Geotechnics in the African Environment, volume 1 Geoffrey E. Blight, 2022-05-12 Proceedings of the 10th Regional Conference for Africa on Soil Mechanics and Foundation Engineering and the 3rd International Conference on Tropical and Residual Soils held in Maseru Lesotho September 1991 are contained in two volumes The papers address geotechnical problems peculiar to Africa and engineering solutions for local problems as well as data on the properties of African soils

Handbook of Tropical Residual Soils Engineering Bujang B.K. Huat, David G. Toll, Arun Prasad, 2012-05-24 Residual soils are found in many parts of the world Like other soils they are used extensively in construction either to build upon or as construction material They are formed when the rate of rock weathering is more rapid than transportation of the weathered particles by e.g. water gravity and wind which results in a large share of the soils formed remaining in place The soils typically retain many of the characteristics of the parent rock In a tropical region residual soil layers can be very thick sometimes extending to hundreds of meters before reaching unweathered rock Unlike the more familiar transported sediment soil the engineering properties and behaviour of tropical residual soils may vary widely from place to place depending upon the rock of origin and the local climate during their formation and hence are more difficult to predict and model mathematically Despite their abundance and significance our knowledge and understanding of these soils is not as extensive as that of transported sediment soil Written by residual soil specialists from various parts of the world this unique handbook presents data knowledge and expertise on the subject It provides insight into the engineering behaviour of tropical residual soils which will be applicable to small or extensive construction works worldwide on such soils This book covers almost all aspects of residual soils from genesis classification formation sampling and testing to behaviour of weakly bonded and unsaturated soil volume change and shear strength It features chapters on applications in slopes and foundation as well as dedicated parts on residual soils in India Hong Kong and Southeast Asia A large number of graphs tables maps and references throughout the text provide further detail and insight This volume is intended as a reference guide for practitioners researchers and advanced students in civil construction and geological engineering Unique in its coverage of the subject it may serve as a standard that benefits every engineer involved in geological foundation and construction work in tropical residual soils

Bibliography and Subject Index of South African Geology, 1996 *Environmental Geotechnics* R. W. Sarsby, 2000 Increasing environmental awareness has emphasized the many engineering situations in which there are potential environmental impacts This text provides a guide for engineers who are likely to be involved in such situations

The Quarterly Journal of Engineering Geology, 1997 **Physical Modelling in Geotechnics, Volume 2** Andrew McNamara, Sam Divall, Richard Goodey, Neil Taylor, Sarah Stallebrass, Jignasha Panchal, 2018-07-11 Physical Modelling in Geotechnics collects more than 1500 pages of peer reviewed papers written by researchers from over 30 countries and presented at the 9th International Conference on Physical Modelling in Geotechnics 2018 City University of London UK 17 20

July 2018 The ICPMG series has grown such that two volumes of proceedings were required to publish all contributions. The books represent a substantial body of work in four years. *Physical Modelling in Geotechnics* contains 230 papers including eight keynote and themed lectures representing the state of the art in physical modelling research in aspects as diverse as fundamental modelling including sensors imaging modelling techniques and scaling onshore and offshore foundations dams and embankments retaining walls and deep excavations ground improvement and environmental engineering tunnels and geohazards including significant contributions in the area of seismic engineering. ISSMGE TC104 have identified areas for special attention including education in physical modelling and the promotion of physical modelling to industry. With this in mind there is a special themed paper on education focusing on both undergraduate and postgraduate teaching as well as practicing geotechnical engineers. Physical modelling has entered a new era with the advent of exciting work on real time interfaces between physical and numerical modelling and the growth of facilities and expertise that enable development of so called megafuges of 1000gtonne capacity or more capable of modelling the largest and most complex of geotechnical challenges. *Physical Modelling in Geotechnics* will be of interest to professionals engineers and academics interested or involved in geotechnics geotechnical engineering and related areas. The 9th International Conference on Physical Modelling in Geotechnics was organised by the Multi Scale Geotechnical Engineering Research Centre at City University of London under the auspices of Technical Committee 104 of the International Society for Soil Mechanics and Geotechnical Engineering. ISSMGE City University of London are pleased to host the prestigious international conference for the first time having initiated and hosted the first regional conference Eurofuge ten years ago in 2008. Quadrennial regional conferences in both Europe and Asia are now well established events giving doctoral researchers in particular the opportunity to attend an international conference in this rapidly evolving specialist area. This is volume 2 of a 2 volume set *Geotechnics for Developing Africa* G.E. Blight, A.B. Fourie, G.R. Wardle, 2021-06-30. The proceedings represent a valuable reference on geotechnical problems peculiar to Africa and for engineering solutions to local problems. Topics covered are Foundation engineering and lateral support Methods of design and analysis Monitoring laboratory and field testing Municipal industrial and mining waste and environmental geotechnics Soil improvement Transportation geotechnics Case studies. The proceedings are also an invaluable source of data on the properties of African soils the properties of residual and tropical soils as well as climate related problems.
