Interacting with Essays Charles Edward May, 1996 *Interactions* Jerry H. Bentley, Renate Bridenthal, Anand A. Yang, 2005-08-31 The essays presented here reflect recent widespread interest in reconsidering the political geographical and cultural boundaries conventionally observed by area specialists and others They intentionally range widely through time and space dealing with diverse issues and contexts but each highlights the very general theme of cross cultural interaction Although they draw heavily on area studies the contributors seek to put previously separate bodies of scholarship in dialogue with one another by exploring those interactions that have historically linked world regions Four general themes are especially prominent in this volume and the essays develop sophisticated positions on each On the issue of agency and structure they offer useful guidance toward recognizing the importance of both human agency and historical structures in historical processes On the theme of states and their roles in cross cultural interactions they acknowledge that states do not entirely control their own destinies but nevertheless deeply influence the development of these exchanges sometimes decisively so Regarding the theme of the global and the local they emphasize the reciprocal influence of global dynamics and local circumstances and agree that analyses must take both into account to be successful Finally all of the essays allow that the theme of cross cultural interaction is crucial to understanding the world and its development through time Contributors C A Bayly Sven Beckert Jerry H Bentley Renate Bridenthal Charles Bright Michael Geyer Alan L Karras Adam McKeown Colin Palmer Stephen H Rapp Jr Caroline Reeves John O Voll K ren Wigen Anand A Yang **Total Interaction** Gerhard Buurmann, 2005-04-22 Interactivity is the catchword for a wide range of innovative solutions that concept designers and engineers are developing in every area of technology and culture For the authors interaction is more than a technological or aesthetic concept it is a new means to ally humans and technology in a dynamic and reciprocal form of living in technology This publication gathers together scientists and contributors from diverse fields of activity providing a fascinating up to date survey of the technological and conceptual equipment of experts engaged in aesthetic disciplines and product design The editor Professor Gerhard M Buurman is Head of Interactiondesign at the University of Art Media and Design HGKZ in Zurich
