Intellectuals In The Middle Ages:

Intellectuals in the Middle Ages Jacques Le Goff, 1993 Examines the creation of universities in the cities of Europe during the Middle Ages and discusses how medieval intellectuals ensured that the luxury of learning ceased to be limited to the Church and the Court Scholars and Courtiers C. Stephen Jaeger, 2002 The creative and intellectual life of the early and high Middle Ages in the West was sustained by learned worldly clerics Their rich culture was slow to be discovered in its fullness partly because church history tended to dominate perspectives on clerical life while the chivalric literature of the courts was seen as reflecting values and ideals of secular culture however busy clerical authors may have been in the recording of it These essays bring new approaches to these questions showing the deep and decisive engagement of clerical scholars and courtiers in the major realms of medieval secular intellectual and social life Medieval humanism cathedral school education courtly love and courtesy and the renaissance of the 12th century are among the topics covered Orpheus in the Eleventh Century illuminates the function and nature of Latin poetry in both the schools and society two essays focus on Abelard while others reconsider the historical relationship of 11th century worldly culture to that of the 12th The author suggests a cultural unity of schools cathedral communities and secular courts created by this class of scholar courtiers

Thinking of the Medieval Benjamin A. Saltzman, R. D. Perry, 2022-10-13 The mid twentieth century gave rise to a rich array of new approaches to the study of the Middle Ages by both professional medievalists and those more well known from other pursuits many of whom continue to exert their influence over politics art and history today Attending to the work of a diverse and transnational group of intellectuals Hannah Arendt Erich Auerbach W E B Du Bois Frantz Fanon Erwin Panofsky Simone Weil among others the essays in this volume shed light on these thinkers in relation to one another and on the persistence of their legacies in our own time This interdisciplinary collection gives us a fuller and clearer sense of how these figures made some of their most enduring contributions with medieval culture in mind Thinking of the Medieval is a timely reminder of just how vital the Middle Ages have been in shaping modern thought *Intellectual Life in the Middle Ages* Lesley Smith, 1992-07-01 The variety of experience available to medieval scholars and the vitality of medieval thought are both reflected in this collection of original essays by distinguished historians Intellectual Life in the Middle Ages is presented to Margaret Gibson whose own work has ranged from Boethius to Lanfranc and to the study of the Bible in the middle ages

Pedagogy, Intellectuals, and Dissent in the Later Middle Ages Rita Copeland, 2001-07-26 This book is about the place of pedagogy and the role of intellectuals in medieval dissent Focusing on the medieval English heresy known as Lollardy Rita Copeland places heretical and orthodox attitudes to learning in a long historical perspective that reaches back to antiquity She shows how educational ideologies of ancient lineage left their imprint on the most sharply politicized categories of late medieval culture and how radical teachers transformed inherited ideas about classrooms and pedagogy as they brought their teaching to adult learners The pedagogical imperatives of Lollard dissent were also embodied in the work

of certain public figures intellectuals whose dissident careers transformed the social category of the medieval intellectual Looking closely at the prison narratives of two Lollard preachers Copeland shows how their writings could serve as examples for their fellow dissidents and forge a new rapport between academic and non academic communities

Intellectual Life in the Middle Ages Lesley Smith,1992-07-01 The variety of experience available to medieval scholars and the vitality of medieval thought are both reflected in this collection of original essays by distinguished historians Intellectual Life in the Middle Ages is presented to Margaret Gibson whose own work has ranged from Boethius to Lanfranc and to the study of the Bible in the middle ages

Intellectual Culture in Medieval Paris Ian P. Wei,2012-05-03 In the thirteenth century the University of Paris emerged as a complex community with a distinctive role in society This book explores the relationship between contexts of learning and the ways of knowing developed within them focusing on twelfth century schools and monasteries as well as the university By investigating their views on money marriage and sex Ian Wei reveals the complexity of what theologians had to say about the world around them He analyses the theologians sense of responsibility to the rest of society and the means by which they tried to communicate and assert their authority In the late thirteenth and early fourteenth centuries however their claims to authority were challenged by learned and intellectually sophisticated women and men who were active outside as well as inside the university and who used the vernacular an important phenomenon in the development of the intellectual culture of medieval Europe

