Germany Beyond The Stable State:

Germany Herbert Kitschelt, Wolfgang Streeck, 2003 **Germany** Herbert Kitschelt, Wolfgang Streeck, 2004 This text offers an interpretation of recent German economic performance asking why the relationship between organized labour and employers on which the German capitalist system depends has begun to break down *Germany* Herbert Kitschelt, Wolfgang Streeck, 2004-01-31 From the 1960s to the 1980s observers gave the name Model Germany to the Federal Republic They saw in Germany a political economic model that was able to weather many economic challenges Model Germany permitted political competition while coordinating public policy among interest associations and private businesses so that changes would only take place only in a balanced and positive way Since the early 1990s this German Model has faced serious troubles Authors in this book describe its disintegration in the past decade and probe into the causes of this Articles argue that it is Germany's national and European integration that has triggered the model's unravelling These processes are paralleled by tendencies in public opinion social life styles and political mobilization in parties interest groups and social movements The strains of model Germany show up in the transformation of industrial relations corporate governance structures and social and immigration policies in Germany *The Returns to Power* Thomas F. Remington, 2023-05-16 An unconventional perspective on contemporary economic inequality in America and its dangers for democracy using comparisons with Russia China and Germany Since the economic liberalization wave that began in the late 1970s inequality around the world has skyrocketed In *The Returns to Power* Thomas F Remington examines the rise of extreme economic inequality in the United States since the late 1970s by drawing comparisons to the effects of market reforms in transition countries such as Russia China and Germany Employing an unconventional comparative framework he brings together the latest scholarship in economics and political science and draws on Russian Chinese and German language sources As he shows the US embraced deregulation and market based solutions around the same time that China and Russia implemented major privatization and liberalization reforms The long term result was increasing inequality in all three nations To illustrate why Remington contrasts the effects of these policies with the postwar economic recovery program in Germany which succeeded in protecting market competition within the framework of a social market economy that provides widely shared prosperity high growth and robust democracy The book concludes with an analysis of the political dangers posed by high inequality and calls for a new public philosophy of liberal capitalism and liberal democracy that would restore political equality and inclusive growth by strengthening political and market competition expanding the provision of public goods and broadening social insurance protection An ambitious account of why political and economic inequality has increased so much in recent times *The Returns to Power*'s emphasis on policy variation across democracies also reminds us that it did not have to turn out this way **Special Issue on Germany**, 2003 **Germany and the Common Foreign and Security Policy of the European Union** A. Miskimmon, 2007-09-20 This study assesses the

influence of German policy makers on EU policy and the impact of EU membership on foreign policy making at the national level The book concludes that limitations remain on the Europeanization of German foreign and security policy and Germany's ability to play a leading role in military crisis management

Entrepreneurial States Yves Tiberghien, 2018-07-05 In *Entrepreneurial States* an innovative examination of the comparative politics of reform in stakeholder systems Yves Tiberghien analyzes the modern partnership between the state and global capital in attaining structural domestic change The emergence of a powerful global equity market has altered incentives for the state and presented political leaders with a golden bargain the infusion of abundant and cheap capital into domestic stock markets in exchange for reform of corporate governance and other regulatory changes Drawing on extensive archival research and interviews with policy and corporate elites in Europe and East Asia Tiberghien asks why states such as Korea and France have embraced this opportunity and engaged in far reaching reforms to make their companies more attractive to foreign capital whereas Japan and Germany have moved forward much more grudgingly Interest groups and electoral institutions have their impacts but by tracing the unfolding dynamic of reform under different constraints Tiberghien shows that the role of political entrepreneurs is critical Such policy elites act as mediators between global forces and national constraints As risk takers and bargain builders Tiberghien finds they use corporate reform to reshape their political parties and to stake out new policy ground The degree of political autonomy available to them and the domestic organization of bureaucratic responsibility determine their ability to succeed

