El-Sharkawi,2013-11-20 Electric power engineering education traditionally covers safety of the power equipment and systems Little attention if any is given to the safety of people When they reach professional status most power engineers are not familiar with electric safety issues such as practices governing site works or grounding techniques of dwellings hospitals *Port Needs Study (vessel Traffic Services Benefits).: Technical supplement* ,1991 **Port Needs Study (vessel Traffic Services Benefits).** ,1991 Effects of Insurance on Maritime Liability Law Muhammad Masum Billah,2014-01-07 The book examines how the absence of insurance in the past led to some special maritime liability law principles such as general average i e losses or expenses shared by all the parties to a maritime adventure and the limitation of shipowners liability In the absence of insurance these principles served the function of insurance mostly for shipowners As commercial marine insurance is now widely available these principles have lost their justification and may in fact interfere with the most important goal of liability law i e deterrence from negligence The work thus recommends their abolition It further argues that when insurance is easily available and affordable to the both parties to a liability claim the main goal of liability law should be deterrence as opposed to compensation This is exactly the case with the maritime cargo liability claims where both cargo owners and shipowners

are invariably insured As a result the sole focus of cargo liability law should be and to a great extent is deterrence On the other hand in the vessel source oil pollution liability setting pollution victims are not usually insured Therefore oil pollution liability law has to cater both for compensation and deterrence the two traditional goals of liability law The final question the work addresses is whether the deterrent effect of liability law is affected by the availability of liability insurance Contrary to the popular belief the work attempts to prove that the presence of liability insurance is not necessarily a hindrance but can be a complementary force towards the realization of deterrent goal of liability law

The Anatomy of a Game David M. Nelson, 1994 This is the first football history to chronicle year by year how playing rules developed the game Football a four dimensional game of rushing kicking forward passing and backward passing has had more playing rule changes since its inception than any other sport The Anatomy of a Game follows football rules from the game s European roots through its beginning in the United States to its position as the number one spectator sport in the 1990s Highlighted are details of the crisis years that changed the character of the game with coaches and rules committee members the featured players David M Nelson who served on the NCAA Rules Committee longer than Walter Camp provides personal insight into all Rules Committee meetings since 1958 as well as an appendix chronological and by rule listing every change since 1876 Ever since the first two human beings kicked threw or batted an object competitively there have been playing rules Games are mentioned in the Bible and the Romans brought football s

forerunner to Britain from where it was exported to the United States It was in the United States that college students decided to make their game rugby rather than soccer Although the students invented United States football and made the first rules their ruling power was eventually lost to the faculty administrators coaches rules committees and the NCAA Beginning as a brutal sport football survived several crises before and after the turn of the century eventually becoming respectable The 1931 injury crisis split the high school and college rules and the same year the professionals went their own way with rules largely based on spectator appeal Today the sport is a national treasure primarily because of its playing rules over seven hundred in total which make college football unique among the world s team sports Moreover football remains an American game never having the same impact in other countries as do baseball and basketball Rules make the game but people make the rules Football survived the major crises that threatened the game because committee members adhered to the precepts that had governed football since its inception The game began with an attempt to have a consistent code of justice personal accountability and equality In some sense the playing rules are a type of moral precept that explains in the simplest terms what can and cannot be done The Football Code which first prefaced the rules in 1916 makes the game more than any other sport a moral one because it sets standards for coaching playing sportsmanship and officiating BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved
