State and Society in the Philippines Patricio N. Abinales, Donna J. Amoroso, 2005-05-05 People in the Philippines routinely vote, run for office, organize social movements and call for good governance by the state. Why then is there a recurring state-society dilemma in the Philippines? One horn of the dilemma is the persistent inability of the state to provide basic services, guarantee peace and order and foster economic development. The other is Filipinos' equally enduring suspicion of a strong state. The idea of a strong Republic evokes President Marcos' martial law regime of the 1970s and 1980s which spawned two armed rebellions, cost thousands of lives in repression and billions of dollars in corruption, set the nation back years in economic development and exacerbated suspicion of the state. This dilemma stimulates thinking about the puzzle of state resilience. How has a weak state maintained the territorial integrity of the Philippines in the postwar period in the face of two major rebellions and an armed separatist movement, corruption, mismanagement, intractable poverty, weak sovereignty and an often chaotic electoral system? Why does the inability to collect taxes, secure citizens' lives and property and maintain economic infrastructure not result in state failure? *State and Society in the Philippines* engages the dilemma of state-society relations through a historical treatment of state formation and the corresponding conflicts and collaborations between state leaders and social forces. It examines the long history of institutional state weakness in the Philippines and the efforts made to overcome the state's structural fragility and strengthen its bond with society. It answers these difficult questions by focusing on how the state has shaped and been shaped by its interaction with social forces, especially in the rituals of popular mobilization that have produced surprising and diverse results.

The Philippine Archipelago Yves Boquet, 2017-04-19 This book presents an updated view of the Philippines focusing on thematic issues rather than a description region by region. Open and Closed Economies Roderick Macdonald, 2021-11-23 This book compares the experiences of the Philippines and Vietnam to gain insight into how openness to trade and financing can increase prosperity. In contrast, theoretical and empirical work in the 20th and early 21st centuries have returned mixed results regarding this assertion. The book also demonstrates the impracticality of any attempt to pursue prosperity in isolation. Chapter 1 discusses recent data and research on international trade and capital mobility. Chapter 2 describes the economy of Vietnam that has grown rapidly since beginning to open in 1994. Chapter 3 relates the stagnation of the Philippines as it remained closed from 1960 to 1994 and examines the recent rapid growth in spite of the continued

relative restrictiveness of Philippine policy Chapter 4 compares the two experiences and then conjectures about the feasibility of a prosperous autarky **A Small Macroeconometric Model of the Philippine Economy**, 2005 **Filipino Peasant Women** Ligaya Lindio-McGovern, 1997-09-29 A Filipina from the peasant class herself the author has unprecedented access to women workers in this militarized society as well as rich insights into the lives of Third World women Her interviews with members of the National Federation of Peasant Women in the Philippines and its local chapter Peasant Women of Mindoro detail women's landlessness poverty and disempowerment **The Anti-Development State** Walden Bello, Marissa de Guzman, Mary Lou Malig, Herbert Docena, 2005 Walden Bello the Philippines leading economist presents an assessment of the failure of the Philippines to address poverty and social inequality **Artificial Intelligence and the Philippine Labor Market** Micholo Cucio, Tristan Hennig, 2025-02-21 This paper combines labor force survey microdata with measures of occupational AI exposure and complementarity to examine the potential impact of recent advancements in AI on the Philippine labor market We find that around one third of workers are highly exposed to AI with around sixty percent of those also rated highly complementary indicating potential productivity gains College educated young urban female and well paid workers in the services sector are most exposed Business process outsourcing BPO is identified as the sector with the highest proportion of jobs at risk of displacement Addressing regulatory gaps infrastructure needs and workforce reskilling is crucial to maximize benefits and mitigate negative impacts
