## **Economic Thinking For The Theologically Minded:**

Economic Thinking for the Theologically Minded Samuel Gregg, 2001 Economic Thinking for the Theologically Minded provides an introduction to what has been called the economic way of thinking which explains some of the critical concepts and foundational assumptions employed in economics To communicate these ideas effectively to those engaged in theological studies this book avoids using unnecessary technical terminology These concepts are then subject to analysis from the standpoint of Christian ethics with emphasis placed upon the often unsuspected degree of agreement between economics and Christian belief about the nature of the person The second half of the book consists of a collection of selections from classical economic texts representing a range of authors from a variety of schools of thought These selections have been arranged around ten key concepts each of which attempts to deepen understanding of various ideas presented in the book s first half

**Liberating Black Theology** Anthony B. Bradley, 2010-02-03 When the beliefs of Barack Obama s former pastor Rev Jeremiah Wright assumed the spotlight during the 2008 presidential campaign the influence of black liberation theology became hotly debated not just within theological circles but across cultural lines How many of today s African American congregations and how many Americans in general have been shaped by its view of blacks as perpetual victims of white oppression In this interdisciplinary biblical critique of the black experience in America Anthony Bradley introduces audiences to black liberation theology and its spiritual and social impact He starts with James Cone s proposition that the victim mind set is inherent within black consciousness Bradley then explores how such biblical misinterpretation has historically hindered black churches in addressing the diverse issues of their communities and prevented adherents from experiencing the freedoms of the gospel Yet *Liberating Black Theology* does more than consider the ramifications of this belief system it suggests an alternate approach to the black experience that can truly liberate all Christ followers

*Love Your God with All Your Mind* J.P. Moreland, 2014-03-14 We know that faith means being sure of what we hope for and certain of what we do not see Hebrews 11:1 NIV *Love Your God with All Your Mind* explains the importance of using your mind not only to win others to Christ but also to experience personal spiritual growth Author J P Moreland challenges you to use logic and reason to further God s kingdom through evangelism apologetics worship and vocation This revised edition includes

expanded appendixes and three new chapters that outline how to reason for the reality of God and the historicity of Jesus life teachings death and resurrection

**Faithful Economics** Daniel K. Finn, 2021-08-03 Careful moral reflection and action are important across all of modern life but they are especially critical when it comes to our place as individuals and communities in matters of economics We know intuitively that our daily decisions about money and markets have a deep impact on others but it is easy to become overwhelmed and confused or worse to feel as if our actions don't make a difference Faithful Economics is the ideal guide for navigating this complex arena and coming to a deeper understanding of how our faith and our economic lives intersect In twenty five short lessons each digestible in one brief sitting the author explores a wide range of topics from lobbying and just wages to globalization and Catholic social teaching Each section illuminates the issues explains the questions and leaves the reader with clarity and understanding An ideal book for students curious readers and all who want to understand their place as a faithful participant in economic life

Ecumenical Babel Jordan Joseph Ballor, 2010 A critical engagement of the ecumenical movement's approach to ethical and economic issues Ecumenical Babel updates a line of criticism articulated by Dietrich Bonhoeffer Paul Ramsey and Ernest W Lefever Arguing for the continuing importance of Christian ecumenism Jordan J Ballor seeks to correct the errors created by the imposition of economic ideology onto the social witness of ecumenical Christianity as represented by the Lutheran World Federation the newly formed World Communion of Reformed Churches and the World Council of Churches Ecumenical Babel is a voice for sustained ecumenical dialogue vital ecclesiastical witness and individual Christian conscience

**Wealth, Poverty, and Human Destiny** Doug Bandow, David Schindler, 2014-05-06 The rapid spread of the liberal market order across the globe poses a host of new and complex questions for religious believers indeed for anyone concerned with the intersection of ethics and economics Is the market economy particularly as it affects the poor fundamentally compatible with Christian moral and social teaching Or is it in substantial tension with that tradition In Wealth Poverty and Human Destiny editors Doug Bandow and David L Schindler bring together some of today's leading economists theologians and social critics to consider whether the triumph of capitalism is a cause for celebration or concern Michael Novak Richard John Neuhaus Max Stackhouse and other defenders of democratic capitalism marshal a number of arguments in an attempt to show that among other things capitalism is more Christian in its foundation and consequences than is conceded by its critics that as Stackhouse and Lawrence Stratton write the roots of the modern corporation lie in the religious institutions of the West and that as Novak contends globalization is the natural ecology of Christianity The critics of liberal economics argue on the other hand that it is historically and theologically shortsighted to consider the global capitalist order and the liberalism that sustains it as the only available option Any system which has as its implicit logic that stable and preserving relationships among people places and things do not matter and are of no worth in the words of Wendell Berry should be regarded with grave suspicion by religious believers and all men and women of goodwill Bandow and Schindler take up these arguments and many others in their

