Economics For Hotel And Catering Students:

Economics for Hotel and Catering Students Howard L. Hughes, 1986 Economics for Hotel and Catering Students H. L. Hughes, 1986 **Economics for Hotel and Catering Students** Howard L. Hughes, 1990 Educational Innovation in Economics and Business Administration: W. Gijssels, 1995-01-31

During the last few years economics and business education have emerged as one of the largest fields of study in higher education. At the same time the pressing concern for improving the quality of higher education has led to a definite need for more knowledge about effective instruction and innovation in economics and business education. The book brings together many examples of reform in economics and business education. Special attention is paid to the problem-based learning approach which over the past ten years has developed as a very important innovation in higher education. The book contains contributions from a variety of institutions on the necessity of curriculum reform, the choice of instructional methods, assessment and testing, and management of change. It is of interest for teachers in higher education, educational psychologists, and any person interested in educational innovation in economics and business administration.

The Routledge Handbook of Hospitality Studies Conrad Lashley, 2016-11-10

In recent years there has been a growing interest in the study of hospitality as a social phenomenon. This interest has tended to arrive from two communities. The first comprises hospitality academics interested in exploring the wider meanings of hospitality as a way of better understanding guest and host relations and its implications for commercial settings. The second comprises social scientists using hosts and guests as a metaphor for understanding the relationship between host communities and guests as people from outside the community, migrants, asylum seekers, and illegal immigrants. The *Routledge Handbook of Hospitality Studies* encourages both the study of hospitality as a human phenomenon and the study of hospitality as an industrial activity embracing the service of food, drink, and accommodation. Developed from specifically commissioned original contributions from recognised authors in the field, it is the most up-to-date and definitive resource on the subject. The volume is divided into four parts: the first looks at ways of seeing hospitality from an array of social science disciplines; the second highlights the experiences of hospitality from different guest perspectives; the third explores the need to be hospitable through various time periods and social structures and across the globe; while the final section deals with the notions of sustainability and hospitality. This handbook is interdisciplinary in coverage and is also international in scope through authorship and content. The state-of-the-art orientation of the book is achieved through a critical view of current debates and controversies in the field, as well as future research issues and trends. It is designed to be a benchmark for any future assessment of the field and its development. This handbook offers the reader a comprehensive synthesis of this discipline, conveying the latest thinking, issues, and research. It will be an invaluable resource for all those with an interest in hospitality, encouraging dialogue across disciplinary boundaries and areas of study.

Economic Resilience and Pandemic Response Agnieszka Rzepka, Artur Paździor, 2024-08-05

The COVID-19 pandemic upended our social and economic lives. Lockdowns forced firms to implement health and safety protocols, employees to work from home, and businesses of all sorts to close. Even as lockdowns eased, the landscape of work, commerce, leisure, and education was irrevocably transformed. While in many ways life has returned to normal, many of the changes wrought by the pandemic are here to stay. This book presents research on these transformations, examining how the economy and society were impacted. Organizing different aspects of the pandemic into individual chapters, this book examines issues such as financing, structures, liquidity, profitmaking, investment, financial security, and market valuation among other topics. Reflecting deep research as well as an extensive review of the literature, each chapter provides not just theoretical and empirical insight but also a set of policy recommendations to insure against similar crises in the future. Encompassing a range of case studies, it outlines strategies for dealing with the manifold challenges of today's business environment. This book showcases the development of particular sectors over the course of the pandemic and, as such, serves as a valuable study enabling a comprehensive analysis of topics ranging from economics to social dynamics. It provides a deep understanding of this unique period's wide-ranging challenges and transformations and underscores the central economic concern of the pandemic's effect on economic security, a topic discussed throughout several chapters. Furthermore, it includes a discussion on the broader scope of polycrisis. This volume was designed to appeal to a wide range of readers interested in economics, management, regional studies, and related fields.

Working In Hotels and Catering Roy C Wood, 2024-02-02

First Published in 1992, the hotel and catering industry is one of the most

heterogeneous of industries consisting as it does of businesses ranging from the most humble cafe to the largest luxury hotel. Strong images of the glamorous nature of the work are often conjured up by the popular media and sit alongside the lures of an industry in which it is theoretically possible to rise to the top from the very lowest levels. This book provides an insight into the circumstances under which hotel and catering services are provided in reality. It is the first text to provide an overview of existing research in the industry and Wood's account is both wide ranging and accessible. He highlights many previously overlooked aspects of the industry including such characteristics as low wages, high labour turnover, lack of unionisation and heavy handed management which are identified and explored in such a way as to illuminate current practice.
