Bromfield, 2016-12-12 Intercountry adoption has undergone a radical decline since 2004 when it reached a peak of

approximately 45 000 children adopted globally Its practice had been linked to conflict poverty gender inequality and claims of human trafficking ultimately leading to the establishment of the Hague Convention on Intercountry Adoption HCIA This international private law along with the Convention on the Rights of the Child affirm the best interests of the child as paramount in making decisions on behalf of children and families with obligations specifically oriented to safeguards in adoption practices In 2004 as intercountry adoption peaked and then began a dramatic decline commercial global surrogacy contracts began to take off in India Global surrogacy gained in popularity owing in part to improved assisted reproductive technology methods the ease with which people can make global surrogacy arrangements and same sex couples seeking the option to have their own genetically related children Yet regulation remains an issue so much so that the Hague Conference on Private International Law has undertaken research and assessed the many dilemmas as an expert group considers drafting a new law with some similarities to the HCIA and a strong emphasis on parentage This ground breaking book presents a detailed history and applies policy and human rights issues with an emphasis on the best interests of the child within intercountry adoption and the new conceptions of protection necessary in global surrogacy To meet this end voices of surrogate mothers in the US and India ground discourse as authors consider the human rights concerns and policy implications For both intercountry adoption and global surrogacy the complexity of the social context anchors the discourse inclusive of the intersections of poverty and privilege This examination of the inevitable problems is presented at a time in which the pathways to global surrogacy appear to be shifting as the Supreme Court of India weighs in on the future of the industry there while Thailand Cambodia and other countries have banned the practice all together There is speculation that countries in Africa and possibly Central America appear poised to pick up the multi million dollar industry as the demand for healthy infants continues on Arizona Journal of International and Comparative Law ,2003

International Migration of Children for a Better Life James G. Dwyer,2025 In a world where a child s fate is often determined by the arbitrary circumstances of their birth International Migration of Children for a Better Life challenges the legal status quo The book advances a dramatically different vision of children s relationship to nations and to the international legal order one that provides theoretical grounding for a right of children to escape life threatening circumstances rather than waiting for change in their home environment By offering a normative critique of existing international law the book suggests novel arguments for enabling children to migrate more freely and escape adverse environments It argues that the conventional policy response to tragic circumstances war famine natural disaster which prioritizes transformation of local conditions so people can remain in place or quickly return is less appropriate for children than for adults Children s needs are more urgent The book arrives at several recommendations backed by a theory of children s rights eliminate citizenship for children altogether disallow states from inhibiting children s departure prioritize
