Economics Of Information And Law:

Economics of Information and Law Ejan Mackaay, 1980 The Law and Economics of Intellectual Property in the Digital Age Niva Elkin-Koren, Eli Salzberger, 2012-11-27 This book explores the economic analysis of intellectual property law with a special emphasis on the Law and Economics of informational goods in light of the past decade's technological revolution. In recent years there has been massive growth in the Law and Economics literature focusing on intellectual property on both normative and positive levels of analysis. The economic approach to intellectual property is often described as a monolithic coherent approach that may differ only as it is applied to a particular case. Yet the growing literature of Law and Economics in intellectual property does not speak in one voice. The economic discourse used in legal scholarship and in policy making encompasses several strands each reflecting a fundamentally different approach to the economics of informational works and each grounded in a different ideology or methodological paradigm. This book delineates the various economic approaches taken and analyzes their tenets. It maps the fundamental concepts and the theoretical foundation of current economic analysis of intellectual property law in order to fully understand the ramifications of using economic analysis of law in policy making. In so doing one begins to appreciate the limitations of the current frameworks in confronting the challenges of the information revolution. The book addresses the fundamental adjustments in the methodology and underlying assumptions that must be employed in order for the economic approach to remain a useful analytical framework for addressing IPR in the information age.

Economics of Information and Law Ejan Mackaay, 2014-09-12 The Laws and Economics of Confucianism Taisu Zhang, 2017-10-12 Zhang argues that property institutions in preindustrial China and England were a cause of China's lagging development in preindustrial times.

The Law and Economics of Enforcing European Consumer Law Franziska Weber, 2016-03-03 In the internet age the need for effective consumer law enforcement has arguably never been greater. This timely book is a comparative law and economic analysis of the changing landscape of EU consumer law enforcement policy. EU member states are moving away from purely public or private law enforcement and now appear to be moving towards a more mixed approach not least due to European legislation. This book reflects on the need for and creation of efficient enforcement designs. It examines the various economic factors according to which the efficiency of different enforcement mechanisms can be assessed. Hypothetical case scenarios within package travel and misleading advertising dealing with substantial individual harm and trifling and widespread harm are used to illustrate various consumer law problems. Design suggestions on how to optimally mix enforcement mechanisms for these case scenarios are developed. The findings are then used as a benchmark to assess real life situations in countries with different enforcement traditions: the Netherlands, Sweden and England. The book is of value to both researchers and policy makers working in the area of consumer protection.

Introduction to the Law and Economics of Environmental Policy T. Swanson, 2002-08-15 Three important issues concerning institutional design are policies, instruments and enforcement. This

volume surveys each of the issues and emphasises the common themes arising in optimal institutional design. It looks at the importance of institutional design in addressing social problems. **Research Handbook on the Economics of Intellectual Property Law** Ben Depoorter, Peter Menell, David Schwartz, 2019. Both law and economics and intellectual property law have expanded dramatically in tandem over recent decades. This field-defining two-volume Handbook featuring the leading legal empirical and law and economics scholars studying intellectual property rights provides wide-ranging and in-depth analysis both of the economic theory underpinning intellectual property law and the use of analytical methods to study it. **The Law and Economics of Privacy, Personal Data, Artificial Intelligence, and Incomplete Monitoring** James Langenfeld, Frank Fagan, Samuel Clark, 2022-03-22. The Law and Economics of Privacy, Personal Data, Artificial Intelligence and Incomplete Monitoring showcases the cutting-edge theoretical and empirical findings for researchers and professionals considering these complex issues intersecting law, technology and economics. **Law and Economics and the Economics of Legal Regulation** J.-M. Graf von der Schulenburg, G. Skogh, 2012-12-06. *Research Handbook on the Economics of Insurance Law* Daniel Schwarcz, Peter Siegelman, 2015-08-28. The fields of insurance law and insurance economics have long and distinguished scholarly histories but participants in the two disciplines have not always communicated well across academic silos. This Handbook encourages more policy-relevant insurance economics. *Research Handbook on the Economics of European Union Law* Thomas Eger, Hans-Bernd Schöfer, 2012-01-01. This comprehensive volume comprises original essays by authors well known for their work on the European Union. Together they provide the reader with an economic analysis of the most important elements of EU law and the mechanisms for decisions within the EU. The Handbook focuses particularly on how the development of EU law negotiates the tension between market integration, national sovereignty and political democracy. The book begins with chapters examining constitutional issues while further chapters address the establishment of a single market. The volume also addresses sovereign debt problems by providing a detailed analysis of the architecture of the EU's monetary institutions, its monetary policy and their implications. The depth and breadth of the Handbook's coverage make it an essential reference for students, scholars and policymakers interested in the complexities of the European Union. *Encyclopedia of Law and Society* David S. Clark, 2007-07-10. Introduction to and survey of the field of law and society. Includes interdisciplinary perspectives on law from sociology, criminology, cultural anthropology, political science, social psychology and economics. **The Economics of Labor Law** Keith N. Hylton, 2024-11-08. In terms familiar to economists, this book provides a positive theory of labor law and dissects the fundamental theoretical issues that shape labor law doctrine. It investigates the deep economic tensions influencing judicial opinions in labor law and how these can predict the outcomes of relevant legal doctrine and determine whether it accomplishes its regulatory goals. **Law and Economics of Regulation** Klaus Mathis, Avishalom Tor, 2021-04-24. This book explores current issues regarding the regulation of various economic sectors theoretically and empirically, discussing both neoclassical and behavioural economics approaches to

regulation Regulation has become one of the main determinants of modern economies and virtually every sector is subject to general laws and regulations as well as specific rules and standards A traditional argument to justify regulatory interventions is the promotion of public interests Fixing markets that lack competition balancing information asymmetries internalising externalities mitigating systemic risks and protecting consumers from irrational behaviour are frequently invoked to complement the invisible hand of the market with the visible hand of the state However regulations can lead to unintended consequences and serve the interests of powerful private interest groups rather than the public interest and social welfare In addition new insights from behavioural economics question the traditional regulatory approaches most prominently in attitudes towards consumers Furthermore digitalisation and technological innovation in general present new challenges in terms of both the type of regulation and the regulatory process Part I of this book discusses various theoretical approaches to the economic analysis of regulations while Part II looks at specific applications of the law and economics of regulation
