Disabilities Pia Matthews, 2022-10-13 Many people think that profound disability presents us with a real problem often because it seems difficult to connect with someone who does not seem to think or act like us Positioning profound disability in this way immediately sets up a them and us where the person with profound disability becomes the problematic other Attempts to bridge the them and us risk reducing everyone to the same where disability is not taken seriously In contrast to a

them and us and negative connotations of the other found in the existentialist philosophies of writers like Sartre and Beauvoir Pia Matthews argues for a return to a positive view of the other One positive approach to the other based on an ethics of relationship as championed by Levinas seems to mitigate the otherness of profound disability However this still makes the person with profound disability dependent on the ethical concern of the more powerful other Instead this book argues for return to a personalist philosophy of being offered by Mounier Marcel and Wojtya and deepened by participation belonging and the possibility of contributing to the good of all This deepened philosophy of being gives a more solid foundation for people who are especially at the mercy of others It will be of interest to all scholars and students of disability studies philosophy and anthropology