Parties, Elections, and Policy Reforms in Western Europe Kerstin Hamann, John Kelly, 2010-08-30 This book provides a comparative assessment of social pacts between governments labor unions and employer organizations in Western Europe Using a dataset covering 16 European countries as well as eight in depth country case studies the authors argue that governments choice of social pacts or legislation is less influenced by economic problems but is strongly influenced by electoral competition

European Politics Klaus H Goetz, Peter Mair, Gordon Smith, 2013-09-13 This book arises out of a specially commissioned issue of *West European Politics* marking the journal's 30th anniversary It examines the profound changes in the European political landscape over the last three decades including the fall of Communism progressive European integration territorial restructuring public sector reforms at European national regional and local levels changes in democratic participation protest elections political communication political parties and party competition and challenges to the welfare state The book also discusses how political science has responded to these changes in terms of its substantive focus concepts methods and theories Many of the 17 contributions included identify important challenges for the future including those stemming from EU integration the reduced electoral accountability of politicians the problematic legitimization of party government and the sharpening of the edges of the state Contributors include K A Anderson F C Castles C Crouch M Egeberg M Ferrera H Goetz L Hooghe E M Immergut R F Inglehart M Keating H D Klingemann H Kriesi M Lodge J Lovenduski P Mair G Marks Y M ny L Morlino H Obinger V A Schmidt P C Schmitter and G Smith This book was published as

The science is clear climate change is a fact and the probability is extremely high that it has been caused by humans At the same time policy responses are hesitant rather lukewarm and differ substantially between nation states The question is what drives and what blocks radical action This book makes the case that institutional settings path dependence and emerging change coalitions are critical in explaining climate policies across the global political economy Technological and social political innovations are key drivers for dealing with climate change This class of innovation is very much guided or suppressed by a national economy's established institutional settings By anchoring national case studies in a version of the well established varieties of capitalism approach the chapters of this book show why some economies are policy leaders and others become policy followers or even policy interlockers Moreover the case studies demonstrate the extent to which external events and institutional constraints from the international polity influence national innovation strategies Taking a unique analytical approach which combines insights from innovation policies and a variety of capitalism literature the authors provide genuine comprehension of the interplay between institutional settings political actors and climate policies National Pathways to Low Carbon Emission Economies offers a valuable examination of these issues on climate change that will be of interest to academics and postgraduates researching climate policy economic policy and social movements Furthermore it is relevant for policy analysts and policy makers who are interested in learning from climate policies in the context of innovation strategies for a range of countries **Trajectories of Neoliberal Transformation** Lucio

Baccaro, Chris Howell, 2017-10-12 This book has both empirical and theoretical goals The primary empirical goal is to examine the evolution of industrial relations in Western Europe from the end of the 1970s up to the present Its purpose is to evaluate the extent to which liberalization has taken hold of European industrial relations and institutions through five detailed chapter length studies each focusing on a different country and including quantitative analysis The book offers a comprehensive description and analysis of what has happened to the institutions that regulate the labor market as well as the relations between employers unions and states in Western Europe since the collapse of the long postwar boom The primary theoretical goal of this book is to provide a critical examination of some of the central claims of comparative political economy particularly those involving the role and resilience of national institutions in regulating and managing capitalist political economies **Poor Leadership and Bad Governance** Ludger Helms, 2012-01-01 Leaders are not always heroes

Bad public leadership is a big problem If we are serious about holding our public leaders to account then we need to know why they were bad and why we supported them Ludger Helms and his distinguished team tackle these difficult questions with sympathy not cynicism Their careful and insightful analysis alerts us to the dangers of venal and poorly performing leaders R A W Rhodes University of Southampton UK Leadership and the lack of it is a central but underexplored issue in the study of contemporary politics Ludger Helms is to be congratulated for bringing together a group of leading scholars to

