Cohesion and Growth Willem Molle, 2015-05-15 To combat economic disparity and low growth the European Union has established an integrated policy system that pursues increased cohesion and smart sustainable and inclusive

growth This integrated approach is realized through thousands of development projects and takes up more than a third of the total budget of the European Union Despite its significance the policy is subject to many misunderstandings and there is a lot of controversy surrounding its effectiveness Cohesion and Growth seeks to bring clarity to these issues It presents both the theoretical and practical aspects of EU intervention a critical contribution to the understanding of the anatomy of the problems and the way to apply effective solutions to them and a systematic view of the issues at each of the subsequent stages of the whole policy cycle Offering an authoritative analysis of the problems and debates involved this book is essential reading for students policy makers project promoters and researchers concerned with this key area of European policy making

Overcoming Fragmentation in Southeast Europe Panayiotis Getimis, 2017-11-28 With the expansion of the European Union the countries of Southeast Europe have finally been brought together within one socio political entity The restructuring of these economies following globalization and neoliberalization has meant that this region has become much more open to geopolitical shifts and trends While the various countries have all entered into the slow process of European integration the historic fragmentation of this region has led to various conflicts and contradictions in the restructuring and transition of national economies This volume provides a theoretical and comparative overview which examines the prospects for spatial cohesion in this region With the need to handle persisting problems and conflicts from the past while coping with new economic and political structures Southeast Europe proves to be a challenging yet fruitful testing ground for how best to overcome fragmentation and establish a long term process of social and economic integration

Towards a just Europe João Labareda, 2021-01-26 This highly original book constitutes one of the first attempts to examine the problem of distributive justice in the European Union in a systematic manner Jo o Labareda argues that the set of shared political institutions at EU level including the European Parliament and the Court of Justice of the EU generate democratic duties of redistribution among EU citizens Furthermore the economic structure of the EU comprising a common

market a common currency and a free movement area triggers duties of reciprocity among member states The responsibilities to fulfil these duties Labareda argues should be shared by the local national and supranational levels of government Not only should the EU act as a safety net to the national welfare systems applying the principle of subsidiarity but common market and Eurozone regulations should balance their efficiency targets with fair cooperation terms The concrete policy proposals presented in this book include a threshold of basic goods for all EU citizens an EU labour code a minimum EU corporate tax rate and an EU fund for competitiveness Labarada argues that his proposals match the political culture of the member states are economically feasible can be translated into functioning institutions and policies and are consistent with the limited degree of social solidarity in Europe This book is a major contribution to the understanding of what a just Europe would look like and what it might take to get us there **Regional Development in Central and Eastern Europe** Grzegorz Gorzelak, John Bachtler, Maciej Smętkowski, 2018-10-24 This book provides an up to date assessment of the main processes and dilemmas of regional development and regional policy in the newer European Union Member States in Central and Eastern Europe and neighbouring countries It highlights the difficulties of balancing the demands within the new Member States for rapid regional growth and development with firstly the demands of the European Union overall that restructuring and development should conform to the aims and principles of EU common policies and secondly with budgetary constraints The book covers a wide range of issues including global and national challenges to regional convergence and cohesion regional dynamics city networks and border issues the effectiveness of policy responses at national and European levels including an assessment of policy experiences from outside the new Member States and likely future developments **Drivers of Innovation, Entrepreneurship and Regional Dynamics** Karima Kourtit, Peter Nijkamp, Roger R. Stough, 2011-06-10 The need for informed and effective insights into key concepts and models of regional development and growth from an endogenous growth perspective has risen over the past decade These recent advances address in particular local and regional assets and characteristics comprising inter alia creativity knowledge innovation forces and entrepreneurship Access to and exploitation of these modern forms of human and social capital are of paramount importance for the dynamic regional economic environment in a city or region This volume offers an overview and critical treatment of the spatial economic roots opportunities and impacts of new growth strategies mainly from an evidence based perspective In the various contributions to this volume relevant findings and strategic options are interpreted and discussed from both an analytical and a policy perspective to help cultivate creativity human capital development and innovation as well as entrepreneurial activity with a view to exploit the drivers of economic development in order to strengthen the competitive edge of cities and regions **Journal of Borderlands Studies** ,2012 **Regional Analysis and Policy** Harry Coccossis, Yannis Psycharis, 2008-08-02 Regional development is attracting the attention of policy makers and scientists again as regions urban centers and rural areas experience substantial pressures particularly in Europe as a consequence of

globalization and geopolitical changes which lead to changes in spatial structures and dynamics This book is based on the contributions of Greek regional science research presented at the 2006 Congress of the European Regional Science Association at Volos Greece The contributions selected to be presented in this book address these changes offering a fresh look into regional development They provide an overview of regional development concerns from Greek regional scientists but the issues discussed pervade Greek particularities and stimulate thinking about regional science regional development and regional policy in the early twenty first century

Geography, Institutions and Regional Economic Performance

Riccardo Crescenzi,Marco Percoco,2012-12-13 The book aims to present traditional features of regional science as geographical concepts and institutions as well as relatively new topics such as innovation and agglomeration economies In particular it demonstrates that contrary to what has been argued by recent economics literature both geography and institutions or culture are relevant for local development In fact these phenomena along with the movement of goods and workers are among the main reasons for persisting development differentials These intriguing relationships are at the heart of the analysis presented in this book and form the conceptual basis for a promising institutional approach to economic geography

Regional Convergence in the European Union

Juan R. Cuadrado-Roura,Marti Parellada,2013-03-14 The introduction of the single currency in the European economic space constitutes without doubt the most visible step towards monetary and economic integration in the EU Those who boosted the birth of the Common Market in 1957 dreamt that this would one day come about as a logical consequence of the integration process However things have gone much more slowly than possibly imagined although if taken in an adequate historic perspective it is undeniable that the agreements that have led to European Monetary Union signify a really formidable jump in the process of political and economic integration in Europe This is something many doubted would ever happen but which is already a reality although still in need of a period of consolidation The most general economic consequences of the EMU have already been analysed in considerable depth Proof of this is the literature already available In general there is coincidence in affirming that the balance of the results expected is clearly positive Firstly as a result of the anticipated gains in efficiency a consequence of reduction of transaction costs associated to the previous existence of different currencies and of the elimination of exchange rate uncertainties

Territorial Development, Cohesion and Spatial Planning

Neil Adams,Giancarlo Cotella,Richard Nunes,2012-08-06 This book examines some of the evolving challenges faced by EU regional policy in light of enlargement and to assess some of the approaches and trends in terms of territorial development policy and practice that are emerging out of this process Focusing on the experiences on Central and Eastern Europe these chapters reflect on the diversity of approaches to spatial planning and the the politics of policy formation and multi level governance operations from local to trans national agendas Promoting increased awareness and understanding of these issues is the main purpose of the book as well as harnessing the extensive capacity and knowledge within these countries that can greatly enrich the discourse within an enlarged epistemic

community of European spatial planning academics practitioners and policy makers The recently acquired CEE dimension provides a unique opportunity to examine the evolution of existing epistemic communities as well as to explore the potential emergence of new ones

EU Enlargement, Region Building and Shifting Borders of Inclusion and Exclusion

Professor James W. Scott, 2012-11-28 The 2004 entry of 10 Central and Eastern European countries along with Malta and Cyprus into the EU has caused a huge shift in the EU's external boundaries The socio economic and political transformations that this shift has caused not only suggest new regional development opportunities but also many potential problems and tensions While the EU insists that enlargement will not signify new divisions processes of inclusion and exclusion and the imposition of visa restrictions on non EU citizens could pose obstacles to co operation conjuring fears of an emerging fortress Europe that effectively divides the continent Illustrated with case studies from Central and Eastern European border areas this book examines capacities for region building across national borders in within the context of EU enlargement

synthesizing the various insights provided by local information and suggesting ways forward for the future development of the EU's Wider Europe strategy

