Funding For Justice Money Equity And The Future Of Public:

Funding for Justice Stan Karp, 1997 Increased funding is vital to any educational renewal The papers in this publication provide a critical look at the educational system and show that it is clearly a dual system that more than 40 years after the Brown vs the Board of Education decision remains largely separate and unequal A key issue is that of educational standards The glaring weakness in most proposals for academic standards is the conspicuous absence of resources needed to realize them Without dramatic improvements in the conditions of teaching and learning standards will neither raise student achievement nor ensure that those who have been worst served by the schools historically will finally get access to better educational programs The 29 chapters of this book focus on reforms at Federal state and local levels and promote the common theme of educational equity A glossary is included Each chapter contains references SLD **Free for All** Janet Poppendieck, 2010 As this book takes us on an eye opening journey into the nation s school kitchens the author offers an assessment of school food in the United States She reveals the forces that determine how lunch is served such as the financial troubles of schools the commercialization of childhood and the reliance on market models The author explores the deep politics of food provision from multiple perspectives including history policy nutrition environmental sustainability taste and more How did our children end up eating nachos pizza and Tater Tots for lunch How did we get into the absurd situation in which nutritionally regulated meals compete with fast food items and snack foods loaded with sugar salt and fat What is the nutritional profile of the federal meals How well are they reaching students who need them Opening a window onto our culture as a whole she concludes with a vision for change fresh healthy food for all children as a regular part of their school day *K-12 Education Finance* Anthony Rolle, 2024-02-02 Education finance researchers tend to organize their thoughts on important issues by considering one of the four foundational perspectives equity efficiency liberty and adequacy The six essays presented in this special edition of the Peabody Journal of Education base their work within the context of the four pillars and present new directions for future research While some of the articles isolate a concept for closer scrutiny others draw attention to more interactive aspects of the pillars in question Each article leaves the reader with important information and insightful questions about both the usage and efficacy of education finance policies *Badges and Incidents* Michael J. Kaufman, 2020 Examines the law governing American education and proposes social constructivist pedagogy as a model for reform efforts *Rethinking Our Classrooms, Volume 2*, 2001 *Teaching Leaders to Lead Teachers* Saran Donahoo, Richard C Hunter, 2007-08-20 TEACHING LEADERS TO LEAD TEACHERS EDUCATIONAL ADMINISTRATION IN THE ERA OF CONSTANT CRISIS In the 21st century the perceived crisis in how schools educate students significantly influences the decision of teachers to move into administrative positions as well as their ability to succeed once they take on these positions Influenced by the media the community and the teacher s lounge many good educators are increasingly unwilling or simply unprepared to make the jump into school leadership and management This book addresses some of the

issues that affect school leadership by providing insights into the current state of educational administration in the hope of demystifying or dismissing some of the popular assumptions regarding what really takes place in the administration office In doing so this text examines topics related to the preparation and training of prospective administrators factors that affect the process of leading in learning environments and perspectives on the state and structure of school leadership research and development

A Consumers' Republic Lizabeth Cohen, 2003-12-30 In this signal work of history Bancroft Prize winner and Pulitzer Prize finalist Lizabeth Cohen shows how the pursuit of prosperity after World War II fueled our pervasive consumer mentality and transformed American life Trumpeted as a means to promote the general welfare mass consumption quickly outgrew its economic objectives and became synonymous with patriotism social equality and the American Dream Material goods came to embody the promise of America and the power of consumers to purchase everything from vacuum cleaners to convertibles gave rise to the power of citizens to purchase political influence and effect social change Yet despite undeniable successes and unprecedented affluence mass consumption also fostered economic inequality and the fracturing of society along gender class and racial lines In charting the complex legacy of our Consumers Republic Lizabeth Cohen has written a bold encompassing and profoundly influential book

Many Children Left Behind Deborah Meier, 2004-09-29 Signed into law in 2002 the federal No Child Left Behind Act NCLB promised to revolutionize American public education Originally supported by a bipartisan coalition it purports to improve public schools by enforcing a system of standards and accountability through high stakes testing Many people supported it originally despite doubts because of its promise especially to improve the way schools serve poor children By making federal funding contingent on accepting a system of tests and sanctions it is radically affecting the life of schools around the country But argue the authors of this citizen's guide to the most important political issue in education far from improving public schools and increasing the ability of the system to serve poor and minority children the law is doing exactly the opposite Here some of our most prominent respected voices in education including school innovator Deborah Meier education activist Alfie Kohn and founder of the Coalition of Essential Schools Theodore R Sizer come together to show us how point by point NCLB undermines the things it claims to improve How NCLB punishes rather than helps poor and minority kids and their schools How NCLB helps further an agenda of privatization and an attack on public schools How the focus on testing and test preparation dumbs down classrooms And they put forward a richly articulated vision of alternatives Educators and parents around the country are feeling the harshly counterproductive effects of NCLB This book is an essential guide to understanding what's wrong and where we should go from here

is paying its bosses too much CDC created in 1948 and formerly known as the Commonwealth Development Corporation has operated since 2004 as a fund of funds manager that invests in developing countries with the aim of promoting growth It is owned by the UK s Department for International Development DFID But over half of CDC s portfolio is in four middle income countries India China South Africa and Nigeria It should be working in poorer countries and with poor people such as farmers and small business owners and accept lower returns The report suggests a radical solution by splitting CDC into two parts The fund of funds model is profit making and leverages much extra finance and should be retained suggested name CD Funds Some of the profits from this could fund a second arm called CDC Frontier which would have a specific mandate to reduce poverty and invest in pro poor sectors including agriculture and infrastructure There should also be greater oversight of CDC by DFID so that there is greater alignment of poverty alleviation aims Current salaries are excessive at CDC and quality staff could be attracted for far lower salaries The Committee wants HM Treasury to look into the use of tax havens and for CDC to adopt best practice on tax
