Foundations of the Unity of Science ,1969 **The Routledge Handbook of Philosophy of Information** Luciano Floridi, 2016-06-17 Information and communication technology occupies a central place in the modern world with society becoming increasingly dependent on it every day It is therefore unsurprising that it has become a growing subject area in contemporary philosophy which relies heavily on informational concepts The Routledge Handbook of Philosophy of Information is an outstanding reference source to the key topics and debates in this exciting subject and is the first collection of its kind Comprising over thirty chapters by a team of international contributors the Handbook is divided into four parts basic ideas quantitative and formal aspects natural and physical aspects human and semantic aspects Within these sections central issues are examined including probability the logic of information informational metaphysics the philosophy of data and evidence and the epistemic value of information The Routledge Handbook of Philosophy of Information is essential reading for students and researchers in philosophy computer science and communication studies *Matter Matters* Kurt Smith, 2010-04-29 Why is there a material world Why is it fundamentally mathematical *Matter Matters* explores a 17th century answer to these questions as it emerged from the works of Descartes and Leibniz Kurt Smith establishes the claim that mathematics is intelligible if and only if matter exists *Basic Concepts of Measurement* , **Critical Problems in the History of Science** Marshall Clagett, 1959 **Bulletin of the Atomic Scientists** ,1970-12 The Bulletin of the Atomic Scientists is the premier public resource on scientific and technological developments that impact global security Founded by Manhattan Project Scientists the Bulletin's iconic Doomsday Clock stimulates solutions for a safer world *Idealization X: The Richness of Idealization* ,2022-05-20 Contents Preface Introduction Science as a caricature of reality Three methodological revolutions The method of idealization Explanations and applications Truth and idealization A generalization

of idealization References *Research , **The Nature of Scientific Theory*** Lawrence Sklar,2014-06-23 About the Series Contemporary philosophy of science combines a general study from a philosophical perspective of the methods of science with an inquiry again from the philosophical point of view into foundational issues that arise in the various special sciences Methodological philosophy of science has deep connections with issues at the center of pure philosophy It makes use of important results for example in traditional epistemology metaphysics and the philosophy of language It also connects in various ways with other disciplines such as the history and sociology of the sciences with pure logic and with such branches of mathematics as probability theory These volumes are for the most part devoted to readings in the methodological aspects of the philosophy of science One volume however takes up the philosophical issues in the foundations of a particularly important special science that is the issues in the foundations of theories of contemporary physics The methodological volumes cover a number of crucial general problem areas The first volume takes up issues in the nature of scientific explanation and the related issues of the nature of scientific law and of the casual relation among events The second volume explores issues in the nature and structure of scientific theories The third volume collects inquiries into the nature of scientific change as one theory is replaced by another Volume four is devoted to readings concerning the nature of probability and the nature and justification of inductive reasoning in science The following volume continues the exploration of the issue of confirming and rejecting theories with a series of readings devoted to Bayesian methodologies in science and to the exploration of non inductive strategies for rationalizing belief Finally volume six explores three major problem areas in the foundation of physics the nature and rationale for physical theories of space and time the interpretive problems arising out of the quantum theory and some puzzles arising out of statistical mechanical theories of physics The readings are selected and arranged to provide the user with systematic access to the most important contemporary themes in methodological philosophy of science and in philosophy of physics The selections include many recent contributions to the field as well as papers and extracts from books and journals otherwise not easily available **Some Conceptual, Measurement, and Analytical Problems in Life Style Research** Yoram (Jerry) Wind,Paul E. Green,2011-06-30

Knowing Science Alexander Bird,2022 Knowing Science argues for an epistemology of science that gives a central place to the concept of knowledge Alexander Bird argues that science proceeds by inference to the only explanation and rejects general metascientific realism and antirealism **The Quest for a Science of Accounting** Thomas A. Lee,Peter W. Welnizer,2021-03-22 Originally published in 1997 the principal object of the editors in compiling this collection of Robert R Sterling s work was to make more of his publications accessible in a convenient form to the academic and professional accounting communities and to current and future generations of accounting students While it is not a complete portfolio of his published work to date this anthology contains all of Sterling s major articles Through his long term quest for a science of accounting Sterling sought to bring together accounting educators practitioners regulators and researchers in order to

identify credible advancements in accounting knowledge authoritative changes to accounting practice and transforming improvements to accounting education **Concepts in Action** ,2017-11-06 Rather than treating concepts and their application in a static and iconic manner Concepts in Action provides us with examples of the active and creative use of concepts for constructing and generating new knowledge Examples of theoretic constructions and topics discussed refers to the function of theory in main stream sociology concepts enabling us to expand the range of interpretations a critical view and approach to general concepts of culture nature and consumption concepts dealing with organization institutions and actors and examples of travelling concepts such as class gender race and social recognition Concepts in Action follows on the earlier Theory in Action 2016 as part of a three volume project broadening our understanding of the interplay of theory and methods The forthcoming third volume will focus on the strategy of constructing and analyzing the object in social science This volume is highly relevant for researchers and students interested in theoretical construction in the social sciences Contributors are G ran Ahrne Mette Andersson Harriet Bjerrum Nielsen Anne Britt Flemmen Antje Gimmmler Willy Guneriussen Roar Hagen Raimund Hasse H kon Leiulfsrud Willy Martinussen John Scott Peter Sohlberg P l Strandbakken Richard Swedberg and Erik Olin Wright