responses which carefully consider the claims of the essayists and thus pave the way for a renewed dialogue on the moral status of capitalism a dialogue only now re emerging from under the Cold War rubble The contributors fresh insightful examinations of the intersection between religion and economics should provoke a healthy debate about the intertwined issues of the market globalization human freedom the family technology and democracy The Myth of the Saving Power of Education Hannah Adams Ingram,2021-05-20 In the United States young people are bombarded with messages that they must go to college in order to secure their place in the middle class Those who are most disadvantaged in society are the most frequent recipients of this rhetoric because people believe that education is the one ticket that can save them from poverty Like the belief that there is only one avenue for salvation from hell to heaven the notion of salvific education presents a single answer to the problem of inequality if you want to be saved from poverty and oppression you must go to college In this book Hannah Adams Ingram interrogates the presumed promise of education and argues that the myth itself perpetuates rather than alleviates social inequality The Myth of the Saving Power of Education asks educators to reclaim the liberative potential of education and asks Christians to repent of judging individual worth based on the same merits as the secular market system **Free Markets and the Culture of Common Good** Martin Schlag,Juan Andrés Mercado,2012-04-23 Recent economic development and the financial and economic crisis require a change in our approach to business and finance This book combines theology economy and philosophy in order to examine in detail the idea that the functioning of a free market economy depends upon sound cultural and ethical foundations The free market is a cultural achievement not only an economic phenomenon subject to technical rules of trade and exchange It is an achievement which lives by and depends upon the values and virtues shared by the majority of those who engage in economic activity It is these values and virtues that we refer to as culture Trust credibility loyalty diligence and entrepreneurship are the values inherent in commercial rules and law But beyond law there is also the need for ethical convictions and for global solidarity with developing countries This book offers new ideas for future sustainable development and responds to an increasing need for a new sense of responsibility for the common good in societal institutions and good leadership *Commerce and Community* Robert F. Garnett Jr.,Paul Lewis,Lenore T. Ealy,2014-11-27 Since the end of the Cold War the human face of economics has gained renewed visibility and generated new conversations among economists and other social theorists The monistic mechanical economic systems that characterized the capitalism vs socialism debates of the mid twentieth century have given way to pluralistic ecologies of economic provisioning in which complexly constituted agents cooperate via heterogeneous forms of production and exchange Through the lenses of multiple disciplines this book examines how this pluralistic turn in economic thinking bears upon the venerable social theoretical division of cooperative activity into separate spheres of impersonal Gesellschaft commerce and ethically thick Gemeinschaft community Drawing resources from diverse disciplinary and philosophical traditions these essays offer fresh critical appraisals of the Gemeinschaft Gesellschaft segregation of face

to face community from impersonal commerce Some authors issue urgent calls to transcend this dualism whilst others propose to recast it in more nuanced ways or affirm the importance of treating impersonal and personal cooperation as ethically epistemically and economically separate worlds Yet even in their disagreements our contributors paint the process of voluntary cooperation the space commerce and community with uncommon color and nuance by traversing the boundaries that once separated the thin sociality of economics as science of commerce from the thick sociality of sociology and anthropology as sciences of community This book facilitates critical exchange among economists philosophers sociologists anthropologists and other social theorists by exploring the overlapping notions of cooperation rationality identity reciprocity trust and exchange that emerge from multiple analytic traditions within and across their respective disciplines Beyond Integrity Scott Rae, Kenman L. Wong, 2012-02-21 Integrity is essential to Judeo Christian business ethics But today's business environment is complex Those in business and those preparing to enter the business world need to grapple with the question of how integrity and biblical ethics can be applied in the workplace They need to go beyond integrity in their thinking Beyond Integrity is neither excessively theoretical nor simplistic and dogmatic Rather it offers a balanced and pragmatic approach to a number of concrete ethical issues Readings from a wide range of sources present competing perspectives on each issue and real life case studies further help the reader grapple with ethical dilemmas The authors conclude each chapter with their own distinctly Christian commentary on the topic covered This Zondervan ebook of the third edition has been revised to provide the most up to date introduction to the issues Christians face in today's constantly changing business culture Revisions include 30 new case studies 13 new readings 50% substantially revised sidebars that reflect the issues in the news and business press summaries and material for discussion **The Contemporary Church and the Early Church** Paul A. Hartog, 2010-02-01 As evangelicals face future challenges many are turning back to the ancient church for inspiration But these ancient future approaches remain diverse and sometimes even at odds with one another This volume demonstrates and analyzes the complexity of such contemporary church early church engagements Six scholars share diverse insights from the Patristic period including lessons on evangelism and discipleship community formation and maintenance use of the rule of faith the preaching of social ethics responses to cultural opposition and Christological development The volume closes with two critical responses from confessional Lutheran and Baptist perspectives These collected essays will remind contemporary readers of the importance of a reflective and responsible ressourcement of Patristic wisdom **Just Capitalism** Brent Waters, 2016-10-01 Just Capitalism is a Christian moral defense of economic globalization as a system that is well suited to provide the necessary material needs that are prerequisite for human community and flourishing Global based market exchange offers the development and distribution of the goods of creation for humans to enjoy and share Globalization also offers the most realistic and promising way of exercising a preferential option for the poor Waters argues that economic globalization and thus capitalism is a necessary condition for sustaining human life but not a sufficient condition for enabling

