Weiss, 1978 **Subject Index of Modern Books Acquired** British Library, 1927 Basics of Modern Mathematical Statistics Vladimir Spokoiny, Thorsten Dickhaus, 2014-10-25 This textbook provides a unified and self contained presentation of the main approaches to and ideas of mathematical statistics It collects the basic mathematical ideas and tools needed as a basis for more serious study or even independent research in statistics The majority of existing textbooks in mathematical statistics follow the classical asymptotic framework Yet as modern statistics has changed rapidly in recent years new methods and approaches have appeared The emphasis is on finite sample behavior large parameter dimensions and model misspecifications The present book provides a fully self contained introduction to the world of modern mathematical statistics collecting the basic knowledge concepts and findings needed for doing further research in the modern theoretical and applied statistics This textbook is primarily intended for graduate and postdoc students and young researchers who are interested in modern statistical methods *Modern Mathematics* Dirk De Bock, 2023-03-08 The international New Math developments between about 1950 through 1980 are regarded by many mathematics educators and education historians as the most historically important development in curricula of the twentieth century It attracted the attention of local and international politicians of teachers and of parents and influenced the teaching and learning of mathematics at all levels kindergarten to college graduate in many nations After garnering much initial support it began to attract criticism But as Bill Jacob and the late Jerry Becker show in Chapter 17 some of the effects became entrenched This volume edited by Professor Dirk De Bock of Belgium provides an outstanding overview of the New Math modern mathematics movement Chapter authors provide exceptionally high quality analyses of the rise of the movement and of subsequent developments within a range of nations The first few chapters show how the initial leadership came from mathematicians in European nations and in the United States of America The background leaders in Europe were Caleb Gattegno and members of a mysterious group of mainly French pure mathematicians who since the 1930s had published under the name of a fictitious Nicolas Bourbaki In the United States there emerged during the 1950s various attempts to improve U S mathematics curricula and teaching

especially in secondary schools and colleges This side of the story climaxed in 1957 when the Soviet Union succeeded in launching Sputnik the first satellite Undoubtedly this is a landmark publication in education The foreword was written by Professor Bob Moon one of a few other scholars to have written on the New Math from an international perspective The final epilogue chapter by Professor Geert Vanpaemel a historian draws together the overall thrust of the volume and makes links with the general history of curriculum development especially in science education including recent globalization trends
