Integrated Circuit Metrology, Inspection, and Process Control, 1994 Integrated Circuit Metrology, Inspection, and Process Control V William H. Arnold, 1991 **Integrated Circuit Metrology, Inspection, and Process Control VI** Michael T. Postek, 1992 **Metrology, Inspection, and Process Control for Microlithography**, 1999 Handbook of Critical Dimension Metrology and Process Control Kevin M. Monahan, 1994 Proceedings of SPIE present the original research papers presented at SPIE conferences and other high quality conferences in the broad ranging fields of optics and photonics These books provide prompt access to the latest innovations in research and technology in their respective fields Proceedings of SPIE are among the most cited references in patent literature *Progress in Optics*, 2012-12-31 In the 50 years since the first volume of Progress in Optics was published optics has become one of the most dynamic fields of science The volumes in this series that have appeared up to now contain more than 300 review articles by distinguished research workers which have become permanent records for many important developments helping optical scientists and optical engineers stay abreast of their fields Comprehensive in depth reviews Edited by the leading authority in the field

Handbook of VLSI Microlithography John N. Helbert, 2001-04-01 This handbook gives readers a close look at the entire technology of printing very high resolution and high density integrated circuit IC patterns into thin resist process transfer coatings including optical lithography electron beam ion beam and x ray lithography The book's main theme is the special printing process needed to achieve volume high density IC chip production especially in the Dynamic Random Access Memory DRAM industry The book leads off with a comparison of various lithography methods covering the three major patterning parameters of line space resolution line edge and pattern feature dimension control The book's explanation of resist and resist process equipment technology may well be the first practical description of the relationship between the resist process and equipment parameters The basics of resist technology are completely covered including an entire chapter on resist process defectivity and the potential yield limiting effect on device production Each alternative lithographic technique and testing method is considered and evaluated basic metrology including optical scanning electron microscope SEM techniques and electrical test devices along with explanations of actual printing tools and their design construction and performance The editor devotes an entire chapter to today's sophisticated complex electron beam printers and to the emerging x ray printing technology now used in high density CMOS devices Energetic ion particle printing is a controllable steerable technology that does not rely on resist and occupies a final section of the handbook **Proceedings of the**

Symposium on Diagnostic Techniques for Semiconductor Materials and Devices Dieter K. Schroder, Janet L. Benton, P. Rai-Choudhury, 1994 Handbook of Holographic Interferometry Thomas Kreis, 2006-04-20 The book presents the principles and methods of holographic interferometry a coherent optical measurement technique for deformation and stress analysis for the determination of refractive index distributions or applied to non destructive testing Emphasis of the book is

on the quantitative computer aided evaluation of the holographic interferograms Based upon wave optics the evaluation methods their implementation in computer algorithms and their applications in engineering are described Handbook of Silicon Semiconductor Metrology Alain C. Diebold, 2001-06-29 Containing more than 300 equations and nearly 500 drawings photographs and micrographs this reference surveys key areas such as optical measurements and in line calibration methods It describes cleanroom based measurement technology used during the manufacture of silicon integrated circuits and covers model based critical dimension overlay *Pattern Recognition and Machine Intelligence* Sanghamitra Bandyopadhyay, 2005-12-09 This book constitutes the refereed proceedings of the First International Conference on Pattern Recognition and Machine Intelligence PReMI 2005 held in Kolkata India in December 2005 The 108 revised papers presented together with 6 keynote talks and 14 invited papers were carefully reviewed and selected from 250 submissions The papers are organized in topical sections on clustering feature selection and learning classification neural networks and applications fuzzy logic and applications optimization and representation image processing and analysis video processing and computer vision image retrieval and data mining bioinformatics application Web intelligence and genetic algorithms as well as rough sets case based reasoning and knowledge discovery International Conference on the Application and Theory of Periodic Structures Jeremy M.
