Gülçin Beken, 2018 The papers in this volume cover a wide range topics related to theme of the conference titled as Current Debates in Social Sciences and reflect the different perspectives of economics The studies are mainly about economics and econometrics and can be classified under the sections of Political Economy Globalisation International Economics and Foreign Trade and lastly Economic Growth and Development Economics Both empirical and theoretical papers are presented in this volume in order to discuss and analyze current debates on economics We believe that these papers would contribute to the researchers experts and academicians in a way to improve their interests and field of study Handbook of Experimental Economic Methodology Guillaume R. Fréchette, A. Schotter, 2015 The Handbook of Experimental Economic Methodology edited by Guillaume R Fr chette and Andrew Schotter aims to confront and debate the issues faced by the growing field of experimental economics For example as experimental work attempts to test theory it raises questions about the proper relationship between theory and experiments As experimental results are used to inform policy the utility of these results outside the lab is questioned and finally as experimental economics tries to integrate ideas from other disciplines like psychology and neuroscience the question of their proper place in the discipline of economics becomes less clear This book contains papers written by some of the most accomplished scholars working at the intersection of experimental behavioral and theoretical economics talking about methodology It is divided into four sections each of which features a set of papers and a set of comments on those papers. The intention of the volume is to offer a place where ideas about methodology could be discussed and even argued Some of the papers are contentious a healthy sign of a dynamic discipline while others lay out a vision for how the authors think experimental economics should be pursued This exciting and illuminating collection of papers brings light to a topic at the core of experimental economics Researchers from a broad range of fields will benefit from the exploration of these important Catalog of Copyright Entries.
