The Cambridge Handbook of the Law of Algorithms Woodrow Barfield, 2020-11-05 Algorithms are a fundamental building block of artificial intelligence and increasingly society but our legal institutions have

largely failed to recognize or respond to this reality The Cambridge Handbook of the Law of Algorithms which features contributions from US EU and Asian legal scholars discusses the specific challenges algorithms pose not only to current law but also as algorithms replace people as decision makers to the foundations of society itself The work includes wide coverage of the law as it relates to algorithms with chapters analyzing how human biases have crept into algorithmic decision making about who receives housing or credit the length of sentences for defendants convicted of crimes and many other decisions that impact constitutionally protected groups Other issues covered in the work include the impact of algorithms on the law of free speech intellectual property and commercial and human rights law *Cyber-Humans* Woodrow Barfield,2015-12-17 It is predicted that robots will surpass human intelligence within the next fifty years The ever increasing speed of advances in technology and neuroscience coupled with the creation of super computers and enhanced body parts and artificial limbs is paving the way for a merger of both human and machine Devices which were once worn on the body are now being implanted into the body and as a result a class of true cyborgs who are displaying a range of skills beyond those of normal humans beings are being created There are cyborgs which can see colour by hearing sound others have the ability to detect magnetic fields some are equipped with telephoto lenses to aid their vision or implanted computers to monitor their heart and some use thought to communicate with a computer or to manipulate a robotic arm This is not science fiction these are developments that are really happening now and will continue to develop in the future However a range of legal and policy questions has arisen alongside this rise of artificial intelligence *Cyber Humans* provides a deep and unique perspective on the technological future of humanity and describes how law and policy will be particularly relevant in creating a fair and equal society and protecting the liberties of different life forms which will emerge in the 21st century Dr Woodrow Woody Barfield previously headed up the Sensory Engineering Laboratory holding the position of Industrial and Systems Engineering Professor at the University of Washington His research revolves around the design and use of wearable computers and augmented reality systems and holds both JD and LLM degrees in intellectual property law and policy He has published over 350 articles and major presentations in the areas of computer science engineering and law He currently lives in Chapel Hill NC USA Cybercrime Jack M Balkin,James Grimmelman,Eddan Katz,Nimrod Kozlovski,2007-03-01 The Internet has dramatically altered the landscape of crime and national security creating new threats such as identity theft computer viruses and cyberattacks Moreover because cybercrimes are often not limited to a single site or nation crime scenes themselves have changed Consequently law enforcement must confront these new dangers and embrace novel methods of prevention as well as produce new tools for digital surveillance which can jeopardize privacy and civil liberties Cybercrime brings together leading experts in law criminal justice and security studies to describe crime prevention and security protection in the electronic age Ranging from new government requirements that facilitate spying to new methods of digital proof the book is essential to understand how criminal law and even crime itself have been transformed in our networked
