## **Intelligent Persons Guide To History:**

**An Intelligent Person's Guide to History** John Vincent, 1996 Provides a comprehensive examination of the philosophy and evolution of history     History at War Noble Frankland, 2012-07-18 History at War is a unique book It throws light on important unexplored aspects of the pursuit of historical truth It tells how alone among historians Noble Frankland fought in the bomber offensive during the Second World War and then together with Sir Charles Webster wrote its official history how he transformed the Imperial War Museum from a dying institution into one of the world's leading historical centres for the study of the conflicts of the twentieth century how he played a major part in television documentary productions including in particular The World at War and how he wrote a series of original rigorously researched historical works In History at War he describes the battles he had to fight against the mandarins and media merchants who sought to impose a spin on history to suit their own ends and were ruthless and unscrupulous in their methods Its meticulous documentation gives a guarantee of authenticity to his staggering account of how those in high places tried to distort history which might otherwise seem scarcely credible The revelations about Bomber Harris relations with his superior Lord Portal during the war and their joint opposition to the two authors account of the strategic air offensive still a highly topical issue will set alight a new debate among military and other historians Unlike most books on the theory and practice of history it does not confine itself to what can be written on the page It also covers Dr Frankland's experience of demonstrating history in museum galleries on the television screen on sites such as Duxford Airfield near Cambridge and on board HMS Belfast in the Pool of London The problem for historians of publishing a full and unbiased account and analysis of controversial events and episodes in politics and international affairs is as acute in the 1990s as it ever has been All readers with a concern for the truth will learn much about such issues from this unflinching and penetrating book Robert Crawford Director General Imperial War Museum it is brilliant rivetingly trenchant and should be required reading for all aspirant historians Professor R B Wernham former Professor of Modern History Oxford It really is a splendid and fascinating story and a sharp warning to historians to beware of mandarins and great commanders In Francis Bacon's categorization Some books are to be tasted some to be swallowed and a few to be chewed and digested It certainly rates among the few Professor Geoffrey Best in TLS The subtitle is exactly right for a book by Noble Frankland a tough character who views the successive phases of his post war life as battles to bring truths and lessons plainly before the public and who can happily conclude that he has been generally successful In at least two fields the history of the most painfully controversial of Allied campaigns in the Second World War and the rescue and make over of the least well known of London's great museums his achievements have been of great national value and importance this astringently truth telling professional autobiography required reading for historians of the British Establishment from Attlee to Macmillan Piers Mackesy Fellow of British Academy and former Fellow of Pembroke College Oxford I admired History at War on many levels characterizations of Webster Bradley Willis etc the balance between

Museum Trustees and the chief executive functioning of Civil Service Bomber Command the picture of Noble Frankland's developing career and the qualities it called for etc I often laughed aloud at the wit and the penetrating observations of functioning individuals Also much enjoyed final reflections on history by a practitioner Haven't enjoyed a book so much for ages

**Empiricism and History** Stephen Davies, 2003-05-16 The central doctrine of empiricism that true knowledge or understanding of the world comes ultimately from sense impressions underlies most of the practices and arguments of professional historians but many historians have denied that there is a theory behind what they do In the last twenty years however postmodernism has had a powerful effect on the discipline of history and is now forcing empiricist historians to articulate their methods and to defend them as both possible and virtuous In this concise introduction Stephen Davies explains what historians mean by empiricism examines the origins growth and persistence of empirical methods and shows how students can apply these methods to their own work

**Herbert Butterfield and the Interpretation of History** K. Sewell, 2005-01-13 This book examines successive stages in the development of the thought of Sir Herbert Butterfield in relation to fundamental issues in the science of history In a carefully nuanced way it lays bare the unspoken motivations and hidden tensions in Butterfield's debate with himself and with a host of contemporary historians in the period between 1924

79 **In Defence of History** Richard J. Evans, 2012-11-01 A lucid muscular and often sly reflection on the worth and purpose of historical scholarship by the award winning author of The Third Reich Trilogy Kirkus In this volume the renowned historian Richard J Evans offers a fervent and deeply insightful defense of his craft and its importance to civilization At a time when fact and historical truth are under unprecedented assault Evans shows us why history is necessary Taking us into the historians workshop he offers a firsthand look at how good history gets written In staunch opposition to the wilder claims of postmodern historians Evans thoroughly dismantles the notion that a realistic grasp of history is impossible to attain He then goes on to explain the deadly political dangers of losing a historical perspective on the way we live our lives In the tradition of E H Carr's What Is History and G R Elton's The Practice of History Evans In Defense of History delivers a model of lucid and intelligent historiographical analysis The Guardian UK

**Historics** Martin L. Davies, 2007-05-07 From an author at the forefront of research in this area comes this provocative and seminal work that presents a unique and fresh new look at history and theory Taking a broadly European view the book draws on works of French and German philosophy some of which are unknown to the English speaking world and Martin L Davies spells out what it is like to live in a historicized world where any event is presented as historical as or even before it happens Challenging basic assumptions made by historians Davies focuses on historical ideas and thought about the past instead of examining history as a discipline The value of history in and for contemporary culture is explained not only in terms of cultural and institutional practices but in forms of writing and representation of historical issues too Historics stimulates thinking about the behaviours and practice that constitute history and introduces complex ideas in a clear and approachable style This important text is recommended not only for a

wide student audience but for the more discerning general reader as well     Historical Discourse Caroline Coffin, 2009-01-01 Historical Discourse analyses the importance of the language of time cause and evaluation in both texts which students at secondary school are required to read and their own writing for assessment In contrast to studies which have denied that history has a specialised language Caroline Coffin demonstrates through a detailed study of historical texts that writing about the past requires different genres lexical and grammatical structures In this analysis language emerges as a powerful tool for making meaning in historical writing Presupposing no prior knowledge of systemic functional linguistics this insightful book will be of interest to researchers in applied linguistics and discourse analysis as well as history educators

**The Crisis of Colonial Anglicanism** Martyn Percy, 2025-01-16 This book offers a fresh bold and unsettling truth the British Empire and Great Britain are primarily English constructions and the Church of England has presumed to act for and benefit from English enterprise and exploitation serving as the spiritual arm of the imperial project English Anglicanism has developed itself as the lead character within its own serious fiction the main religious player in a drama of Church and Empire Yet in collusion with colonialism it is now a prisoner of its own historical amnesia Martyn Percy examines the English interests concealed in appeals to Britishness and shows how slavery exploitation classism and racism played their part in the elitist and hierarchical worldviews propagated by the English to bolster both Empire and Church Yet by regarding the rest of the world as lesser

both institutions have slowly degenerated in global standing Now Britain and the Church of England are no more than minor national players on the world stage Religious social and political imperialism are founded on the deprecation of others Yet those peoples who were once looked down upon have fought for equality and independence Today the worldwide Anglican Communion faces a new era of moral reckoning