human flourishing Even though globalization is generally compatible with Christian theological and moral claims and can realistically facilitate the well being of the human family it must be reoriented toward koinoniahuman community communication fellowships as the global economy s primary goal in order to help actualize human flourishing Readers will gain insight about how economic globalization and thus capitalism is good for the human family and can be made better by certain reorientations that are compatible with Christian moral values Waters provides a mature and civil counterargument against knee jerk condemnations of economic globalization and capitalism      *Awaiting the City* Chad Brand,Tom Pratt,2012-11-13 People of faith have always been on search for the homeland first promised to Abraham in light of the Babylonian civilization he left That future hope was reinterpreted by Jesus and taken up by St Augustine in The City of God reinterpreted again by John Calvin in Geneva and given a final form by the Puritan pilgrims who came to America to establish the City upon a Hill Fundamental to this quest for a just holy civilization has been the progress of humankind on the earth in light of the mandate to fill and rule over it Authors Chad Brand and Tom Pratt discuss that progress as they answer the vital questions for praxis How should biblically oriented Christians think of and work toward God s justice along the way How can we steer between a utopian vision and a limited vision to a new rational compassion      **Alternatives to Economics** Clive Beed,Cara Beed,2006-12-14 Alternatives to Economics outlines the Christian thought system and its value as an alternative to secular social science in the development of socio economic policies Co authors Clive and Cara Beed demonstrate how the Christian thought system could be applied to issues such as distribution of wealth and the growing unemployment problem The Christian thought system provides an alternative way of describing explaining and formulating policies for socio economic matters from that of secular social science Alternatives to Economics finds the current state of economics severely flawed with no set of value free objective tools that can be used to analyze the economy This book seeks to present these Christian thought system tools to both Christians and non Christians      **Bulls, Bears and Golden Calves** John E. Stapleford,2015-03-27 John Stapleford interacts with seven standard introductory economics texts to show how ethics are inextricably intertwined with economic life and analysis This revised and expanded edition includes discussions of entitlements global poverty government debt healthcare reform and immigration reform      *The Air Force Law Review* ,2007

**A Research Annual** Jeff E. Biddle,Ross B. Emmett,Marianne Johnson,2013-11-01 Research in the History of Economic Thought and Methodology is an annual series which presents research materials in the fields of the history of economic thought and the methodology of economics      **The Economy of Recognition** Carlos Hoevel,2013-03-27 Introducing an alternative philosophical foundation to the study of economics this book explains and adopts the perspective of the Italian philosopher Antonio Rosmini 1797 1855 whose interpretation of economic action was fundamentally at odds with the prevailing and all conquering utilitarianism of modernity Rosmini one of the most important Italian and Catholic philosophers of the modern age eschewed the traditional concepts of subjectivism and individualism at the core of the utilitarian thesis

prefiguring today's critique of autistic economics with his assertion that micro economic formulae consecrating the maximization of utility derive not from scientific principles or even hypotheses but from uncritically adopted philosophical ideas. It was an assault on the determinism he perceived as the fatal flaw in accepted economic theory. Rosmini's notion of human and economic action based on human beings' personal capacities for objective knowledge, truth recognition, moral goodness and happiness deeply transform the meaning of central economic activities such as labour, wealth creation and consumption and become crucial factors in any analysis of the operation of the economy. After introducing the fundamentals of Rosmini's thought, the author details the theoretical and institutional features of utilitarian economics, tracing their influence on social norms. He juxtaposes these with Rosmini's alternative philosophy which places the concept of social justice at its heart and which attempts to establish a framework for relations between the public and private realms. The contemporary case is then made for adopting Rosmini's principles, thus changing an economic paradigm widely held to be unassailable. The fruit of unprecedented and systematic research on Rosmini's economic ideas, this volume offers a detailed conceptual framework to guide alternative approaches to conventional neoclassical economics.
