## **Intelligent Enterprise A Knowledge And Service Based Paradigm For Industry:**

**Intelligent Enterprise** James Brian Quinn, 1992-09-14 In this penetrating study of how knowledge based services and technology are revolutionizing the economy and every corporate strategy James Brian Quinn argues that the successful companies of the 90 s whether in manufacturing or services will derive their competitive edge not from ephemerally superior products but from a deep understanding of a few highly developed knowledge and service based core competencies Rarely will owning the largest raw materials resource manufacturing plants equipment bases or integrated facilities provide a maintainable competitive edge for major companies Such physical properties are too easily cloned or bypassed From now on Quinn documents intelligent enterprises will derive sustainable advantage from knowledge and service based activities that leverage intellectual assets They will increase value through technological sophistication better knowledge bases more creative customer responsiveness and the unsurpassed management of human and intellectual capital that competitors cannot reproduce Quinn analyzes the technological and economic forces that make such strategies essential He shows in detail how to create and leverage knowledge and service based core competencies for maximum focus and effectiveness Managers Quinn asserts must define each value creating activity as a knowledge based service and determine whether or not they can perform that service be it research design inventory control accounting distribution or advertising better than anyone else in the world Using examples from companies such as Merck Honda Apple Boeing and Wal Mart Quinn describes how forward looking companies can best perform needed analyses and implement strategies around selected core competencies By eliminating or outsourcing less important functions to superior outside vendors firms become more responsive decentralized and lean They become the intelligent enterprises of the 1990s leveraging human and capital resources much more than other firms They may also take on radically new organizational forms become starburst inverted infinitely flat or spiders web configurations By designing and benchmarking their knowledge and service based activities to be best in world managers can obliterate overhead costs smash bureaucracies motivate personnel and create greater value for customers and shareholders alike

**Governing Knowledge-Processes**  
 Volker Mahnke, Torben Pedersen, 2012-12-06 lication Key criteria for inclusion included a sound combination of conceptualization and empirical grounding in response to the questions above Peter J Buckley and Martin J Carter in their paper Governing Knowledge Sharing in Multinational Enterprises examines knowledge sharing processes in four UK MNCs A key challenge is to design governance architectures so that application strategy uses of a given portfolio of knowledge and discovery strategy new combinations of knowledge can be supported through knowledge sharing A key trade off obtains here between integration and partitioning of knowledge assets whereby increased partitioning facilitates local knowledge sharing but complicates global integration In addition coordination mechanisms employed in the governance of knowledge sharing may be organized centrally or decentrally whereby central organization may lead to knowledge loss and managerial overload while decentral organization may lead to loss of control An important contingency in resolving these governance problems is the extent to which firms follow application and discovery strategies In addition the authors recommend to closely integrate incentive systems with attempts for knowledge sharing including individual incentives and rewards Julian Birkinshaw and Carl F Fey examine the Organization of Research and Development in Large Multinational Firms in a sample of 107 firms based in the UK and Sweden The key challenge addressed in this paper is how knowledge creation is governed and how this
