The Myth of the Free Market Mark Anthony Martinez, 2009 Explains how the 2008 financial meltdown came about and how to revitalize global and domestic economies Shows how capitalist economies developed and why the state matters in their functioning Free market purists claim that the state is an inefficient institution that does little for society beyond providing stability and protection The activities related to distributing resources and economic growth they say are better left to the invisible hand of the marketplace These notions now seem tragically misguided in the wake of the 2008 market collapse and bailout Mark Martinez describes how the flawed myth of the invisible hand distorted our understanding of how modern capitalist markets developed and actually work Martinez draws from history to illustrate that political processes and the state are not only instrumental in making capitalist markets work but that there would be no capitalist markets or wealth creation without state intervention He brings his story up to the present day to show how the seeds of an unprecedented government intervention in the financial markets were sown in past actions The Myth of the Free Market is a fascinating and accessible introduction to comparative economic systems as well as an incisive refutation of the standard mantras of neoclassical free market

Localizing Knowledge in a Globalizing World Ali Mirsepassi, Amrita Basu, Frederick Weaver, 2003-01-01 The essays in this collection address the current crisis in area studies a crisis that differs from its perennial struggle with the established academic disciplines This crisis stems from the confluence of three related circumstances the end of the Cold War greater economic and cultural fluidity across political borders and contradictory intellectual trends in the academy which include on the one hand a renaissance of universalizing thinking in the social sciences and on the other hand the rise of post colonial studies and debates about modernity postmodernity and cultural hybridization Although the essays differ markedly in their focus and strategies the authors all demonstrate that local knowledge including serious study of individual cultures and proficiency in foreign languages which are vital to understanding rapidly changing global patterns and to countering universal claims by the social sciences While the authors also agree that area studies must reject their ethnocentric heritages and adopt inventive new contours they present a diversity
