society The author presents an alternative a more diverse World of Caring Places This accessible book will appeal to students and scholars of international political economy sustainability and environmental studies and analysts policy makers campaigners and others concerned about the future of relations between people and planet **Canadian Film and Video** Loren R.
