Richardson,William Henry Chaloner,1996      **Across the Borders** Günter Dinhl,2017-03-02 Until now we have only had relatively narrow economic studies comparing investments in railways with investments in other fields of individual economies Across the Borders not only opens the door for fundamental new insights into a trans national view of railway history but also contributes to a breakthrough in the wider study of the subject providing the first extensive historical investigation of the worldwide system of railway financing This book provides a wide introduction to how financiers governments and entrepreneurs in Europe managed to face the challenges of constructing and maintaining an integrated railway network both in their own countries and their colonies This volume offers analysis from a selection of experts exploring the trans national investment policies of railway construction based on numerous historical case studies The chapters provide insight into the international opportunities that existed for railway financing from the perspective of economic social transport and railway history With contributions from authors from 19 countries the volume is a truly international work that will be of interest to academic researchers museum staff archivists and anyone who has an interest in the history and development of railways      *The Rise and Fall of Modern Empires, Volume III* Sarah Stockwell,2017-03-02 Few aspects of the history of modern empires are of such significance as their economics and politics These factors are inextricably linked in many analyses have generated extensive historiographical debate and are currently the subject of some of the freshest and liveliest scholarship The articles and chapters which are brought together in this volume relate not only to the European colonial empires but also to the Napoleonic Russian and Japanese empires The collection is strongly comparative in approach with the articles arranged into thematic sections on the place of politics and economics in the rise and fall of modern empires the causal relationship between modern empires and colonial global and metropolitan economic transformations and the technologies of rule which provided the frameworks through which colonial economies were managed and rights defined The collection reflects new approaches as well as the continuing importance of issues addressed in an older historiography and the thematic arrangement produces useful juxtapositions of older and newer literatures The substantial introduction explores the themes and identifies key historiographical trends in relation to each

The Tentacles of Progress Daniel R. Headrick,1988-03-10 This penetrating examination of a paradox of colonial rule shows how the massive transfers of technology including equipment techniques and experts from the European imperial powers to their colonies in Asia and Africa resulted not in industrialization but in underdevelopment Examining the most important technologies shipping and railways telegraphs and wireless urban water supply and sewage disposal economic botany and plantation agriculture irrigation and mining and metallurgy Headrick provides a new perspective on colonial economic history and reopens the debate on the roots of Asian and African underdevelopment      **Imperialism and**

**Economic Development in Sub-Saharan Africa** Simon Mollan, 2020-09-09 This book examines the economic and business history of Sudan placing Sudan into the wider context of the impact of imperialism on economic development in sub Saharan Africa From the 1870s onwards British interest s in Sudan began to intensify a consequence of the opening of the Suez Canal in 1869 and the overseas expansion of British business activities associated with the Scramble for Africa and the renewal of imperial impulses in the second half of the nineteenth century Mollan shows the gradual economic embrace of imperialism in the years before 1899 the impact of imperialism on the economic development of colonial Sudan to 1956 and then the post colonial economic legacy of imperialism into the 1970s This text highlights how state centred economic activity was developed in cooperation with British international business Founded on an economic model that was debt driven capital intensive and cash crop oriented the colonial economy of Sudan was centred on cotton growing This model locked Sudan into a particular developmental path that in turn contributed to the nature and timing of decolonization and the consequent structures of dependency in the post colonial era

**British Foreign Policy since 1870** Will Podmore, 2008-10-13 This book survey Britain s foreign policy since 1870 Conventional accounts stress the rulers benevolent rhetoric I present the evidence that refutes this superficial liberal view Britain s economy is the key to understanding its foreign policy capitalism causes a conflict ridden foreign policy The rulers focus has been on seizing profits from abroad for which they have sacrificed the welfare of the British people British governments Conservative Liberal and Labour alike have represented the tiny minority who own the means of production and have opposed the great majority who have to work for a living The ruling class s external focus has also damaged relations with other countries and helped to produce the two recurring types of war wars between rival empires and wars against national liberation

*Imperialism in the Modern World* William Bowman,Frank Chiteji,J. Megan Greene,2016-11-03 *Imperialism in the Modern World* combines narrative primary and secondary sources and visual documents to examine global relations in the nineteenth and twentieth centuries The three co editors Professors Bowman Chiteji and Greene have taught for many years global history classes in a variety of institutions They wrote *Imperialism in the Modern World* to solve the problem of allowing teachers to combine primary and secondary texts easily and systematically to follow major themes in global history some readers use primary materials exclusively Some focus on secondary arguments This book is more focused than other readers on the markets for those teachers who are offering more specialized world history courses one important trend in global history is away from simply trying to cover everything to teaching real connections in more chronologically and thematically focused courses The reader also provides a genuine diversity of global perspectives and invites students to study seriously world history from a critical framework Too many readers offer a smorgasbord approach to world history that leaves students dazed and confused This reader avoids that approach and will therefore solve many problems that teachers have in constructing and teaching world history courses at the introductory or upper division levels The reader will allow show students how to read historical documents through a hands on demonstration in the introduction The book also incorporates images as visual documents Finally the book conceives of global history in the widest possible terms it contains pieces on political diplomatic economic and military
