The Fight to Save the Redwoods Susan R. Schrepfer, 2003-04-01 This is not a simple or ordinary history of a conservation crusade Schrepfer very ably traces the changes in scientific wisdom from nineteenth century romanticism and teleological evolutionism to more current ecological dynamism and the influence of those intellectual developments on political history The subject is important much broader than the title suggests and so is the book American Historical Review

Appetite for Change Warren J. Belasco, 2014-01-21 In this engaging inquiry originally published in 1989 and now fully updated for the twenty first century Warren J Belasco considers the rise of the countercuisine in the 1960s the subsequent success of mainstream businesses in turning granola herbal tea and other revolutionary foodstuffs into profitable products the popularity of vegetarian and vegan diets and the increasing availability of organic foods From reviews of the previous edition Although Red Zinger never became our national drink food and eating changed in America as a result of the social revolution of the 1960s According to Warren Belasco there was political ferment at the dinner table as well as in the streets In this lively and intelligent mixture of narrative history and cultural analysis Belasco argues that middle class America eats differently today than in the 1950 because of the way the counterculture raised the national consciousness about food Joan Jacobs Brumberg The Nation This book documents not only how cultural rebels created a new set of foodways brown rice and all but also how American capitalists commercialized these innovations to their own economic advantage Along the way the author discusses the significant relationship between the rise of a countercuisine and feminism environmentalism organic agriculture health consciousness the popularity of ethnic cuisine radical economic theory granola bars and Natural Lite Beer Never has history been such a good read The Digest A Review for the Interdisciplinary Study of Food Now comes an examination of the sweeping change in American eating habits ushered in by hippiedom in rebellion against middle class America Appetite for Change tells how the food industry co opted the health food craze discussing such hip capitalists as the founder of Celestial Seasonings teas the rise of health food cookbooks how ethnic cuisine came to enjoy new popularity and how watchdog agencies like the FDA served arguably more often as sleeping dogs than as vigilant ones Publishers Weekly A challenging and sparkling book In Belasco s analysis the ideology of an alternative cuisine was the most radical thrust of the entire counterculture and the one carrying the most realistic and urgently necessary blueprint for structural social change Food and Foodways Here is meat or perhaps miso for those who want an overview of the social and economic forces behind the changes in our food supply This is a thought provoking and pioneering examination of recent events that are still very much part of the present Tufts University Diet and Nutrition Letter *Taking Politics Seriously* Michael Williams McCann, 1983 Soil Conservation , 1969-08 The History of the Sierra Club, 1892-1970 Michael P. Cohen, 1988 Founded by conservationist John Muir in 1892 the Sierra Club grew into the nation s largest and most influential grassroots environmental organization It is devoted to the study and protection of earth s scenic and ecological resources *The*

National union catalog, 1968-1972 ,1973 **Nature's Economy** Donald Worster,1994-06-24 Nature s Economy is a wide ranging investigation of ecology s past first published in 1994 It traces the origins of the concept discusses the thinkers who have shaped it and shows how it in turn has shaped the modern perception of our place in nature Our view of the living world is a product of culture and the development of ecology since the eighteenth century has closely reflected society s changing concerns Donald Worster focuses on these dramatic shifts in outlook and on the individuals whose work has expressed and influenced society s point of view The book includes portraits of Linnaeus Gilbert White Darwin Thoreau and such key twentieth century ecologists as Rachel Carson Frederic Clements Aldo Leopold James Lovelock and Eugene Odum

