Intellectuals and the State in Twentieth-Century Mexico Roderic Ai Camp, 2014-04-15 In developing countries, the extent to which intellectuals disengage themselves in state activities has widespread consequences for the social, political, and economic development of those societies. Camp has used original sources including extensive interviews to provide new data about the evolution of leading Mexican intellectuals and their relationship to politics and politicians since 1920.

The Role of Intellectuals in Contemporary Society Rajendra Pandey, 1990

Digital Bridges: Developing Countries in the Knowledge Economy Afele, John, 2002-07-01 Globalization and global equity are built on the premise of peace. The causes of many divisions and tensions in human communities lie in the imagined or real gain of

financial or material assets of some elements of the community to be at the expense of others The global community however lacks clear definitions and methods of stability whether political economic or social Digital Bridges Developing Countries in the Knowledge Economy provides insight into the methods and theories behind the globalization of information technologies

Nationalist Myths and Ethnic Identities Natividad Gutierrez, 2015-11 This timely study examines the processes by which modern states are created within multiethnic societies How are national identities forged from countries made up of peoples with different and often conflicting cultures languages and histories How successful is this process What is lost and gained from the emergence of national identities Natividad Gutierrez examines the development of the modern Mexican state to address these difficult questions She describes how Mexican national identity has been and is being created and evaluates the effectiveness of that process of state building Her investigation is distinguished by a critical consideration of cross cultural theories of nationalism and the illuminating use of a broad range of data from Mexican culture and history including interviews with contemporary indigenous intellectuals and students an analysis of public school textbooks and information gathered from indigenous organizations Gutierrez argues that the modern Mexican state is buttressed by pervasive nationalist myths of foundation descent and heroism These myths expressed and reinforced through the manipulation of symbols public education and political discourse downplay separate ethnic identities and work together to articulate an overriding nationalist ideology The ideology girding the Mexican state has not been entirely successful however This study reveals that indigenous intellectuals and students are troubled by the relationship between their nationalist and ethnic identities and are increasingly questioning official policies of integration

Postcolonial Intellectuals in Europe Sandra Ponzanesi,, Adriano José Habed, 2018-08-31 Postcolonial intellectuals have engaged with and deeply impacted upon European society since the figure of the intellectual emerged at the beginning of the nineteenth century Yet a critical assessment and overview of their influential roles is long overdue particularly in the light of contemporary debates in Europe and beyond This book offers an innovative take on the role of intellectuals in Europe through a postcolonial lens and in doing so questions the very definition of public intellectual on the one hand and the meaning of such a thing as Europe on the other It does so not only by offering portraits of charismatic figures such as Stuart Hall Jacques Derrida Antonio Gramsci Frantz Fanon and Hannah Arendt among others but also by exploring their lasting legacies and the many dialogues they have generated The notion of the classic intellectual is further challenged by bringing to the fore artists writers and activists as well as social movements networks and new forms of mobilization and collective engagement that are part of the intellectual scene
