Economics An Awkward Corner:

Economics Joan Robinson, 2016-11-10 Originally published in 1966 this book has enduring validity In analysing the economic situation of the late 1960s Joan Robinson discusses the contradictions which arise from the need to readjust the organisation of society to the fantastic capacity for producing material wealth that capital accumulation and progress in technology have made possible She maintains that the late twentieth century economic system is just an awkward corner in a continuing process of historical development **Economics** George L. Hicks, 1967 Economic, 1967 Joan Robinson Prue Kerr, Geoffrey Colin Harcourt, 2002 **Joan Robinson: Writings on Economics** J. Robinson, 2001-12-19 Joan Robinson was one of the most prominent economists of the century She made fundamental contributions to many different areas of economic thought She studied economics at Girton College Cambridge graduating in 1925 During the 1930 s she published three books and participated in Keynes Circus Her early contributions to economics were extensions of neo classical theory and in 1933 she introduced the theory of imperfect competition She became an ardent follower of Keynes and produced expositions of his theory She was one of the first economists to take Marx seriously as an economist She became Reader in Economics at Cambridge in 1956 and in the same year she published *The Accumulation of Capital* in which she began to extend Keynes theory in particular to take into consideration long run issues of growth and capital accumulation Her work on growth theory in 1962 alongside Nicholas Kaldor led to them developing the Cambridge Growth Theory She became the first ever female Fellow of Kings College Cambridge in 1979 This collection of her writings is an excellent testament to the depth and breadth of the impact she had on economic theory as a whole **Joan Robinson and the Americans** Marjorie Shepherd Turner, 2017-07-05 Employees with valuable skills and a sense of their own worth can make their jobs pay perks and career opportunities different from those of their coworkers in subtle and not so subtle ways This book shows how such individual arrangements can be made fair and acceptable to coworkers and beneficial to both the employee and the employer *Gaia Connections* Alan S. Miller, 2003 *Gaia Connections* addresses several arenas of concern as humankind faces an escalating ecological and moral crisis in this new millennium Beginning with an overview of the history of philosophy and the importance of traditional thinking on modern day ethical reflection the book then looks at the development of theories of justice the problems of equity in global human relations the inability of existing economic systems to resolve our human and environmental dilemmas the unnatural connections now obtaining between genuine human need and the technological drift of science the new genetics and reproductive technologies and the nature of modern war The study concludes with some historical perspectives on American environmental history and the urgent need for change in our ecoethical social and value systems The principal focal areas of the original edition are continued the actual state of the global environment today the imperative for the development of sustainable economic and resource systems the movement within much of science toward an almost universal biological determinism and the need for a reaffirmation of an ethical value

system which places the needs of people before the needs of property and profits The revised edition not only updates these data and the concerns of the original book but also visits a number of new issues the movement for environmental justice the connections between global poverty and the now almost universal allegiance to a new world market and free trade system the progress and the dilemmas of molecular biology and genetic engineering and the growing disarray within the global systems of political economy The Social Science Imperialists G. C. Harcourt, 2013-11-05 The essays in this volume present a comprehensive view of modern economics They range from technical papers on a specific issue such as that devoted to a critique of Kaldor's model of income distribution through evaluation of a wide ranging literature with special emphasis on the Cambridge controversies in the theory of capital Intellectual portraits of Eric Russell Joan Robinson and Lorie Tarshis are also included The concluding essay The Social Science Imperialists gives an overview of the issues and trends that have dominated economics in recent years Post-Keynesian Essays in Biography G C Harcourt, 2016-07-27 This volume is a collection of intellectual biographies of economists which the author has written over the last 16 years There are four categories accounts of Cambridge greats Joan Robinson Piero Sraffa Nicholas Kaldor Richard Kahn oral histories of Lorie Tarshis George Shackle Kenneth Boulding and Richard Goodwin memoirs of close friends of the author who have died and shorter essays which include John Hicks James Meade Brian Reddaway Arthur Smithies Heinz Arndt and J M Keynes