Taking Reform Seriously Michael W. McCann,1986 Examines the evolution character and impact of liberal public interest activists in American politics and their aspiration to alter both the structure and the policy priorities of the modern corporate state Environmental Geomorphology and Landscape Conservation Donald R. Coates,2020-05-17 This book first published in 1973 focuses on non urban terrain and presents a uniquely balanced historical treatment of both the land degradation induced by man and his efforts at conservation preservation and reclamation Western Man and Environmental Ethics Ian G. Barbour,1973 Compilation of readings on attitudes toward ecology and technology that have led to the environmental crisis and on ethics issues involved in improving living conditions on earth includes papers on the relationship of the ecological crisis to Western social and cultural anthropology religious practices and beliefs urbanization urban planning capitalism etc and on pollution control the preservation of natural resources etc Diagrams graphs and references **Tax-funded Politics** James T. Bennett,2017-12-02 The past two decades have seen the growth of well coordinated networks of political activists who have managed to obtain hundreds of millions of taxpayers dollars for political lobbying Although federal regulations prohibit such activities loopholes in the law allow these monies to be masked as private resources State and federal taxpayers monies fund the lobbying efforts of private advocacy groups on both the political left and the right In Tax Funded Politics James Bennett argues that governmental agencies rather than combating theses abuses aid and abet them in order to increase their own size and scope Drawing on a broad range of examples Bennett shows how the ideals of the nation s Founding Fathers have been subverted by molding and manipulating the will of the people through government orchestrated propaganda Government agencies far from being indifferent to self aggrandizement and the consolidation of wealth and power are concerned with their own self interest whether it is enhancing their budget or supporting a particular political agenda Likewise nonprofit entities claim to operate solely in the public interest but also engage in political advocacy and lobbying activities But when charities do the lobbying blatant self interest is wrapped in the halo of the public interest Tax Funded Politics exposes dozens of mutually beneficial arrangements between government and charities involving hundreds of millions of dollars It then explores their implications Groups that receive government funds are loath to criticize failed government programs and are advocates for the expansion of the agencies that provide their

support Even charities learn not to bite the hand that feeds them Although the vast majority of the funds are directed to nonprofit groups on the left of the political spectrum so called conservative organizations have also sought and received taxpayers funds despite promise to get g Ohio Jurisprudence ,1953 New York Jurisprudence ,1973 **The National Union Catalogs, 1963-** ,1964 *Final Report, July 1985* Royal Commission on the Use and Effects of Chemical Agents on Australian Personnel in Vietnam,1985 **National Union Catalog** ,1968 Includes entries for maps and atlases Pollution and Policy James E. Krier,Edmund Ursin,2021-01-08 This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1977 **The Age of Ecology** Joachim Radkau,2014-04-03 This book is the first major study of the history of environmentalism from its origins in romanticism and the nature cults of the late 18th century to the global environmental movements of today Radkau shows that this is not a single story of the steady ascent of environmentalism but rather a multiplicity of stories each with its own dramatic tension between single issue movements and the challenges posed by the interconnection of environmental issues between charismatic leaders and bureaucratic organizations and between grassroot movements and global players While the history can be traced back several centuries environmentalism has flourished since the environmental revolution of 1970 spurred on by the Chernobyl nuclear disaster in 1986 and the growing concern about global warming While environmentalists often opposed the scientific mainstream they were also often led by scientific knowledge Environmentalism is the true Enlightenment of our time so much so that we can call our era the age of ecology This timely and comprehensive global history of environmentalism will be essential reading for anyone concerned with the most pressing global issues of our time Books on Conservation and Environment for Youth Libraries ,1971 **The Shaping of Environmentalism in America** Victor B. Scheffer,2013-01-15 Victor Scheffer writes of a social revolution Environmentalism began as a revelation that the resources supporting life are limited and that men and women can if they act wisely and soon reduce their material demands and their numbers before limits are reached and the richness of human existence is diminished forever The revelation grew into a revolution driven by a morality of life or death for the human race Environmentalism is not a word deeply rooted in the American vernacular It was seldom used before the appearance of Rachel Carson s Silent Spring in 1962 although warnings about the environment had been sounded earlier It has roots in conservation the preservation and careful use of natural resources and in ecology the study of the relationships between these roots It describes areas of major concern to environmentalists in the sixties and seventies ranging from wasted croplands and forests through endangered species to birth control It reports progress on three fronts educational legal and political Richly anecdotal the book is an informal history of a generation of aroused citizens who began to see their outdoor surroundings and indeed all of Planet

Earth in a new light The formative years of the movement 1960 to 1980 are central to the narrative By 1980 environmentalism as a social science a field of political management a philosophy and to many a religion was firmly in place The movement met with notable setbacks during the Reagan years however and Scheffer concludes his narrative with an epilogue highlighting environmental events from 1981 to 1989 Although veterans of the movement will find much in the book familiar territory they will welcome the broad coverage of crises decisions and laws that set the stage for environmental victories As a new generation joins the environmental movement the book will help them understand the moral impetus that gave birth to environmentalism and the public awareness and concern for change that grew with the movement
