Decolonizing Nature William Adams, Martin Mulligan, 2012-04-27 British imperialism was almost unparalleled in its historical and geographical reach leaving a legacy of entrenched social transformation in nations and cultures in every part of the globe Colonial annexation and government were based on an all encompassing system that

integrated and controlled political economic social and ethnic relations and required a similar annexation and control of natural resources and nature itself Colonial ideologies were expressed not only in the progressive exploitation of nature but also in the emerging discourses of conservation At the start of the 21st century the conservation of nature is of undiminished importance in post colonial societies yet the legacy of colonial thinking endures What should conservation look like today and what indeed whose ideas should it be based upon Decolonizing Nature explores the influence of the colonial legacy on contemporary conservation and on ideas about the relationships between people politics and nature in countries and cultures that were once part of the British Empire It locates the historical development of the theory and practice of conservation at both the periphery and the centre firmly within the context of this legacy and considers its significance today It highlights the present and future challenges to conservationists of contemporary global neo colonialism The contributors to this volume include both academics and conservation practitioners They provide wide ranging and insightful perspectives on the need for and practical ways to achieve new forms of informed ethical engagement between people and nature Lairds, Land and Sustainability Jayne Glass, 2013-07-22 Scotland is at the heart of modern sustainable upland management This collection of cutting edge studies is a first to press synthesis of studies carried out by the Centre for Mountain Studies at Perth College which will be both enlightening and relevant *Nature's Saviours* Graham Huggan, 2013-08-22 Today's celebrity conservationists many of whom made their reputations through television and other visual media play a major role in drawing public attention to an increasingly threatened world This book one of the first to address this contribution focuses on five key figures the English naturalist David Attenborough the French marine adventurer Jacques Yves Cousteau the American primatologist Dian Fossey the Canadian scientist broadcaster activist David Suzuki and the Australian crocodile hunter Steve Irwin Some of the issues the author addresses include What is the changing relationship between western conservation and celebrity How has the spread of television helped shape and mediate this relationship To what extent can celebrity conservation be seen as part of a global system in which conservation like celebrity is big business The book critically examines the heroic status accorded to the five figures mentioned above taking in the various discourses around nature science nation gender through which they and their work have been presented to us In doing so it fills in the cultural historical and ideological background behind contemporary celebrity conservationism as a popular expression of a chronically endangered world Introducing Social Geographies Rachel Pain, Jamie Gough, Graham Mowl, Michael Barke, Robert MacFarlane, Duncan Fuller, 2014-05-01 Introducing Social Geographies is a major new text offering a comprehensive and up to date introduction to this important area of human geography It presents a broad overview of social geography clearly outlining the key theoretical and political positions and making extensive use of examples to show how these frameworks can be used to analyse real social issues The book is ideal for undergraduates first encountering social geography and includes topic overviews summaries of key points critiques boxed case studies and suggestions for further

The Terrestrial Biosphere S.T. Trudgill, 2014-09-25 Terrestrial Biosphere tries to pose the questions which underlie the many sided debate of how to respond to and influence change How should we view nature What do we do for the best how should we act what are we trying to achieve and what should we be guided by In doing so the book introduces and attempts to analyse not only scientific aspects of the debate but also cultural attitudes and values the notions of ecosystem stability are now challenged and it is also clear that ecosystems are renewable but not repeatable It finds that prescriptive solutions based on current constructs may not be adequate Feeling that analysis should lead to advocacy the author believes that if we can't improve predictability we have to increase adaptability which means that ecological and social capacity building should be advocated This is seen in terms of concepts institutions attitudes and values which allow for a plurality of meanings and which can cope with surprise and unforeseen change and which also facilitates responses to change

**Exploring Environmental History**

T. C Smout, 2011-08-16 This volume brings together the best of T C Smout's recent articles and contributions to books and journals on the topic of environmental history

Rural Resources and Local Livelihoods in Africa NA NA, 2016-09-27 Top scholars examine issues which lead readers to better understand environmental change in the African continent and its effects on rural African livelihoods Each of the studies in this book concerns four main issues conservation biodiversity and

environment land use and livelihoods environmental change and policies for conservation and development The volume looks closely at the details of rural resource use access and control the social institutions which shape this and the effects on African environments It is not possible to understand livelihoods in Africa a central issue for all social and economic questions without grasping the interplay between environmental change and the sustainability of rural livelihoods The volume is groundbreaking in its detailed examination of this interplay and its importance in grasping the roots of poverty and potential for its alleviation and for its unique combination of natural and social science methods *Ecology Revisited* Astrid Schwarz, Kurt Jax, 2011-03-18 As concerns about humankind's relationship with the environment move inexorably up the agenda this volume tells the story of the history of the concept of ecology itself and adds much to the historical and philosophical debate over this multifaceted discipline The text provides readers with an overview of the theoretical institutional and historical formation of ecological knowledge The varied local conditions of early ecology are considered in detail while epistemological problems that lie on the borders of ecology such as disunity and complexity are discussed The book traces the various phases of the history of the concept of ecology itself from its 19th century origins and antecedents through the emergence of the environmental movement in the later 20th century to the future and how ecology might be located in the environmental science framework of the 21st century The study of ecological phenomena has never been confined solely to the work of researchers who consider themselves ecologists It is rather a field of knowledge in which a plurality of practices concepts and theories are developed Thus there exist numerous disciplinary subdivisions and research programmes within the field the boundaries of which remain blurred As a consequence the deliberation to adequately identify the ecological field of knowledge its epistemic and institutional setting is still going on This will be of central importance not only in locating ecology in the frame of 21st century environmental sciences but also for a better understanding of how nature and culture are intertwined in debates about pressing problems such as climate change the protection of species diversity or the management of renewable resources **Landscape and Sustainability** John F. Benson, Maggie H. Roe, 2005-11-29 Sustainability is highly topical but no one has yet examined its relationship to landscape architecture in any detail Contributions from leading academics and professionals in the field Will be regarded as the definitive work on the subject Breadth of approach subject examined from planning design science and management perspectives Exit Stefan Helgesson, 2011 Preliminary Material Some Thoughts on the Idea of Exit in Recent African Narratives of Childhood Richard K Priebe Generation and Complicity in Zo Wicomb's *Playing in the Light* Maria Olausson *Let Me Tell You About Bekolo's Latest Film Les Saignantes* But First Kenneth W Harrow Tradition and Creativity in Zakes Mda's *Cion* David Bell Paton's *Discovery* Soyinka's *Invention* Bernth Lindfors *Writing Out Imperialism A Note on Nationalism and Political Identity in the African Owned Newspapers of Colonial Ghana* Stephanie Newell *After Exit Exile Creativity and the Risk of Translation* Stefan Helgesson *African Presences and Representations in the Principality Markgrafschaft of Bayreuth*