An Agenda for a Growing Europe

André Sapir, Philippe Aghion, Giuseppe Bertola, Martin Hellwig, Jean Pisani-Ferry, Dariusz Rosati, José Viñals, Helen Wallace, Marco Buti, Mario Nava, Peter M. Smith, 2004-03-04 Over the past decade European economic integration has seen considerable institutional success but the economic performance of the EU has been varied While macroeconomic stability has improved and an emphasis on cohesion preserved the EU economic system has not delivered satisfactory growth performance This book is the report of a high level group commissioned by the President of the European Commission to review the EU economic system and propose a blueprint for an economic system capable of delivering faster growth along with stability and cohesion It assesses the EU's economic performance examines the challenges facing the EU in the coming years and presents a series of recommendations The report views Europe's unsatisfactory growth performance during the last decades as a symptom of its failure to transform into an innovation based economy It has now become clear that the context in which economic policies have been developed has changed fundamentally over the past thirty years A system built around the assimilation of existing technologies mass production generating economics of scale and an industrial structure dominated by large firms with stable markets and long term employment patterns no longer delivers in the world of today characterized by economic globalization and strong external competition What is needed now is more opportunity for new entrants greater mobility of employees within and across firms more retraining greater reliance on market financing and higher investment in both R D and higher education This requires a massive and urgent change in economic policies in Europe

Landscape Modelling

Jiří Anděl, Ivan Bičík, Petr Dostál, Zdeněk Lipský, Siamak G. Shahneshin, 2010-04-11 Landscape modelling integrates the differing perspectives of the many disciplines that deal with the landscape It is motivated not only by the desire for scientific understanding but also by the real time demands of 21st century postindustrial society which include the twin imperatives of stabilizing

damaged ecosystems on the one hand and finding effective ways to use the landscape on the other. The discipline has the specific goal of designing and assessing future scenarios of landscape development while not losing sight of its past history both ecological and socio cultural. This book encompasses the interrelated disciplines of geography, landscape ecology and geoinformatics and by drawing on their theories and methodologies introduces the concept of a living landscape with human action an inseparable part of its evolution. It offers researchers and decision makers a number of ideas on how our landscape can best be utilized. The content reflects the need for sustainable landscape development at the same time as considering long term continuity as a major condition which enables us to maintain the diversity and multifunctionality of landscapes at regional and macro regional scales. Employing advanced terminology and methods this book provides specific results especially for scientists and landscape professionals.

The European Union and Global Capitalism Magnus Ryner, Alan Cafruny, 2016-12-16. This book draws on critical theory to introduce readers to ways of exploring questions about the EU from a political economy perspective. Questions like: Does the EU help or hinder Europe's social models to face the challenges of globalization? Does the EU represent a break from Europe's imperial past? What were the causes of the Eurozone crisis?

The European Competitiveness and Transition Report 2001-2002 : Ratings of Accession Progress, Competitiveness, and Economic Restructuring of European and Transition Economies World Economic Forum, 2002-02-28. For over a decade central and eastern Europe has been at the center of one of the most profound economic and political transformations in history. At the start of the 1990s the region embarked on an ambitious reform program to depart from central planning towards more market based economies. A decade later and amid significant difficulties the region has achieved remarkable accomplishments with several countries becoming increasingly integrated into the global economy. Political structures have been transformed and new institutions have emerged. Indeed the progress in structural reforms achieved in the region has been so substantial that several countries are now at the threshold of European Union membership. Aware of the significance of the successful integration of central and eastern Europe into the global economy the World Economic Forum and Harvard University are proud to introduce *The European Competitiveness and Transition Report* a thorough review of the transition process that has unfolded in the last decade. This comprehensive report presents new data and expert commentary on what the facts say about the enlargement of the European Union and the competitiveness and growth potential of both Europe and the candidate countries. It addresses the many important factors that will determine how these countries will fare in terms of economic growth over the next ten to twenty years. Written by independent experts *The European Competitiveness and Transition Report 2001-2002* is a truly unique data driven guide that lays out the facts and reveals the real issues behind European enlargement.

Macroeconomic Effects of EU Transfers in New Member States, 2008. Large inflows from the European Union to the New Member States are likely to significantly impact macroeconomic outcomes. In this paper we use the IMF's Global Integrated Monetary and Fiscal model (GIMF) to analyze the impact of the transfers and show the

conditions under which they would help speed up convergence We find that the EU funds need to be directed predominantly to investment rather than to income support and that to best accompany the EU fund inflows the policy mix would need to combine counter cyclical policy with a strong commitment to the existing monetary regime
