## **Economy Of Literature:**

**The Economy of Literature** Marc Shell, 1993-09 Why did coinage, tyranny, and philosophy develop in the same time and place? Marc Shell explores how both money and language give worth by providing a medium of exchange; how the development of money led to a revolution in philosophical thought and language; and how words transform mere commodities into symbols at once aesthetic and practical. Offering carefully documented interpretations of texts from Heraclitus, Herodotus, Sophocles, Plato, Aristotle, Rousseau, and Ruskin, Shell demonstrates the kinship between literary and economic theory and production. It introduces new methods of analyzing texts and shows how literary and philosophical fictions can help us understand the world in which we live.

**The Economy of Literary Form** Lee Erickson, 1996 Erickson analyzes the effects of a changing market on the relative cultural status of literary forms. Topics include the impact of technological changes in printing on English poetry, ideological focus, and the market for the essay and the novel, 1820-1850. Book News Inc., Portland, Oregon. Literary Criticism.

**Money, Language, and Thought** Marc Shell, 1993-09 In *Money, Language, and Thought*, Marc Shell explores the interactions between linguistic and economic production as they inform discourse from Chretien de Troyes to Heidegger. Close readings of works such as the medieval grail legends, *The Merchant of Venice*, Goethe's *Faust*, and Poe's *The Gold Bug* reveal how discourse has responded to the dissociation of symbol from thing characteristic of money and how the development of increasingly symbolic currencies has involved changes in the meaning of meaning. Pursuing his investigations into the modern era, Shell points out significant internalization of economic form in Kant, Hegel, and Heidegger. He demonstrates how literature and philosophy have been driven to account self-critically for a money of the mind that pervades all discourse and concludes the book with a disconcerting thesis about the cultural and political limits of literature and philosophy in the modern world.

**Literature and the Creative Economy** Sarah Brouillette, 2014-04-15 This book contends that mainstream considerations of the economic and social force of culture, including theories of the creative class and of cognitive and immaterial labor, are indebted to historic conceptions of the art of literary authorship. It shows how contemporary literature has been involved in and has responded to creative economy phenomena, including the presentation of artists as models of contentedly flexible and self-managed work, the treatment of training in and exposure to art as a pathway to social inclusion, the use of culture and cultural institutions to increase property values and support for cultural diversity as a means of growing cultural markets. Contemporary writers have tended to explore how their own critical capacities have become compatible with or even essential to a neoliberal economy that has embraced art's autonomous gestures as proof that authentic self-articulation and social engagement can and should occur within capitalism. Taking a sociological approach to literary criticism, Sarah Brouillette interprets major works of contemporary fiction by Monica Ali, Aravind Adiga, Daljit Nagra, and Ian McEwan alongside government policy, social science, and theoretical explorations of creative work and immaterial labor.
