RACIAL PROFILING Darin D.

Fredrickson, Raymond P. Siljander, 2002-01-01 This book was written to eliminate confusion regarding what has come to be called racial profiling by clarifying the legitimate law enforcement practice of criminal profiling and by clarifying what constitutes unfair discrimination and persecution This book was written to benefit sociology students law enforcement officers and anyone else in a position to be concerned with or affected by the profiling issue Police administrators judges and legislators must adequately understand the topics and their many ramifications if they are to make decisions that are based on fact rather than stereotype and myth and free from the influence of adverse social and political pressures And attorneys when prosecuting or defending cases wherein profiling and discrimination is an issue must have good insight into the many interrelated dynamics of the topics to properly prepare and argue their case This writing explores difficult social issues that

are often poorly understood but issues that need to be understood if solutions are to be meaningful And a poorly conceived solution is especially likely when the issues are both complex and controversial In this book the writers acknowledge that while criminal profiling is a necessary and legitimate law enforcement practice unchecked bias can pollute the practice And while they acknowledge that measures to detect those whose enforcement practices reflect bias can have merit they emphasize that such efforts must be in addition to the hiring of high caliber officers providing quality training providing competent leadership and on a properly staffed and trained Internal Affairs department But the authors also emphasize the unfortunate fact that many efforts intended to prevent bias are to varying degrees ineffectual and create collateral problems Germane to that discussion is illumination of the difficulties of monitoring fair treatment policies and the unintended problems that often accompany consent decrees Street Drug Investigation Darin D. Fredrickson, Raymond P.

Siljander, 2004 This book addresses the problem of illicit drugs and their far reaching and serious consequences that permeate all levels of American society Following an examination of the history of drugs and alcohol in the United States which concludes with perspectives on what can be done to reduce the demand for illicit drugs the text provides a review of illicit drug identification This includes all levels of narcotics stimulants depressants hallucinogens steroids and cannabis as well as their description effects appearance methods of ingestion principle users sources and street names Additional major topics include drug enforcement techniques such as knock and talk investigations the intelligence process managing informants plainclothes undercover and uniformed drug investigations conspiracy investigations investigation of clandestine drug laboratories asset forfeiture sources of investigation search warrants and raid planning report writing and courtroom testimony and physical surveillance and surveillance photography This book will be a valuable resource to any law enforcement professional involved in undercover plainclothes or uniformed investigation and whether in a small or large police department **LATINO POLICE OFFICERS IN THE UNITED STATES** Martin Guevara Urbina, Sofia Espinoza

Alvarez, 2015-03-01 Considering the long lasting and complicated history of U S race and ethnic relations the multiple array of issues currently confronting both ethnic and racial communities and the shifting trends in the ethnic racial landscape this book seeks to provide a comprehensive account of the simultaneous interaction of pressing historical and contemporary forces shaping the Latino experience as well as police minority relations to better understand the current state of policing and gain further insight into the future role of Latino police in American law enforcement across the country Delineating the confines of policing a highly diverse and multicultural society in the twenty first century this book conjoins historical theoretical and empirical research placing Latino policing within a broader law enforcement and community context Major topics include the need for Latino police officers employment of Latino officers by federal state and local law enforcement agencies Chicano police officers working in the Latino community Latino officers policy practice and ethnic realities Mexican American law enforcement bridging the gaps future research and change in American institutions policy recommendations

toward a new police force and the future of Latino officers in the American police. Additional issues highlighted include racial ethnic profiling, police brutality, underpolicing and overpolicing, which challenge the quest for representation, equality, justice and due process. Finally, the contributing authors demonstrate that the lack of knowledge on Latino police and the overall American police is not inevitable and thus the book concludes with policy and research recommendations to help bridge this long neglected void, ultimately the creation of a new police force for the twenty first century. The text represents a most timely and essential tool for all levels of policing: law enforcement administrators, criminal justice educators, civic managers, criminologists, sociologists and others vested in police reform.