The Vocabulary of Intellectual Life in the Middle Ages Mariken Teeuwen,2003 The Latin vocabulary of intellectual life in the Middle Ages has been the focus of the CIVICIMA series nine volumes of conference proceedings monographs and collective works The series has proved convincingly that analyses of the verbal expressions of medieval intellectual life and their precise meanings is a worthwhile and rewarding task which sharpens and deepens our understanding of education and learning in the medieval world With this tenth volume the series has been brought to a conclusion It serves as a handbook a practical tool for finding information and material about a considerable number of key terms which have been classified in four categories of technical vocabulary terms that developed specialized meanings in the context of medieval education and learning The first category consists of the vocabulary of schools and universities for instance schola magister universitas etc the second the vocabulary of the book and book production for instance armarium pecia scriptorium etc the third treats the vocabulary of teaching methods instruments and products of intellectual life for instance concordantia disputatio glossa etc the fourth the names of the disciplines their teachers and students for instance artes liberales canonista decretista theologia etc Terms from these four categories are treated either individually or in groups coherent with respect to content in short and uniform articles Their medieval meanings are described together with their origins their classical meanings their semantic development and the historical or regional differences in meaning

Medieval Foundations of the Western Intellectual Tradition, 400-1400 Marcia L. Colish,1997-01-01 This magisterial book is an analysis of the course of Western intellectual history between A D 400 and

1400 The book is arranged in two parts the first surveys the comparative modes of thought and varying success of Byzantine Latin Christian and Muslim cultures and the second takes the reader from the eleventh century revival of learning to the high Middle Ages and beyond the period in which the vibrancy of Western intellectual culture enabled it to stamp its imprint well beyond the frontiers of Christendom Marcia Colish argues that the foundations of the Western intellectual tradition were laid in the Middle Ages and not as is commonly held in the Judeo Christian or classical periods She contends that Western medieval thinkers produced a set of tolerances tastes concerns and sensibilities that made the Middle Ages unlike other chapters of the Western intellectual experience She provides astute descriptions of the vernacular and oral culture of each country of Europe explores the nature of medieval culture and its transmission profiles seminal thinkers Augustine Anselm Gregory the Great Aquinas Ockham studies heresy from Manichaeism to Huss and Wycliffe and investigates the influence of Arab and Jewish writing on scholasticism and the resurrection of Greek studies Colish concludes with an assessment of the modes of medieval thought that ended with the period and those that remained as bases for later ages of European intellectual history

The Vocabulary of Intellectual Life in the Middle Ages Mariken Teeuwen, 2003

The Intellectual Life of Western Europe in the Middle Ages Dales, 2022-04-19 This work presents a connected account of western European thought from the Patristic age to the mid fourteenth century Dales aims to keep his reader close to the sense of the texts which he translates frequently at some length or summarizes in his exposition He attempts to include important matters which are generally omitted in broad treatments the chapter on the tenth century is the longest in the book but the author's choice of topics is fully justified by his special intimacy with what he elects to discuss particularly the hexameral tradition ancient and medieval the scientific tradition twelfth century treatises on nature and cosmology discussions of the eternity of the world and the thought of Robert Grosseteste This adds a personal and distinctive character to the work Dales stresses throughout the diversity and vigor of medieval thought qualities which he illustrates widely from Latin and vernacular poetry and literature of various kinds as well as from philosophical and theological texts

The Work of Jacques Le Goff and the Challenges of Medieval History Miri Rubin, 1997 Essays on medieval history inspired by and engaging with the work of Jacques Le Goff The essays in this volume arise from the proceedings of a conference held in 1994 to celebrate the life and work of the eminent French medievalist Jacques Le Goff Set within thematic sections popular religion and heresy the body royalty and its mystique intellectuals in medieval society and others many of the challenges raised by Le Goff are reassessed and reappraised There is an explicit historiographical focus in a section on the reception and influence of Le Goff with particular reference to the Annales school of history with which he is strongly identified the volume also indicates the problems which animate current research in medieval studies especially in certain areas of social and cultural history

BOUREAU JEAN DUBABIN WILLIAM CHESTER JORDAN PETER LINEHAN MIRI RUBIN GABOR KLANICZAY AARON GUREVICH ROBIN BRIGGS STUART CLARK *Intellectual Activity and Intercultural Exchanges in Frankish Acre, 1191-1291* Jonathan Rubin, 2018-09-06 Offers an unprecedentedly rich portrait of the vibrant intellectual and intercultural exchanges sparked by the Crusades in thirteenth century Acre *Fools and idiots?* Irina Metzler, 2016-02-01 This is the first book devoted to the cultural history in the pre modern period of people we now describe as having learning disabilities Using an interdisciplinary approach including historical semantics medicine natural philosophy and law it considers a neglected field of social and medical history and makes an original contribution to the problem of a shifting concept such as idiocy Medieval physicians lawyers and the schoolmen of the emerging universities wrote the texts which shaped medieval definitions of intellectual ability and its counterpart disability In studying such texts which form part of our contemporary scientific and cultural heritage we gain a better understanding of which people were considered to be intellectually disabled and how their participation and inclusion in society differed from the situation today The Intellectual Life of Western Europe in the Middle Ages Richard C. Dales, 1992 A connected account of European thought from the Patristic age through the mid fourteenth century and emphasizing educational systems the interaction between the popular and elite cultures and medieval humanism with excellent interpretive chapters on science and philosophy Thinking of the Middle Ages Benjamin A. Saltzman, R. D. Perry, 2022-10-13 This book examines how mid twentieth century intellectuals engagement with the Middle Ages shaped politics art and history *The Intellectual Properties of Learning* John Willinsky, 2018-01-02 Providing a sweeping millennium plus history of the learned book in the West John Willinsky puts current debates over intellectual property into context asking what it is about learning that helped to create the concept even as it gave the products of knowledge a different legal and economic standing than other sorts of property Willinsky begins with Saint Jerome in the fifth century then traces the evolution of reading writing and editing practices in monasteries schools universities and among independent scholars through the medieval period and into the Renaissance He delves into the influx of Islamic learning and the rediscovery of classical texts the dissolution of the monasteries and the founding of the Bodleian Library before finally arriving at John Locke whose influential lobbying helped bring about the first copyright law the Statute of Anne of 1710 Willinsky s bravura tour through this history shows that learning gave rise to our idea of intellectual property while remaining distinct from if not wholly uncompromised by the commercial economy that this concept inspired making it clear that today s push for marketable intellectual property threatens the very nature of the quest for learning on which it rests Travellers, Intellectuals, and the World Beyond Medieval Europe James Muldoon, 2017-05-15 As the articles reprinted in this volume demonstrate medieval men and women were curious about the world around them They wanted to hear about distant lands and the various peoples who inhabited them Travellers tales factual such as that of Marco Polo and fictional such as Chaucer s famous pilgrimage entertained audiences across Europe Colorful mappaemundi placed in churches

illustrated these other lands and peoples for those who could not read Medieval travel literature was not only entertaining however it was also informative generating proto ethnological information about the world beyond Latin Christendom that provided useful guidance for those such as merchants and missionaries who intended to travel abroad Merchants learned about safe travel routes to foreign lands about dangers to be avoided on the roads and at sea about cultural practices that might interfere with their attempts at trade and about products that would be suitable for foreign markets Churchmen read the reports of missionaries to understand the beliefs of Muslims and other non believers in order to debate with them and to learn their languages These articles illustrate how travellers reports in turn shaped the European response to the world beyond Europe and are set in context in the editor s introduction

Medieval Philosophy and the Transcendentals Jan Aertsen, 2021-12-06 Students of Thomas Aquinas have so far lacked a comprehensive study of his doctrine of the transcendentals This volume fills this lacuna showing the fundamental character of the notions of being one true and good for his thought The book inquires into the beginnings of the doctrine in the thirteenth century and explains the relation of the transcendental way of thought to Aquinas s conception of metaphysics It analyzes Being One True Good and Beautiful individually and discusses their importance for the philosophical knowledge of God Medieval Philosophy and the Transcendentals The Case of Thomas Aquinas is intended as a contribution to the question What is philosophy in the Middle Ages It argues that the doctrine of the transcendentals is essential for understanding medieval philosophy
