Economics of Regulation and Antitrust W. Kip Viscusi,Joseph Emmett Harrington,John Mitcham Vernon,2005-08-19 A substantially revised and updated new edition of the leading text on business and government with new material reflecting recent theoretical and methodological advances includes further coverage of the Microsoft antitrust case the deregulation of telecommunications and electric power and new environmental regulations This new edition of the leading text on business and government focuses on the insights economic reasoning can provide in analyzing regulatory and antitrust issues Departing from the traditional emphasis on institutions

Economics of Regulation and Antitrust asks how economic theory and empirical analyses can illuminate the character of market operation and the role for government action and brings new developments in theory and empirical methodology to bear on these questions. The fourth edition has been substantially revised and updated throughout with new material added and extended discussion of many topics. Part I on antitrust has been given a major revision to reflect advances in economic theory and recent antitrust cases including the case against Microsoft and the Supreme Court's Kodak decision. Part II on economic regulation updates its treatment of the restructuring and deregulation of the telecommunications and electric power industries and includes an analysis of what went wrong in the California energy market in 2000 and 2001. Part III on social regulation now includes increased discussion of risk analysis and extensive changes to its discussion of environmental regulation. The many case studies included provide students not only pertinent insights for today but also the economic tools to analyze the implications of regulations and antitrust policies in the future. The book is suitable for use in a wide range of courses in business law and public policy for undergraduates as well as at the graduate level. The structure of the book allows instructors to combine the chapters in various ways according to their needs. Presentation of more advanced material is self-contained. Each chapter concludes with questions and problems.

Privacy, Economics, and Price Discrimination on the Internet Andrew Odlyzko, 2014. The rapid erosion of privacy poses numerous puzzles. Why is it occurring and why do people care about it? This paper proposes an explanation for many of these puzzles in terms of the increasing importance of price discrimination. Privacy appears to be declining largely in order to facilitate differential pricing which offers greater social and economic gains than auctions or shopping agents. The thesis of this paper is that what really motivates commercial organizations even though they often do not realize it clearly themselves is the growing incentive to price discriminate coupled with the increasing ability to price discriminate. It is the same incentive that has led to the airline yield management system with a complex and constantly changing array of prices. It is also the same incentive that led railroads to invent a variety of price and quality differentiation schemes in the 19th century. Privacy intrusions serve to provide the information that allows sellers to determine buyers' willingness to pay. They also allow monitoring of usage to ensure that arbitrage is not used to bypass discriminatory pricing. Economically price discrimination is usually regarded as desirable since it often increases the efficiency of the economy. That is why it is frequently promoted by governments either through explicit mandates or through indirect means. On the other hand price discrimination often arouses strong opposition from the public. There is no easy resolution to the conflict between sellers' incentives to price discriminate and buyers'

resistance to such measures The continuing tension between these two factors will have important consequences for the nature of the economy It will also determine which technologies will be adopted widely Governments will likely play an increasing role in controlling pricing although their roles will continue to be ambiguous Sellers are likely to rely to an even greater extent on techniques such as bundling that will allow them to extract more consumer surplus and also to conceal the extent of price discrimination Micro payments and auctions are likely to play a smaller role than is often expected In general because of the strong conflicting influences privacy is likely to prove an intractable problem that will be prominent on the public agenda for the foreseeable future *The Law and Economics of Price Discrimination in Modern Economies* Daniel J. Gifford, Robert T. Kudrle, 2008 This paper examines the forms goals and results of price discrimination It reviews various economic analyses and critiques of the three Pigovian types of price discrimination It observes that economists traditional concern with aggregate welfare has not until recently been accompanied by a similar concern by lawyers Until the late twentieth century lawyers tended to focus on fairness instead These different concerns have impeded mutual understanding as have the various meanings that lawyers and economists have attributed to such basic terms as monopoly power market power and competition in the price discrimination context The paper examines the principal laws of the United States and the European Union that deal with price discrimination focusing especially on the Robinson Patman Act and Article 82 c of the Treaty Establishing the European Union The paper compares the operation of these two provisions finding superficial resemblances but significant differences in practice While the Robinson Patman Act was designed to prevent powerful buyers from forcing price concessions from often weak producers to the detriment of small buyers enforcement of Article 82 c is directed differently Although the language of Article 82 c suggests that it is designed to protect purchasers for resale from discrimination by their suppliers the European Commission employs Article 82 c to protect competitors from aggressive pricing by dominant generally producer firms The paper also examines the developing law on loyalty rebates on both sides of the Atlantic again finding that the approaches of the two jurisdictions differ significantly at least as exemplified by the most recent cases It distinguishes between loyalty rebates offered by the seller of a single product and those offered by a multi product seller The paper's main message is that price discrimination is an essential element in an effectively competitive economy and should be treated that way under the law

The Economics of Regulation

Alfred E. Kahn,1988-06-22 As Chairman of the Civil Aeronautics Board in the late 1970s Alfred E Kahn presided over the deregulation of the airlines and his book published earlier in that decade presented the first comprehensive integration of the economic theory and institutional practice of economic regulation In his lengthy new introduction to this edition Kahn surveys and analyzes the deregulation revolution that has not only swept the airlines but has transformed American public utilities and private industries generally over the past seventeen years While attitudes toward regulation have changed several times in the intervening years and government regulation has waxed and waned the question of whether to regulate more or to regulate less is a topic of constant debate one that The Economics of Regulation addresses incisively It clearly remains the standard work in the field a starting point and reference tool for anyone working in regulation Kahn points out that while dramatic changes have come about in the structurally competitive industries the airlines trucking stock exchange brokerage services railroads buses cable television oil and natural gas the consensus about the desirability and necessity for regulated monopoly in public utilities has likewise been dissolving under the burdens of inflation fuel crises and the traumatic experience with nuclear plants Kahn reviews and assesses the changes in both areas he is particularly frank in his appraisal of the effect of deregulation on the airlines His conclusion today mirrors that of his original seminal work that different industries need different mixes of institutional arrangements that cannot be decided on the basis of ideology
