The Teaching of Psychology Stephen F. Davis, William Buskist, 2013-03-07 The Teaching of Psychology is centered around the masterful work of two champions of the teaching of psychology Wilbert J. McKeachie and Charles L. Brewer in order to recognize their seminal contributions to the teaching of the discipline The book's main goal is to provide comprehensive coverage and analysis of the basic philosophies current issues and the basic skills related to effective teaching in psychology It transcends the typical nuts and bolts type books and includes such topics as teaching at small colleges versus a major university teaching and course portfolios the scholarship of teaching what to expect early in a teaching career and lifelong learning The Teaching of Psychology also features Biographies of Bill McKeachie and Charles L. Brewer Fourteen chapters written by leading authorities in the teaching of psychology which provide overviews of the latest psychological research and theories in effective college and university teaching These chapters cover lecturing classroom presence using humor in teaching pedagogy advising teaching critical thinking writing and technology and training graduate students to teach Useful advice to new teachers and seasoned veterans including qualities of master teachers understanding the many facets of working within the academy and teaching with technology Insights into teaching specific courses within the psychology curriculum including the history of psychology biological psychology statistics and research methods learning social psychology personality psychology of women cross cultural psychology industrial organizational psychology psychology of religion and environmental psychology A closing section containing Bill McKeachie's and Charles L. Brewer's perspectives

into the teaching of psychology and its history highlights and future This book is intended for academic psychologists who teach and or train graduate assistants to teach at the college and university level All royalties from this book will be donated to the Society for the Teaching of Psychology Division 2 of the American Psychological Association which each year sponsors many activities across the country to promote the teaching of psychology *Statistics for the Behavioral Sciences* James Jaccard, Michael A. Becker, 2002 Now your students can become intelligent consumers of scientific research without being overwhelmed by the statistics Jaccard and Becker's text teaches students the basic skills for analyzing data and helps them become intelligent consumers of scientific information Praised for its real life applications the text tells students when to use a particular statistic why they should use it and how the statistic should be computed and interpreted Because many students given a set of data cannot determine where to begin in answering relevant research questions the authors explicate the issues involved in selecting a statistical test Each statistical technique is introduced by giving instances where the test is most typically applied followed by an interesting research example each example is taken from psychology literature
