Developing Literacy in Preschool Lesley Mandel Morrow,2007-06-02 Preschoolers are passionate about learning and a high quality preschool program offers rich learning experiences in the areas of language and literacy This engaging book gives teachers and other professionals fresh ideas inspiration and practical tools for integrating age appropriate literacy instruction into the preschool curriculum Including helpful vignettes sample lesson plans and reproducibles the book shows how to create a motivating classroom environment balance child initiated exploration with structured activities and support students developing skills in reading writing speaking and comprehension Essential topics include preschool assessment and working with English language learners **Teaching the Writers' Craft Through Interactive Writing** Susan Paige Furgerson,2004 Abstract Interactive writing is an instructional context where the students and teacher share the pen as they collaboratively compose a text As an unscripted literacy event interactive writing allows educators to use understandings that they have about their students abilities as writers and their own knowledge of the writing process to model and discuss elements of writing that they want students to employ as they write independently Educators have seen value in using interactive writing as a tool for helping children learn about letters sounds words and concepts about print Currently a few studies exist describing interactive writing as a support for children s development of strategies for constructing a text however no published study focuses on the ways teachers use it as pedagogy for helping children develop strategies associated with the craft of writing The purpose of this study was to describe how two experienced first grade teachers used interactive writing as an explicit teaching technique for teaching the writers craft and to identify the specific elements associated with the craft of writing that emerged as they assisted children in the negotiation of text I observed and videotaped ten interactive writing lessons in each classroom over a six week time period at the end of the first grade year I also conducted pre observation and debriefing conferences with each teacher to find out what they considered in regards to planning for a lesson and to allow them to reflect on their teaching actions and assumptions following the lessons The

findings suggest that the teachers addressed the craft of writing during the interactive writing sessions through demonstration and by actively involving students in making decisions about the text before and while writing. Both teachers planned for writing involved the children in planning for writing and addressed the elements of sentence variation, audience revision, and evaluation of the writing as each related to the craft. The findings of this study also underscore the fact that teaching is highly individual. Rich descriptions of the lessons provide authentic scripts that can assist teachers and researchers in identifying possibilities for variations in the teaching of interactive writing.

Writing for Visual Media

Anthony Friedmann, 2014-06-20. *Writing for Visual Media* focuses on the fundamental problems faced by writers beginning to create content for media that is to be seen rather than read. This book takes the student from basic concepts to a first level of practice through an explicit method that trains students to consistently identify a communications problem, think it through, and find a resolution before beginning to write. Through successive exercises it helps them acquire the skill and confidence they need to write effective films, corporate and training videos, documentary ads, PSAs, tv series, and other types of visual narrative. *Writing for Visual Media* also has a chapter on writing for interactive media including promotions, instructional programs, and games. The book makes the student aware of current electronic writing tools and scriptwriting software through a companion CD-ROM which offers links to demos and enriches the content of the printed book with video, audio, and sample scripts.

Writing Sense Juli Kendall, Outey Khuon, 2006. Writing is all about making meaning. The prospect of teaching writing to a classroom full of students, some who speak English and some who don't, can be overwhelming. When students learning English are at different levels, the task is even more challenging. *Writing Sense: Integrated Reading and Writing Lessons for English Language Learners* outlines the classroom conditions necessary for successful writing instruction with English language learners, whether in writing workshop and/or small group instruction. It includes 68 classroom-tested lessons for grades K-8 that show kids at all levels of language acquisition how to make connections, ask questions, visualize, make mental images, infer, determine importance, synthesize, monitor meaning and comprehension, and use fix-up strategies. The five main sections are geared to the stages of language proficiency and lessons are divided into younger and older students spanning kindergarten through to grade eight. There are extensive lists of suggested books for mentor texts as well as lists of mentor authors to facilitate teachers' planning and instruction.
