Macroeconomic Theory and Stabilization Policy Willem H. Buiter, 1989 **Value Theory and Economic Progress: The Institutional Economics of J. Fagg Foster** Marc R. Tool, 2012-12-06 J Fagg Foster 1907 1985 was one of the most significant creators of institutionalist economic theory in the twentieth century He wrote and taught in the American intellectual tradition of Thorstein Veblen John R Commons John Dewey and Clarence E Ayres This tradition shares purpose

and philosophy with the European contributors Gunnar Myrdal and K William Kapp Because little of Foster s scholarly work was formally published professional knowledge of his extraordinary contribution is quite limited beyond the circle of his students and colleagues Value Theory and Economic Progress attempts to correct that deficiency by providing an extended characterization of this missing and crucial component of the development of American heterodox economic thought Its purpose is to demonstrate the timely relevance and significance of this model of inquiry in political economy In addition this volume explains that contemporary problem solving means changing what is into what ought to be through institutional adjustments such a demonstration is at the heart of Foster s contribution to institutional thought *Institutional Economics and the Theory of Social Value: Essays in Honor of Marc R. Tool* Charles M.A. Clark, 2012-12-06 Marc R Tool both through his writings and his editorship of the Journal of Economic Issues has had a profound influence on institutional economics Tool s efforts in his own words has been to keep values on the agenda of economic inquiry which is another way of saying keep economic inquiry relevant Tool s work on the theory of social value and instrumental valuation has helped to keep institutional economics focused on the core economic and social issues facing society providing both a perspective from which to analyze the economy and a criteria for evaluating outcomes This collection of essays is a testament to this legacy Although these 15 chapters cover a wide and diverse range of topics it is the common themes which are most striking the inescapable necessity of values in economic discourse the central role of valuation in economic activity and most importantly the requirement of democratic participation to achieve efficient solutions to the economic problem These essays are offered to honor a body of work a set of ideas but mostly a man who by directing economic inquiry to these core issues has promoted the continuity of human life and the noninvidious recreation of community through the instrumental use of knowledge
