Rowe,John L. Wood,2010 This book reviews the basic models and theories of nuclear structure and gives an in depth analysis of their experimental and mathematical foundations It shows the relationships between the models and exhibits the value of following the strategy of looking for patterns in all the data available developing phenomenological models to explain them and finally giving the models a foundation in a fundamental microscopic theory of interacting neutrons and protons This unique book takes a newcomer from an introduction to nuclear structure physics to the frontiers of the subject along a painless path It provides both the experimental and mathematical foundations of the essential models in a way that is accessible to a broad range of experimental and theoretical physicists Thus the book provides a unique resource and an exposition of the essential principles mathematical structures assumptions and observational data on which the models and theories are based It avoids discussion of many non essential variations and technical details of the models **Embedded Systems -- Modeling, Technology, and Applications** Günter Hommel,Sheng Huanye,2006-08-05 The International Workshop on Embedded Systems Modeling Techn ogy and Applications is the seventh in a successful series of workshops that were established by Shanghai Jiao Tong University and Technische

Universität Berlin The goal of those workshops is to bring together researchers from both universities in order to present research results to an international community The series of workshops started in 1990 with the International Workshop on Artificial Intelligence and was continued with the International Workshop on Advanced Software Technology in 1994 Both workshops have been hosted by Shanghai Jiao Tong University In 1998 the third workshop took place in Berlin This International Workshop on Communication Based Systems was essentially based on results from the Graduiertenkolleg on Communication Based Systems that was funded by the German Research Society DFG from 1991 to 2000 The fourth International Workshop on Robotics and its Applications was held in Shanghai in 2000 The fifth International Workshop on The Internet Challenge Technology and Applications was hosted by TU Berlin in 2002 The sixth International Workshop on Human Interaction with Machines was hosted by Shanghai Jiao Tong University The subject of this year's workshop has been chosen because the field of Embedded Systems has not only gained major interest in the research community but has also significant economic impact in different application fields Mechanic hydraulic and electronic control systems are being replaced by microcomputer based embedded systems