examine the relationship between leadership and governance William E Paterson OBE Aston Centre for Europe UK In leadership research there is a long tradition of focusing attention on the great and successful leaders and more recently on issues of good governance This study breaks new ground by looking systematically into the manifestations and causes of poor leadership and bad governance in some of the world s most powerful democracies Focusing on the presidents and prime ministers of the G8 the United States Canada the United Kingdom France Germany Italy Russia and Japan it explores the complex relationship between weak and ineffective leadership undemocratic leadership techniques and bad policies from a broad comparative perspective What makes leaders weak or bad in different contexts What are the consequences of their actions and behaviour And has there been any learning from negative experience These questions are at the centre of this fascinating joint inquiry that involves a team of truly distinguished leadership scholars This book will prove invaluable for scholars and students of leadership political science contemporary history and related academic disciplines Readers with a general interest in public affairs and political history will also find plenty to interest them

The European Union in Crisis Desmond Dinan, Neill Nugent, William E. Paterson, 2017-09-09 The European Union EU is in crisis The crisis extends beyond Brexit the fluctuating fortunes of the eurozone and the challenge of mass migration It cuts to the core of the EU itself Trust is eroding power is shifting politics are toxic disillusionment is widespread and solidarity has frayed In this major new text leading academics come together to unpack all dimensions of the EU in crisis and to analyse its implications for the EU its member states and the ongoing study of European integration

Developments in German Politics 3 Stephen Padgett, Gordon Smith, William E. Paterson, 1992 Once the miracle economy of the continent Germany now staggers under the massive cost burden of unification while it struggles to come to terms with global economic change Failure to confront the underlying economic weakness has discredited political institutions and patterns of political behavior that were once regarded as the efficient secret of economic success The country stands at the crossroads between economic reform and a spiral of economic decline with unpredictable fallout Bringing together entirely new chapters by leading authorities in the field **Developments in German Politics 3** examines the unfolding crisis of German political economy its repercussions for polity politics and policy and the consequences for Germany s role in Europe and the wider world Like its predecessors this book will be of interest to all concerned with European politics and will be necessary reading for students of German politics and society Contributors David P Conradt Russell J Dalton Kenneth Dyson Klaus H Goetz Simon Green Adrian Hyde Price Charlie Jeffery Stephen Padgett William E Paterson Wolfgang R dig Martin Seeleib Kaiser Gordon Smith Roland Sturm

Capitalisms and

Capitalism in the Twenty-First Century Glenn Morgan, Richard Whitley, 2012-04-26 The early twenty first century is witnessing both an increasing internationalization of many markets firms and regulatory institutions and a reinforcement of the key role of nation states in managing economic development financial crises and market upheavals in many OECD and developing economies Drawing on a variety of interdisciplinary perspectives from leading US and European scholars this book analyses how capitalism and national capitalisms are changing in this context It focuses on the economic rise of new countries such as the BRICs the increasing influence of regional organizations such as the EU and NAFTA and new forms of private and public international regulation It also considers how states are adapting their economic policies and processes in this new environment and the consequences of these adaptations for inequality and risk within different societies These changes are linked to how firms are developing new strategies for organizing global value chains and the application of scientific knowledge to the commercialization of products in contexts where financial markets are becoming more uncertain and crisis prone and where different groups are making new demands for more effective forms of corporate governance and corporate social responsibility Drawing on examples from Europe North and Latin America and Asia it illustrates the complex ways in which different forms of national capitalism are adapting and changing their institutions in response to international financial markets the global financial crisis the development of cross border value chains and expansion of multinational firms

The Political Geography of Inequality Pablo Beramendi, 2012-03-26 This book addresses two questions why some political systems have more centralized systems of interpersonal redistribution than others and why some political unions make larger efforts to equalize resources among their constituent units than others This book presents a new theory of the origin of fiscal structures in systems with several levels of government The argument points to two major factors to account for the variation in redistribution the interplay between economic geography and political representation on the one hand and the scope of interregional economic externalities on the other To test the empirical implications derived from the argument the book relies on in depth studies of the choice of fiscal structures in unions as diverse as the European Union Canada and the United States in the aftermath of the Great Depression Germany before and after Reunification and Spain after the transition to democracy
