United States Entrepreneurs and the Companies They Built Wahib Nasrallah, 2003-08-30. This pioneering work provides an index to over 1 700 biographies of prominent U.S. entrepreneurs, innovators and company executives published in over 120 biographical collected works which are identified, examined and indexed here. These collected works cover a span of over 100 years and include men and women who shaped the history of American enterprise. In the past, collected works such as these have never been indexed but finally this book makes the biographies accessible to the general public. Wahib Nasrallah has created the only book available today that indexes these stories of corporate success as they are documented in collected works of biography. A large number of executive biographies are published in collected works that are rich with stories of American enterprise, male and female entrepreneurs of many ethnic backgrounds. Since these stories have never been indexed before, *United States Entrepreneurs and the Companies They Built: An Index to Biographies and Collected Works* is a central research tool in both academic and corporate worlds.

Beyond The Amber Waves Of Grain Paul Lasley, 2021-11-28. This book explores the large scale impacts of economic restructuring in the Midwest in response to the 1980s farm crisis. Drawing upon detailed surveys from twelve north central states, the authors offer a comprehensive view of farm restructuring and its social, economic and political consequences. Pincus,Jeffrey A. Winters,2018-08-06 Largely ignored for decades the World Bank increasingly finds itself at the center of an international political maelstrom Attacked by the Right as the last bastion of socialism and by the Left as an instrument of economic imperialism the Bank has struggled to adapt to a changing post Cold War era Still the world s leading development institution in terms of size and influence the International Bank for Reconstruction and Development s failure to articulate and implement a convincing strategy to reduce world poverty has left it vulnerable to the charge that at least in its present form it has outlived its usefulness In a book neither funded nor controlled by its subject leading North American and British

scholars critically examine the World Bank They contend that an institution that has grown to unmanageable proportions through internally driven change cannot realistically be expected to effect its own reform program All the Bank s previous attempts at self redesign have failed and the contributors argue it is beyond reform it must be reinvented Reinvention involves a thoroughgoing and externally controlled process of transformation starting from basic principles and encompassing three closely related dimensions operations or the fit between the Bank s lending program and its development objectives concepts its vision of development and anti poverty strategy and power which includes the Bank s relationships with member countries and the wider public as well as structures of internal governance and accountability

Gender Inequity and Poverty M.L. Narasaiah,2004 Around the world at least one woman in every three has been beaten coerced into sex or otherwise abused in her life time Most often the abuser is a member of her own family Increasingly gender based violence is recognised as a major public health concern and a violation of human rights Contents Sex and Gender Gender based Violence Do Men Matter New Horizons in Gender and Development One Battle after Another For a Fair Sharing of Time Safe Motherhood is a Human Rights Issue Action for Safe Motherhood What is Known About Reducing Maternal Mortality Women in Politics Fighting for Equality on All Fronts Equal Opportunities for Women in the Community Lightening the Load for Women Women and Poverty Women in Authority Promotion of Women Empowerment for Women Population Growth and Women s Role in India No Progress without a Secular Society On the Way to Commercial Microcredits Measuring Population s Impact All Human Rights for All The Coming Water Crisis Using Economics to Advantage Law and Social Justice AIDS and the Responsibility of the Media Pollution for Export Human Rights The Road to Progress and Peace Energy Food for the Billions Food Production Taking Poverty to Heart Land Tenure **Private or Socialistic Forestry?** Matti Palo,Erkki Lehto,2012-02-13 While deforestation continues at an alarming rate around the world discussions on the range of underlying causes continue The premise is that studying successful transitions from deforestation to sustainable forestry ex post in Finland can provide novel insights into how deforestation in the tropics might be reduced in the future Our fundamental question here is why Finland succeeded to stop deforestation for a century ago and why not the same is feasible in the contemporary tropical countries This book presents a novel integrated theory within which this case study on Finland and contemporary modeling of underlying causes of tropical deforestation are developed Finland remains the world s second largest net exporter of forest products while maintaining the highest forest cover in Europe A transition from deforestation to sustainable industrial forestry took place in Finland during the first part of the 20th century The underlying causes of this transition are compared via our theory with deforestation in 74 contemporary tropical countries Both appear similar and support our theory The interaction of public policies and market institutions has appeared to be critical during this transition The study s findings suggest that private forest ownership with a continuous increase in the real

value of forests and alleviation of poverty under non corruptive conditions has been a necessary but not a sufficient condition for this transition In a parallel way public policies have also proved to be a necessary but not sufficient condition in this transition The conclusion is that socialistic forestry along with corruption is artificially maintaining too low values in the tropical forests The opportunity cost of sustainable forestry remains too high and deforestation by extensification of agriculture therefore continues The prevailing socialistic forestry with dominating public forest ownership is by purpose maintaining administratively set low stumpage prices leading to low value of forests wide corruption and continuous forest degradation and deforestation An effective remedy to raise the value of forests is found to be within forestry □□□□□□□□

,1996 **Social Capital Versus Social Theory** Ben Fine,2002-05-03 The idea of Social Capital is an attempt to incorporate social considerations into mainstream economic thinking Its proponents feel that social factors are properly quantifiable So they use the complex algebra and statistics beloved of mainstream economic theory and measure units of health care or education in the same way that they would machinery or transport Ben Fine s main argument in this book is that such concerns cannot be judged in terms of mathematical methods and that to try to do so is overly simplistic Fine assesses the impact of Social Impact across the social sciences and shows how economic analysis is being subsumed into these areas and how thinking in sociology and politics impacts upon economics **Women and the Law** Joan A.
