Prospects for Alternative Energy Development in the U.S. West John C. Pierce, Brent S. Steel, 2017-04-04 This book poses the question of whether identifiable individual level attributes e g values interests knowledge demographic characteristics lead to support for or opposition to the development and implementation of alternative energy technologies In recent years attempts to site alternative energy technologies e g wind solar wave have been met by intense opposition from a variety of sources including many environmentalists from whom one might expect support for non carbon based renewable energy initiatives This volume argues that there are indeed such discernible attributes and moreover that the identification and exploration are important for the development of support strategies for the well informed and achievable siting of such technologies Energy: a Continuing Bibliography with Indexes ,1975 Plan B 4.0: Mobilizing to Save Civilization (Substantially Revised) Lester R.
