concluding with its violent afterlives in South Asia and resurgence in the People's Republic today this is a landmark history of global Maoism The future of Maoism , *The Emergence of Global Maoism* Matthew Galway,2022-03-15 The Emergence of Global Maoism examines the spread of Mao Zedong's writings ideology and institutions when they traveled outside of China Matthew Galway links Chinese Communist Party efforts to globalize Maoism to the dialectical engagement of exported Maoism by Cambodian Maoist intellectuals How do ideas manifest outside of their place of origin Galway analyzes how universal ideological systems became localized both in Mao's indigenization of Marxism Leninism and in the Communist Party of Kampuchea's indigenization of Maoism into its own revolutionary ideology By examining the intellectual journeys of CPK leaders who during their studies in Paris in the 1950s became progressive activist intellectuals and full fledged Communists he shows that they responded to political and socioeconomic crises by speaking back to Maoism adapting it through practice without abandoning its universality Among Mao's greatest achievements the Sinification of Marxism enabled the CCP to canonize Mao's thought and export it to a progressive audience of international intellectuals These intellectuals would come to embrace the ideology as they set a course for social change The Emergence of Global Maoism illuminates the process through which China moved its goal from class revolution to a larger anticolonial project that sought to cast out European and American imperialism from Asia **Postsocialism** C.M. Denton, 2013-12-31 During the Mao era China's museums served an explicit and uniform propaganda function underlining official Party history eulogizing revolutionary heroes and contributing to nation building and socialist construction With the implementation of the post Mao modernization program in the late 1970s and 1980s and the advent of globalization and market reforms in the 1990s China underwent a radical social and economic transformation that has led to a vastly more heterogeneous culture and polity Yet China is dominated by a single Leninist party that continues to rely heavily on its revolutionary heritage to generate political legitimacy With its messages of collectivism self sacrifice and class struggle that heritage is increasingly at odds with Chinese society and with the state's own neoliberal ideology of rapid paced development glorification of the market and entrepreneurship In this

ambiguous political environment museums and their curators must negotiate between revolutionary ideology and new kinds of historical narratives that reflect and highlight a neoliberal present In *Exhibiting the Past* Kirk Denton analyzes types of museums and exhibitionary spaces from revolutionary history museums military museums and memorials to martyrs to museums dedicated to literature ethnic minorities and local history He discusses red tourism a state sponsored program developed in 2003 as a new form of patriotic education designed to make revolutionary history come alive and urban planning exhibition halls which project utopian visions of China's future that are rooted in new conceptions of the past Denton's method is narratological in the sense that he analyzes the stories museums tell about the past and the political and ideological implications of those stories Focusing on official exhibitionary culture rather than alternative or counter memory Denton reinserts the state back into the discussion of postsocialist culture because of its centrality to that culture and to show that state discourse in China is neither monolithic nor unchanging The book considers the variety of ways state museums are responding to the dramatic social technological and cultural changes China has experienced over the past three decades
